*THE FINANCIAL SITUATION.*

The first week of the new year has demonstrated that we have substantially come to the end of our gold imports for this season. Foreign exchange, after having declined towards the close of the old year, has again advanced, until this week the nominal rate for short sterling closes at 4 86, with the market firm. That state of the exchanges we may assume virtually terminates this season's movement of bullion to America. It would be premature as yet to attempt to discuss the various causes for the arrest of the inflow that has thus so soon occurred in face of an unusually large trade balance, which we are authorized to affirm, judging from the latest official figures, is still accumulating in our favor. By-and-by when the main facts have become matters of record, they will present an economic question that will be well worth the study of all our financial doctors of whatever school. In the meantime it will be not only of interest, but also of use, to state just what have been the proportions of this phenomenal gold movement since it started, in January 1891. For the six months ending with June 30, 1891,

the total <i>net</i> exports were.....	\$67,154,140
In July 1891 the <i>gross</i> exports of gold were.....	6,662,674

Making the total exports in the 7 months..\$73,816,814

The import began the last of July, the closing week of the month, there being moderate gold imports from London, Paris, &c., as well as large exports. For that month (July) the *gross* imports were..... \$1,029,148

In August the *net* imports were \$1,222,587, in September they were \$7,106,138, in October \$16,088,352, in November \$8,489,768, making *net* for those four months.....\$32,906,845

In December (including the San Francisco imports) they were about..... 4,500,000

Total imports since July 1 1891....\$38,435,993

The result would seem to be that we have imported the last six months of 1891 a little more than half of the amount we exported during the first seven months of 1891. In that year (1891) our product of gold was probably about 33 million dollars. We consumed of this metal in manufactures for the same twelve months about 13 million dollars. That would leave say, roughly, 20 millions to add to stock, thus giving us in 1891 with the imports above set out new gold to the amount of 58½ million dollars, against a loss by export in the same period of 73½ million dollars, or a net loss for the year of 15½ million dollars.

The year has opened with a very easy money market. Offerings even on time are liberal, indicating a prevailing belief in a continued abundance for the winter months at least. This week the banks have made a further and material gain in reserve, largely on account of Government disbursements for interest. On the

four per cents there was due the first of January \$5,595,740, and on the currency sixes \$1,938,705, or an aggregate of over 7½ million dollars. A portion of this amount may have been disbursed by the Government at other cities and a portion we assume is likely to appear in next week's bank statement. At all events the net excess which has gone into our Clearing House institutions this week on account of Treasury receipts and disbursements reaches less than one-half of the 7½ million dollars of interest which fell due on New Year Day. Besides this item, however, the banks have during the same period gained from the interior movement, so that the statement to be made public to-day ought to show quite a large addition to reserve. The surplus reported last Saturday was \$17,232,050, of which five of the larger banks held \$7,950,900.

Because of the facts stated above, notwithstanding the very heavy transactions at the Stock Exchange at generally advancing prices calling for large borrowings by the commission houses, money on call representing bankers' balances has tended downward since the beginning of the week, loaning then at 4 and later at 3½ per cent as the highest and falling to 2 per cent almost daily since Wednesday and yesterday getting down to 1½ per cent. The average for the week has been 3 per cent, at which renewals have been made; banks and trust companies, however, maintain 4 as the minimum, although they do comparatively little on call. Time money is pressing on the market from all quarters, and while the demand is fair it is by no means urgent. The rates for good Stock Exchange collateral are 3 per cent for thirty days; 3½ for sixty days; 4 for ninety days to four months, and 4½ for five to six months. For commercial paper there is a good demand, which absorbs the supply without leaving any accumulation. The inquiry for first-class is chiefly by city banks and other institutions, while lower grade paper is taken by out-of-town buyers. Rates are 4½ per cent for sixty to ninety day endorsed bills receivable; 4¾ to 5¼ for four months commission house names, and 5 to 6 for good single names having from four to six months to run.

Discounts are very easy in Europe. The cable reports sixty to ninety-day bank bills in London 1½ to 2 per cent; the open market rate at Paris is 2½, at Berlin it is 2 and at Frankfort 2½ per cent. It was reported on Thursday that the statement that a Russian loan for £20,000,000 is being arranged depressed Russians at Berlin, and it is further said that the press is renewing its campaign against these securities. The London and the continental bourses were heavy on that day because of a story that France will not permit British sailors to land at Tangiers, indicating that the political situation was again subjected to some tension; but the foreign bankers regarded these reports by cable from London as greatly exaggerated and intended for effect upon our stock market. The Bank of England gained £172,000 bullion during the week. This, as we are advised by special cable to us, was due to an import of £151,000 chiefly from Portugal and India, to receipts of £221,000 from the interior of Great Britain, and to the export of £200,000 wholly to the Argentine Republic and Brazil. The Bank of France gained £106,000 gold during the week, and the Bank of Germany since the last report shows a decrease of about £357,000 of this metal.

Foreign exchange has been strong and higher this week, as was the case last week, having

been influenced by easier discounts in London, by selling of stocks by the arbitrage houses for European account and by low rates for money here which prevents speculative selling of bills, bankers being unable satisfactorily to employ their balances. Compared with Thursday of last week Brown Bros opened on Monday at an advance to 4 83 for long, and later in the day the Bank of Montreal moved up to the same figure, leaving short unchanged at 4 85½. Baring, Magoun & Co. maintained their rate at 4 82½ for sixty-day and advanced to 4 85½ for sight, while the Bank of British North America posted 4 83 for long and 4 85 for short. On Tuesday Baring, Magoun & Co. advanced the long rate to 4 83 and the Bank of Montreal to 4 83½. No further change was made until Thursday, when Brown Bros. moved up to 4 83½ for long and 4 86 for short; Baring, Magoun & Co. advanced long to 4 83½, and the Bank of British North America posted 4 83½ for sixty-day and 4 85½ for sight; yesterday all the other drawers marked up short to 4 86, while the Bank of Montreal and the Bank of British North America also advanced long to 4 84. The market closed dull but firm at 4 83½@4 84 for long and 4 85½ to 4 86 for short. Rates for actual business were 4 83 to 4 83½ for sixty-day; 4 85 to 4 85½ for sight; 4 85½ to 4 85½ for cable transfers; 4 82 to 4 82½ for prime and 4 81½ to 4 81½ for documentary commercial bills.

We review in a separate article the final estimates of the grain yield of 1891 as furnished by the Washington Agricultural Department this week. There is one feature of the subject that may be referred to here, as bearing upon the heavy movement of grain over Western roads and the strikingly favorable returns of earnings which such roads as a consequence are able to make. When one sees how very large the production of wheat in all the leading Western States has been, according to these estimates of the Department, it does not appear surprising that the traffic in that cereal should be of enormous proportions. Take the Northwestern section for instance, where the roads are especially distinguished just now for the excellent character of their exhibits of earnings. In the two Dakotas alone the yield of wheat is placed at 82 million bushels, as against only 40½ million bushels in 1890, so that from these two States there is double the quantity to come forward that there was the previous season. To this increase of 41½ million bushels from the Dakotas there are further heavy increases to be added from the other States. Thus in Minnesota the crop is 55 million bushels against 38 million bushels, in Iowa 27 millions against 19 millions, &c. In the six principal Northwestern States the yield for 1891 foots up about 196 million bushels, against only 126 million bushels for 1890, giving an increase of about 70 million bushels. So in the other leading sections, the four Central Western States—Ohio, Illinois, Indiana and Michigan—showing a total production for 1891 of 163 millions against 96 millions for 1890, and Kansas and Missouri a production of 80,598,000 against 45,833,000. It is a remarkable fact that there are no less than four States which have produced over 50 million bushels each, namely North Dakota, Minnesota, Kansas and Indiana. It is needless to say that such a record is unequalled. Below we compare both the wheat and the oats production in the two years for the three sections mentioned. The figures as to corn for the different States are given in the separate article already referred to.

	Wheat Production.		Oats Production.	
	1891.	1890.	1891.	1890.
<i>Northwestern Section.</i>	<i>Bushels.</i>	<i>Bushels.</i>	<i>Bushels.</i>	<i>Bushels.</i>

	80,598,000	45,833,000	64,700,000	55,848,000
<i>Central Western.</i>				
Ohio.....	45,531,000	29,984,000	28,523,000	20,004,000
Indiana.....	52,807,000	27,928,000	21,034,000	17,800,000
Illinois.....	35,025,000	18,161,000	111,095,000	70,821,000
Michigan.....	30,205,000	20,271,000	30,280,000	25,033,000
	163,568,000	96,344,000	190,932,000	133,658,000

Total 3 sections.. 440,027,000 268,396,000 548,206,000 385,500,000

From this we see that in addition to the 70 million bushels gain in wheat, the Northwestern States taken have a gain of nearly 97 million bushels in oats; and the Southwestern section and the Central Western section also have gains in oats—all in addition to the very heavy increase in corn, which cereal has not yet begun to play a very prominent part in the traffic of the roads. It will be observed that the three sections together raised 440 million bushels out of the 612 million bushels of wheat, and 548 millions out of the 738 million bushels of oats.

Our review of the December gross earnings of United States railroads will be given next week. From preliminary summaries, however, which we have prepared it is evident that the showing will be a good one, as the aggregate for 95 roads for December 1891 is \$40,761,031, against only \$36,928,885 for December 1890, giving an increase of \$3,832,146, or 10.38 per cent. The Northwestern roads have gains of very large dimensions. Thus the Chicago Milwaukee & St. Paul reports an increase of \$237,041 for the fourth week of the month and an increase of no less than \$638,769 for the full month, the latter an improvement of over 25 per cent. The Great Northern system shows a gain of \$384,461, or over 33 per cent. The Chicago Burlington & Quincy statement of gross and net for November, issued this week, is of the same favorable character, gross earnings as compared with the corresponding month of last year having increased \$668,429 and net earnings \$277,089. For the eleven months the gross of this road is now only \$486,957 behind 1890, while the net, owing to the reduction in expenses, is actually \$700,732 better than for the eleven months of that year. The St. Paul & Duluth is another road in the Northwestern section. It shows for November gross of \$200,571, against \$142,304, and net of \$100,443, against \$54,390. The Missouri Pacific in the Southwest shows \$213,225 gain in gross and \$136,037 in net.

The Cleveland Cincinnati Chicago & St. Louis November return has also been received this week. Gross earnings are slightly below those of 1890, but net earnings are somewhat better, being \$359,653 against \$349,870. For the five months from July 1 net is \$1,868,431, against \$1,764,765, and the surplus above interest and rental charges \$798,397, against \$689,323. The Wabash is making liberal expenditures, hence while gross for November increased \$127,000, net increases only \$22,000. The Buffalo Rochester & Pittsburg reports for the same month gross of \$225,982 against \$210,313, and net of \$59,435 against \$54,486. The Oregon Improvement, while losing in gross, has net of \$88,033, against \$62,936. The East Tennessee Virginia & Georgia falls \$40,698 behind in its gross receipts for the month, but shows \$3,709 gain in net; the figures are now given out on a new basis, so as to

include the operations of the Louisville Southern and the Mobile & Birmingham.

The Louisville & Nashville has this week declared its regular  $2\frac{1}{2}$  per cent semi-annual dividend. The return for November shows \$145,277 gain in gross earnings and \$15,871 in net. A statement has also been issued to indicate the results for the six months to December 31, the December operations of course being partly estimated. This statement shows the dividend to have been fully earned, with a surplus over and above the amount required for the same, though in amount the surplus is not quite as large as for the corresponding six months of 1890, being \$174,543 against \$338,590. The company is usually very conservative in its estimates, and it may be that the final results will be even better than this, but in any event the exhibit is very gratifying. The Louisville & Nashville is a Southern road, and we need hardly say that in the South conditions latterly have not been very encouraging, the low price of cotton, the depression in the iron trade, and the reaction from the late "boom" having caused an unsatisfactory situation. Under the circumstances the showing made is very good indeed.

On the Stock Exchange there has been great buoyancy for the most of the week, though at the close somewhat of a reaction is being experienced. Each day has seen some new stock brought forward in the speculation for higher prices, and the transactions have amounted to heavy totals. The Vanderbilt properties and the trunk line shares have not been prominent in the rise, though on the other hand Rock Island and some of the other granger stocks have continued to advance. Richmond Terminal securities and other Brice-Thomas properties have been active and higher, and New York & New England has been sharply advanced on the accession of some new names to the management. Chicago Gas after a long and continuous rise, broke badly on Thursday. The Northern Pacific shares have been rather weak on the loss in the company's earnings. The bond market has been strong, though specialties have attracted more attention than the regular standard issues. Confidence in the future of values is very strong, based on the prospect of continued ease in money and the very heavy earnings by leading roads.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

Week Ending Jan. 8, 1892.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$3,733,000	\$1,930,000	Gain, \$1,803,000
Gold.....	1,100,000	475,000	Gain. 625,000
Total gold and legal tenders	\$4,833,000	\$2,405,000	Gain, \$2,428,000

With the Sub-Treasury operations the result is as follows.

Week Ending Jan. 8, 1892.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$4,833,000	\$2,405,000	Gain, \$2,428,000
Sub-Treasury operations.....	18,300,000	14,900,000	Gain. 3,400,000
Total gold and legal tenders	\$23,133,000	\$17,305,000	Gain \$5,828,000

## BUSINESS CONDITIONS REFLECTED IN MERCANTILE FAILURES.

Records of mercantile failures are oftentimes useful in forecasting the future, but generally the chief interest they possess is historical. The latter is peculiarly the case with the record for 1891. Indeed one would have to go back even to November 1890 to get at the origin of the disasters which appear in R. G. Dun & Co.'s report made public on the first day of the new year and given in detail by us (page 20) last week. For more than twelve months now the influences which made these results possible have been in process of correction and to-day if it were not for our currency weakness we should pronounce our industrial condition more than usually sound. In this way this list of failures has grown to wear a character in relation to past and future events not so very unlike a roll of killed and missing after a series of battles which have terminated in a treaty of peace.

At the same time considerable interest must be felt in noting how far this record reflects the variations which have marked the progress of the change referred to. For we have passed through very severe trials and encountered great risks. No one in financial circles here will forget the shock experienced on the announcement the 15th of November 1890 of the peril which a London banking house second to none in the world had been in. For a week or more preceding that announcement a vague conception of some secret but impending danger had prevailed, which was hardly less trying. If we add to the foregoing the monetary strain and panic in Wall Street which followed, and the monetary strain which was almost simultaneously felt in every Eastern city, and finally throughout the country, we have a combination of adverse influences seldom equaled.

And yet, as an immediate result, no conspicuous disasters occurred. Of course failures increased, and the aggregate for the last quarter of 1890 was large. But it was generally remarked at the time that financial and mercantile classes showed no little strength, indicative of a healthy situation of industrial affairs rather than undue expansion. The explanation is that though our breadstuffs crops in 1890 had been short, a large portion of the year's yield, besides an unexpected surplus from the yield of the previous year, was drawn from farmers' hands and marketed at high prices, while the cotton production proved phenomenal and the quotations until some months later remunerative. Under these recuperative influences, added to a close money market during the previous months of 1890, which restricted enterprise and induced caution, the country had actually regained vigor if not started on the up-grade when that severe shock to credit overtook it.

Why, it may be asked, if such was the situation here, did not our industrial condition right itself more quickly. The answer is to be found in the fact that the United States is now but a part of Europe, and, being a debtor nation, a very dependent part. Credit disturbed in London, Berlin and Paris means in any case embarrassment in New York. But in this case it meant more than that. Without taking time now to closely scrutinize events, it is sufficient to say that the critical condition which had its start in London had its source in foreign investments and that this has been its feature ever since, a sense of insecurity in "international" having for obvious reasons spread over the entire Continent. The United States under these cir-

cumstances could not hope to escape, especially as we were at the moment in a degree vulnerable. Our railroads were not prospering in the winter of 1890-91, and even worse results than the roads were then showing were anticipated in later months because of the short crops of 1890. And in addition to this there was the weak feature in our currency, which gave specific direction and force to a distrust in investments here. The rest is well known. With an absolute cessation in the ordinary flow of European capital to this centre, and with a return to America of such of our securities as could be dislodged or were afloat in Europe, an export of gold set in the like of which had never occurred, being kept up until July had half passed. Of course under these circumstances industries became more and more depressed, traders' endurance was more and more severely tried, and failures continued to be of frequent occurrence.

These suggestions afford the necessary help for an intelligent examination of the record of disasters. We give a summary which includes the figures for the two previous years also, as they aid in indicating the course of events.

First quarter—	1891.	1890.	1889.
Number of failures....	3,545	3,223	3,311
Amount of liabilities....	\$12,167,631	\$37,852,968	\$42,972,516
Second quarter—			
Number of failures....	2,529	2,162	2,292
Amount of liabilities....	\$50,248,636	\$27,466,416	\$22,856,337
Third quarter—			
Number of failures....	2,754	2,196	2,276
Amount of liabilities....	\$44,302,494	\$35,452,436	\$39,227,045
Fourth quarter—			
Number of failures....	3,445	3,326	3,003
Amount of liabilities....	\$53,149,877	\$89,085,144	\$43,728,439
Total year—			
Number of failures....	12,273	10,907	10,882
Amount of liabilities....	\$189,868,638	\$189,856,964	\$148,784,337
Average liabilities.....	\$15,471	\$17,406	\$13,672

Note first the comparatively small failures for the earlier three quarters of 1890. Both in number and in liabilities their aggregate is less than in 1889, notwithstanding the money stringency which prevailed, call loans at the Stock Exchange in every one of the first nine months of 1890 except March having reached 9 per cent or above that. It is important to note this, because the improved and improving condition of traders is more clearly indicated when it is remembered that the number of those who dropped out decreased ever under such a severe test of endurance as the money market presented. But with the final quarter of 1890 came the effects of the startling disclosures in London. These effects are seen more particularly in the aggregate liabilities (\$89,085,144), the number of the disasters not being conspicuously large; the severity of the trial is understood better when we recall the drop and panic in stocks following the disclosures and the condition of the loan market which concurrently and for days thereafter was such that it was almost impossible for any one to procure accommodation, while for weeks credit remained in an extremely disturbed state.

The year 1891, starting under such conditions and meeting as the year progressed the new trials incident to our large gold exports which we have narrated above, presents of course a record of increased failures, except for the last quarter, when they were comparatively small. We say comparatively small because the last quarter of the year affords almost always the largest totals. Thus in 1891 the liabilities in that quarter were a little less than 28 per cent of that year's total liabilities; in 1890 they were about 47 per cent; and in 1889 they were 29½ per cent; while the number of failures in the last quarter of 1891

was 28 per cent of the total number for the year, against 30½ per cent in 1890, 27½ per cent in 1889 and 29½ per cent in 1888. Take the record of 1891 as a whole we should say that the results were much less unfavorable than might have been expected, while the final quarter indicates that the change in the industrial conditions which has now taken place has proceeded so far as to relieve in a considerable measure the strain under which mercantile classes rested.

There are two other points which must be included in this review to obtain a clear understanding of what the record of business disasters teaches. We refer (1) to the relation which the total number of failures bears to the total number in business and (2) to the average liabilities of each insolvent. On the latter point it is not possible to gain exact information from these statistics because the liabilities are always given in one total, and consequently a few additional or a few less large failures in any year raises or lowers the average liabilities abnormally. The Messrs. R. G. Dun & Co. would greatly add to the usefulness of their compilation by giving each year a short additional statement dividing the liability item into classes; that is to say, showing the number and amount of liabilities contained in the year's failures which report over \$1,000,000 liabilities each; also the number and amount of liabilities of those failing reporting less than a million and over \$500,000 of liabilities each; and so on until the classification is brought down to those with say \$10,000 of liabilities each. With some additional information of this kind, accurate and important conclusions could be reached with reference to business conditions, in the place of conclusions which now can be only approximated.

The other matter referred to above (that is the proportion of failures to the number in business) is covered by the report, and is an item of information which is indispensable for any correct comparison of the rate of disasters from year to year. Obviously the number in business always increases, so that if the number of failures does not concurrently increase the proportion of failures to the number in business has relatively decreased. This is an essential distinction in any contrast like that we are now making; and consequently the subjoined statement, which gives these figures as well as the total and average liabilities, affords an interesting comparison for a long series of years.

Year.	Number of Failures	Number in Business.	Proportion Failures to No. in Business.	Liabilities.	
				Total.	Average.
1891.....	12,273	1,142,951	1 in 93	\$189,868,638	\$15,471
1890.....	10,907	1,110,590	1 in 102	189,856,964	17,406
1889.....	10,882	1,051,140	1 in 97	148,784,337	13,672
1888.....	10,679	1,046,662	1 in 93	123,829,973	11,505
1887.....	9,634	994,281	1 in 103	167,590,944	17,392
1886.....	9,834	969,811	1 in 98	114,614,119	11,651
1885.....	10,637	919,990	1 in 86	124,220,321	11,678
1884.....	10,968	904,759	1 in 83	226,343,427	20,632
1883.....	9,184	863,993	1 in 94	172,874,172	18,823
1882.....	6,738	822,256	1 in 122	101,547,564	15,070
1881.....	5,582	781,689	1 in 140	81,155,932	14,530
1880.....	4,735	746,823	1 in 158	65,752,000	13,886
1879.....	6,658	702,157	1 in 105	98,149,053	14,741
1878.....	10,478	674,741	1 in 64	234,333,132	22,369

The above discloses plainly enough the years of greatest loss to the mercantile community. There has been no recurrence of the disastrous year of 1878, when the rate of failures was 1 in every 64 in business and the total liabilities were \$234,383,132, with an average of \$22,369 each. The next severest reverse began in 1883, was felt most keenly in 1884, and extended into 1885; the death rate for 1884 reached 1 in 83,

with liabilities amounting that year to \$226,343,427, affording the large average of \$20,632 each. The present depression is the third period of special liquidation during the years included in the foregoing table, beginning in the last quarter of 1890 and extending through 1891. It has been much less severe than either of its predecessors, for the reasons already stated. Indeed, the increase of the number in business is so constant and rapid that to bring 1891 to a level with 1878 in the matter of liabilities the 1891 total liabilities would have to reach \$274,534,737; and to bring 1891 to a level with 1884 the 1891 total liabilities would have to reach \$253,216,536. No other test than these figures afford is needed to show how much sharper the crises of 1878 and 1884 were than has been the crisis of 1891.

#### OUR ENORMOUS CROPS.

The Department of Agriculture at Washington has this week issued its final estimates of the grain crops of 1891, and perhaps the most striking way to indicate the year's results and the contrast with the season preceding is to say that these estimates make the aggregate production of wheat, corn and oats just about a thousand million bushels larger than the aggregate for 1890. In other words, the product for 1891 figures out about 3,400 million bushels, whereas that for 1890 was placed at only about 2,400 million bushels. Of course this remarkable contrast follows from the fact that the yield in 1890 had been very small, but on the other hand the yield in 1891 has proved extraordinarily and phenomenally large.

The corn crop is placed at 2,060 million bushels, which comes quite close to the yield for 1889—the only year when the total reached two thousand million bushels. The oats crop, at 738 millions, also falls but slightly below the very heavy aggregate of that year, and that was the best in the country's history. The wheat crop is simply without a parallel. Never before have we had a crop of anywhere near the same dimensions. When the Department last October issued its figures of the yield per acre in the various States, according to which it appeared that the crop would be 538 million bushels, we pointed out that the reports of the State bureaus indicated an even larger product than this, and drew from that fact the conclusion that a total of full 600 million bushels was in prospect. The Department now estimates the crop at 612 million bushels. As compared with the 400 million bushels for 1890, this would be an increase of 212 million bushels, or full 50 per cent, but there is every reason to think that the 1890 crop was underestimated. Even as compared with the large crop of 1889, however, which was estimated at 490 million bushels, there is an increase of as much as 121 million bushels. The very best crop previous to 1891 was that of 1884, when the production was 512 million bushels. As compared with that year, therefore, the increase is just about 100 million bushels. In other words, the 1891 aggregate is a hundred million bushels larger than ever before. The following table will show the production of corn, wheat and oats for each of the last five years:

Total Production.	1891.	1890.	1889.	1888.	1887.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
Corn .....	2,060,174,000	1,439,970,000	2,112,892,000	1,987,790,000	1,458,161,000
Wheat .....	611,750,000	399,262,000	490,580,000	415,868,000	456,329,000
Oats .....	738,394,000	523,621,000	751,515,000	701,735,000	659,618,000
Total .....	3,410,328,000	2,412,853,000	3,354,987,000	3,105,393,000	2,573,108,000

This statement plainly demonstrates that in no other year has the aggregate of these three cereals been so large as for 1891. As pointed out on previous occasions, moreover, there is a further favoring circumstance aside from the large production, namely the good prices prevailing. No deductions are possible from a comparison of aggregate farm values in a year of plenty with those in a year when the yield was poor. Short crops are usually attended by high prices, and hence it frequently happens that the aggregate value of such crops is figured out larger than the value of very bountiful crops. But that indicates nothing. If a farmer has no surplus corn, but only enough to feed to his stock, he manifestly derives no benefit from the fact that the little supply which he holds on his farm, and needs, is valued some 20 or 25 cents a bushel more than in ordinary times. More reliable results are obtained by comparing years of like conditions as regards yield and production.

We may contrast 1891 and 1889, for instance, to show how favorable is the situation now prevailing. In 1889, as already said, the crops were very large, the same as in the late year, but unfortunately prices were extraordinarily low, so that the farming industry experienced depression even in the midst of plenty. Not so at the present moment. According to the Agricultural Department the average farm value of the bushel of wheat for 1891 is nearly 84 cents (83-93), whereas on the 1889 crop it was less than 70 cents (69-8). So in the case of corn and oats. The average for the former now is 40-6 cents, while two years ago it was only 28-3 cents per bushel, and the average on oats is 31-46 cents against only 22-9 cents. On this basis the value of the wheat crop in 1891 is 513 million dollars against 342 million dollars, the value of the corn crop 836 millions against 598 millions, and the value of the oats crop 232 millions against 172 millions. Or taking the three crops together we get a total of 1,582 million dollars for 1891 against only 1,112 million dollars for the large production of 1889. Of course these figures are to be taken simply as showing the great relative difference between the two years, and not as an indication of the amounts of money actually realized by the farmers, which latter could only be obtained through calculations based on the *surplus* remaining out of each of the crops.

Referring now to the production in the different States, the figures as to corn probably have the most interest since the corn crop is only beginning to move now. We have accordingly prepared the following to show the yield for the last four years in each of the principal producing States.

Corn.	Production 1891.	Production 1890.	Production 1889.	Production 1888.
	Bushels.	Bushels.	Bushels.	Bushels.
Iowa.....	350,578,000	232,439,000	349,966,000	278,232,000
Illinois.....	234,850,000	187,440,000	250,125,000	278,000,000
Kansas.....	141,893,000	55,269,000	240,508,000	158,186,000
Missouri.....	203,210,000	175,345,000	218,841,000	202,588,000
Nebraska.....	167,652,000	55,310,000	149,543,000	144,217,000
Indiana.....	123,622,000	89,025,000	106,056,000	125,478,000
Ohio.....	94,092,000	65,876,000	88,953,000	93,018,000
Texas.....	70,635,000	61,802,000	83,668,000	92,436,000
Tennessee.....	82,552,000	67,292,000	80,831,000	75,665,000
Kentucky.....	82,705,000	63,645,000	75,382,000	81,545,000
Pennsylvania.....	46,527,000	38,043,000	41,225,000	45,414,000
Arkansas.....	42,455,000	33,443,000	42,608,000	41,543,000
Wisconsin.....	29,718,000	33,061,000	28,415,000	32,733,000
Michigan.....	31,133,000	26,590,000	22,737,000	29,025,000
Minnesota.....	21,580,000	21,286,000	21,263,000	29,622,000
Total.....	1,733,628,000	1,308,262,000	1,809,751,000	1,693,757,000
All others.....	336,526,000	281,708,000	303,141,000	259,033,000
Total United States.....	2,060,154,000	1,589,970,000	2,112,892,000	1,952,790,000

It will be observed that in some cases the 1891 production is not quite as large as in 1889, but with the exception of one of the smaller producing States it is in

all cases decidedly larger than for 1890. Iowa leads all others with a total of 350 million bushels, which compares with only 232 million bushels in 1890. In Nebraska the total is 167 millions against 55 millions; in Missouri 203 millions against 175 millions; and in Kansas 141 millions against 55 millions. In the Middle Western States Illinois shows 234 millions against 187 millions; Indiana 123 millions against 89 millions; and Ohio 94 millions against 65 millions. A feature of some interest is the large totals to which some of the Southern States are attaining, Texas being given a production of 70 million bushels, Kentucky 82 millions and Tennessee 82 millions.

#### CLEARINGS AND SPECULATION.

In interpreting the annual statistics of bank clearings, which we present to-day with our customary detail, it should be remembered that two main circumstances always control the results, namely the condition of the country's trade and industries and the relative volume of dealings on our Stock Exchange. Neither circumstance in the late year operated to swell the bank transactions as compared with the year preceding, but operated in the opposite direction—taking the country and year as a whole—and hence the aggregate of the clearings is found to be below that for 1891, as indeed our figures from month to month had made evident would be the case.

We need not rehearse here the facts as to the depression and quietude of trade, which were the ruling features during 1891. Suffice it to say that some of the adverse influences continued in operation to the very end of the year, though our enormous crops and the freedom with which they were being marketed began to exert a telling effect before the year's close in the sections nearest to the agricultural districts. As for the dealings on our Stock Exchange, which have to be settled through the banks, the Exchange having no independent method of clearing its transactions, the aggregate for 1891 does not appear quite to have approached that for 1890, though there were during the twelve months one or two marked spurts of activity. On the Produce Exchange the year was one of very heavy business, but the effect in that case on clearings is comparatively unimportant, since the Produce Exchange clears its own transactions.

In brief the clearings for 1891 foot up 56,636 million dollars, as against 60,829 millions for 1890. The falling off is 4,193 millions, or 6.9 per cent. For a year such as 1891 that is certainly not an unencouraging exhibit. It is well to recall that the loss follows a gain of 8.3 per cent in 1890 and of as much as 13.4 per cent in 1889, so that the falling off has been from large totals. In other words, from 49,541 millions in 1888 the clearings rose to 56,175 millions in 1889, and then to 60,829 millions in 1890, falling from this to 56,636 millions in 1891. If we extend the record further back we discover that, barring 1882 and 1881, when the stock dealings here on the New York Stock Exchange were phenomenal, there is no other year when the total was as large as for 1891—that is to say, notwithstanding that the late year was a period of business depression and not especially distinguished for a large stock speculation, the clearings were the heaviest ever recorded excepting only the year preceding and 1881 and 1882. If from the totals we eliminate the clearings arising from stock sales by allowing an average of 2½ checks to each transaction, the result is still more favorable, as will appear from the following table, giving the clearings

for the whole country and for New York separately, both with and without the stock sales, and also the clearings outside of New York, in every year back to 1878.

Year.	NEW YORK CLEARINGS					
	Total Clearings.	Per Ct. Inc. or Dec.	2½ Times Stock Sales.	Per Ct. Inc. or Dec.	Clearings Less 2½ Times Stock Sales.	Per Ct. Inc. or Dec.
1891.....	\$33,749,322,212	-9.9	\$9,530,618,547	-4.2	\$24,218,703,665	-12.0

1884.....	13,214,113,815	-7.6	29,351,234,783	-18.6	41,190,084,783	-14.6
1883.....	14,297,171,924	+2.4	30,079,447,894	-13.4	51,731,472,798	-15.0
1882.....	13,002,240,579	-0.0	41,655,018,020	-3.1	60,878,241,610	-4.0
1881.....	14,094,508,381	+23.9	42,977,923,237	+30.5	63,471,382,214	+27.0
1880.....	11,375,400,000	+22.4	32,942,123,088	+10.9	49,969,848,223	+29.7
1879.....	9,200,800,000	+16.8	28,184,889,904	+25.3	38,526,473,829	+38.5
1878.....	7,955,100,000	-6.2	22,405,597,355	-4.1	27,813,771,307	-6.6

The above is in our usual form, and in no other way could the record of clearings be so plainly and so strikingly brought out. It will be observed that by deducting from the aggregate clearings the stock clearings in the manner mentioned, the amount for 1891 is the largest ever attained, with the single exception of that for the year preceding, which had been in excess of each and every previous total. Such a comparison gives a better idea of the growth and development which has been in progress. It is noteworthy that the New York clearings if treated in the same way—that is, diminished by an allowance for the Stock Exchange business—do not appear to the same advantage. In that case the 1891 total is found to have been many times exceeded—in both 1889 and 1890 as well as in 1881 and 1882. The 1891 result is 24,218 millions, whereas for 1890 the clearings were 27,514 millions, for 1889 25,747 millions, for 1882 27,693 millions and for 1881 28,883 millions. But New York is not only the country's financial centre, but the centre of very extensive trade and manufacturing interests, and might be expected to feel business depression in those departments more than the thriving Western communities.

Further interesting deductions appear from a study of the clearings outside of New York. Here the falling off from the unprecedented figures of 1890 is comparatively small—only 483 million dollars—or but little over 2 per cent. It is to be noted, too, that these outside cities in their aggregates are steadily gaining on New York. In 1881 when the New York clearings (stock sales included) were 49,376 millions, the outside cities had an aggregate of only 14,094 millions, the difference in favor of this point thus being 35,282 millions. In 1891, with New York down to 33,749 millions and the outside places up to 22,887 millions, the difference is only 10,862 millions. In 1881 the New York total was 3½ times that of the rest of the country; in 1891 it was not quite 50 per cent larger. This, as said, is on the basis of New York's total clearings—stock sales and all. With the stock sales de-

ducted this city's preponderance is reduced to small proportions—in fact, almost disappears. In 1881 the comparison of the clearings of the outside cities with those at New York, ex the stock transactions, was 14,094 millions against 28,883 millions; in 1891 it was 22,887 millions against 24,218 millions. Of course in some degree the growth at the outside cities follows from the fact that there are now more places having clearing houses than there were a decade ago, but in the main the growth is due to actual industrial expansion and development.

We have said that the falling off from last year in the clearings of the outside cities was small, being only 483 million dollars, or about two per cent. Even this small loss, however, would not exist except for a heavy decrease at a few prominent points in close proximity to New York; the points which we have more particularly in mind are Boston and Philadelphia, the clearings for the one being only 4,754 millions against 5,131 millions, and for the other 3,296 millions against 3,710 millions. There are other points that record a decrease, but with simply these two excluded there would be instead of the falling off quite a respectable increase in the aggregate of the outside cities.

Improved totals are reported by nearly all the prominent Western cities. Chicago, for instance, has a total of 4,457 millions against 4,093 millions in 1890, 3,380 millions in 1889 and smaller totals in the years preceding. At St. Louis the clearings at 1,140 millions for 1891 compare with 1,119 millions in 1890 and 988 millions in 1889. At San Francisco, on the Pacific Coast, we also have continuous gains, the amount for 1891 at 893 millions comparing with 851 millions in 1890 and 843 millions in 1889. The following furnishes a comparison for the last eight years of the clearings at several of the more prominent cities. The trifling falling off at New Orleans is rather noteworthy in view of the low price prevailing for cotton and the effects on Southern trade occasioned by that circumstance.

(000,000s omitted.)	1891.	1890.	1889.	1888.	1887.	1886.	1885.	1884.

Arranged by groups or geographical divisions, New York being always treated by itself, the clearings show a decrease from 1890 in the case of the New England group, the middle group and the Southern group, but an increase in the case of the Middle Western (though not the "other Western") and the Pacific. While this is the general result in each instance, the showing for the different cities under the several groups is by no means uniform. Thus, while the New England group as a whole records a decrease, this result has been chiefly controlled by the heavy loss at Boston. In the Middle group, such prominent points as Philadelphia, Pittsburg, Baltimore and Wilmington have all sustained decreases. In the Pacific group, notwithstanding the depression in the lumber trade and the reaction from the speculative boom in real estate, the only loss is at Seattle; Portland, Tacoma and Los Angeles, as well as San

Francisco, all have increased totals. In the Middle Western group only Milwaukee and Cleveland record losses. In the "other Western" group, however, 6 of the twelve place have decreases. In the Southern group the results are more generally unfavorable than in any other section, 9 of the 13 points assembled under that group being obliged to report diminished totals; such an outcome, however, cannot occasion surprise, seeing that the South has suffered from the low price of cotton, the depression in the iron trade, and other circumstances. Those who wish to compare the clearings for any particular city in the several groups will find our usual detailed statement in its customary place on the page immediately preceding our article on "The Financial Situation." The annexed statement gives the aggregates in thousands of dollars for the various groups for each quarter of the last seven years.

Excepting New York, every group here shows for 1891 larger clearings than in any other year excepting only the preceding, and in the case of the Middle Western and Pacific groups 1891 clearings are the largest without any exception. The Middle Western group, moreover—which embraces such important points as Chicago, Cincinnati, &c.—shows not only the largest clearings for the year but the largest clearings for every

quarter of the year, there having been no falling off in the aggregates of that group in any quarter.

Taking the country as a whole, including New York (stock transactions and all), the clearings fell off in every quarter, but in the last quarter the loss was less than in the others—that is, the result improved towards the close. With New York excluded, there is actually a slight increase in the last quarter, though, as in the other case, the first three quarters all show declines. In both cases the heaviest losses are found in the second quarter (April-June) the period just preceding that when the new winter-wheat crop began to exert its effect. The subjoined summary presents the aggregates of the clearings by months, both with and without New York.

In the last month (December), it will be seen, the improvement had gone so far that there was an increase in the clearings as compared with 1890 both at New York and outside of New York. In September there had also been an increase, but it was not so large as for December, and was followed by a falling off again in October and November. The improvement is due in part to the fact that the comparison is with less favorable results in 1890, in part to the benefits arising from the large crop movement, and in part to a revival of Stock Exchange speculation. The effect of these various circumstances is strikingly shown in the following comparative statement of the December clearings at some of the more prominent cities for a series of years. The only losses are at San Francisco, New Orleans and Philadelphia, while at the other leading points very heavy gains are to be found.

## BANK CLEARINGS FOR DECEMBER AT LEADING CITIES.

As concerns the increase at New York, of course the large transactions on the Stock Exchange have had considerable effect in bringing it about. The stock sales in December were not of exceptional proportions, but at least they were considerably heavier than in December 1890, as will appear from the following, showing

the number and value of the share sales for each month of the last two years.

## SALES OF STOCKS AT THE NEW YORK STOCK EXCHANGE.

Notwithstanding that in some of the months—notably September—stock speculation was quite active, the total of the share sales for 1891 is only 69,031,689 shares against 71,282,885 shares for 1890. As compared with most other years, the falling off is still more marked; in fact, with the exception of 1888 the 1891 total is the smallest back to 1873. As against the 69 million shares dealt in in 1891, the number in 1886 was over 100 millions, in 1882 over 116 millions and in 1881 over 114 millions. Even if we add on the 27,332,929 shares sold on the Consolidated Exchange, the 1891 total is but little over 96 million shares, or 20 million shares below that for the Stock Exchange alone in 1882. The following shows the sales for 17 years past.

## NUMBER AND VALUE OF SHARES SOLD AT NEW YORK STOCK EXCHANGE.

\* The shares of stocks we take from the record kept by the *Journal of Commerce* for the years 1875 to 1884, inclusive; since 1885 the totals are our own compilation.

† The values of sales for the years 1875 to 1882, inclusive, are the figures made up by *The Public*. The totals for the remaining years are our own.

With reference to the dealings in grain on our Produce Exchange, the business of the year, as already said, was heavy. Counting flour at its equivalent in wheat, the sales in 1891 reached altogether 2,231 million bushels, against 1,821 million bushels in 1890 and 1,481 millions in 1889. The 1891 total was exceeded only in 1883, when the transactions reached 2,417 million bushels. We furnish below a record of the yearly sales since 1880.

### INDIA'S TRADE AND SILVER SPECULATION.

The following is an extract from a private letter just received from the head of one of the largest English firms in India. This writer expresses the views which are held by every merchant dealing with silver countries, such as India, China and Japan. What all want is a steady rate of exchange, whether it is on a high level or on a low level. The fluctuations of the past eighteen months in silver have caused severe losses and untold trouble.

We would ask special notice to that portion of this letter which has reference to wheat exports from India. What is there said is fully in accord with our own opinion, often expressed in these columns. The opposite view, contained in essays and speeches by those favoring silver legislation, has been distributed throughout the land for years past, and no error has been more serviceable than that in cultivating unsound currency views among our agricultural classes. But we think the experience left as one of the legacies of the silver speculation has made the people a little less credulous and the idea at least a trifle less popular.

We subjoin the extract from the letter referred to.

"What we are afraid of, and sometimes nervous about, is some new spasmodic effort on the part of the silver men which might for a time seem to have sufficient appearance of vitality to again upset the trade of the East. Things have settled down again, and all we want is peace and quietness. A low exchange does not mean bad trade nor diminished trade; so long as it remains comparatively steady it does not matter much whether it is high or low. India, for instance, exports some 75 millions sterling value of produce and imports some 55 millions sterling value of merchandise. Some 14 millions sterling are required to pay for the interest on the Government loans (imperial and industrial), for army and navy services, for pensions, &c., &c., so that there is a balance of some 6 millions (perhaps 8 millions or even 10) in favor of India. This goes in the shape of gold and silver bullion, and what is not taken in the former goes in the latter shape, for neither India, China nor any Eastern country interchanges securities (except rupee paper), as is the case between America and Europe. Therefore it follows that whether exchange is on the basis of 40d., 50d. or 60d. for silver, India can take some 6 millions sterling worth of silver; at 40d. she gets 50 per cent more weight of silver than at 60d., and so on.

"I think some of your silver economists imagine that if silver were at 60d. and exchange at 1s. 11d. per rupee, India would cease to compete with wheat shipments. I have

always regarded this as a delusion. India will grow just as much wheat at one price in rupees as at the other. If the grower only gets ten shillings in rupees where he got fifteen shillings in rupees he would find that these ten shillings in rupees would go almost as far, for everything he requires from abroad would be cheapened (i. e. in rupees) in the same proportion; and this everything does not include only imports in the sense of merchandise, but the service of Europeans, the interest on loans, the cost of machinery, the services of the army, the munitions, clothes, commissariat, &c., &c. It is during the period of adjustment that the great mischief to trade is done. If exchange goes up suddenly a great stimulus is given to imports, and the reverse to exports; if it goes down the consequences are the opposite; and in either case the equilibrium of trade for the time is upset, and while individuals may prosper or suffer, the country as a whole only does the latter until there is another period of steadiness and trade again settles down to its normal conditions."

### COTTON CONSUMPTION AND OVERLAND MOVEMENT TO JANUARY 1.

The statements of overland movement, receipts, &c., which are presented below cover the first four months of the cotton crop season, and differ but very slightly from the results as given in our weekly overland statement in the last issue of the CHRONICLE. There has come into sight during December 1,622,475 bales, bringing the total amount of the current crop visible at the close of the month up to 6,403,492 bales, an aggregate 558,249 bales greater than at the same date in 1890. Northern spinners have taken a little less cotton than in December of 1890, but their takings for the four months exhibit a gain over a year ago of 136,190 bales.

#### OVERLAND MOVEMENT TO JANUARY 1.

Although the marketing of cotton by rail continues very free, the gross shipments during the month have been somewhat less than in the like interval of either of the two preceding years, reaching 290,664 bales, against 337,075 bales and 326,274 bales respectively. The aggregate for the period from September 1 to December 31 is however very much in excess of former years, as a glance at the accompanying table proves. The net for December also falls below that for 1890 or 1889, being 195,280 bales, which compares with 227,166 bales last year and 226,993 bales two years ago. For the season to date the net is 115,842 bales greater than a year ago, and contrasted with 1889 the gain is much heavier.

#### OVERLAND FROM SEPTEMBER 1 TO JANUARY 1.

<b>Leaving total net overland*.....</b>	<b>754,139</b>	<b>638,297</b>	<b>555,851</b>

\* This total includes shipments to Canada by rail, which since September 1 in 1891 amounted to 32,816 bales, in 1890 were 30,519 bales and in 1889 were 25,702 bales.

#### RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

The movement of cotton through the ports has been rapid the past month, but of course less than for Oct.

ober or November. Furthermore the receipts have been greater than in December of either 1890 or 1889, the gain in the first instance being 20,081 bales, while the increase over 1889 is 98,216 bales. The total for the four months is 363,356 bales ahead of last year, and shows an excess of 539,786 bales over two years ago. Foreign exports also have been very liberal, reaching 967,173 bales, which, although not so large as in November, are much ahead of December 1890 or 1889, when the shipments were 875,920 bales and 862,001 bales respectively. The aggregate for the season to date is therefore now in excess of the like period in any former year. Notwithstanding the heavy outward movement and free takings on the part of home spinners' stocks at the ports have increased 103,842 bales since December 1 and are now 427,766 bales greater than a year ago. Our usual table of receipts, exports, &c., is as follows:

Movement from Sept. 1 1891 to Jan. 1 1892.	Receipts since Sept. 1 1891.		EXPORTS SINCE SEPT. 1 1891, TO—				Stocks Jan. 1 1892.

\* Great Britain exports include to the Channel.

Using the facts disclosed by the foregoing statement, we shall find that the portion of the crop which has reached a market through the outports and overland, and the Southern consumption since September 1, this year and the two previous years, is as follows:

	1891.	1890.	1889.
Receipts at the ports to Jan. 1.....bales.	4,801,302	4,437,946	4,261,516
Net shipments overland during same time	754,139	638,297	555,851
<b>Total receipts.....bales.</b>	<b>5,555,441</b>	<b>5,076,243</b>	<b>4,817,367</b>
Southern consumption since September 1	259,000	240,000	228,000
<b>Total to Jan. 1.....bales.</b>	<b>5,814,441</b>	<b>5,316,243</b>	<b>5,045,367</b>

The amount of cotton marketed since September 1 in 1891 is thus seen to be 498,198 bales more than in 1890 and 769,074 bales greater than in 1889. To determine the portion which has gone into the hands of Northern spinners during the same period we have prepared the following:

Total receipts to January 1 1892 as above.....bales.	5,814,441
Stock on hand commencement of year (Sept. 1 1891) —	142,160
At Northern ports.....	86,524
At Southern ports.....	228,654
At Northern interior markets.....	2,768
Total supply to January 1 1892.....	6,045,693
Of this supply there has been exported to foreign ports since Sept. 1 1891.....bales.	3,105,256
Less foreign cotton included.....	4,697
Sent to Canada direct from West.....	32,846
Burnt North and South.....	276
Stock on hand end of month (Jan. 1 1892) —	.....
At Northern ports.....	380,997
At Southern ports.....	964,094
At Northern interior markets.....	10,050
Total takings by spinners since Sept. 1 1891.....	1,557,071
Taken by Southern spinners.....	259,000
Taken by Northern spinners since Sept. 1 1891.....bales.	1,298,071
Taken by Northern spinners same time in 1890.....	1,161,881
Increase in takings by Northern spinners this year.....bales.	136,190

The above indicates that Northern spinners had up to January 1 taken 1,298,071 bales, an increase over the corresponding period of 1890 of 136,190 bales and an increase over 1889 of 257,745 bales.

## AMOUNT OF CROPS IN SIGHT.

	1891.	1890.	1889.
Total marketed, as above.....bales.	5,814,441	5,316,243	5,045,367
Interior stocks in excess of Sept. 1.	589,051	529,000	436,000
<b>Total in sight.....bales.</b>	<b>6,403,492</b>	<b>5,845,243</b>	<b>5,481,367</b>

This indicates that the movement up to January 1 of the present year is 558,249 bales more than in 1890 and 922,125 bales greater than in 1889.

As it will interest the reader to see what has come into sight each month of the season during this and previous years, we have prepared the following.

Months.	1891.	1890.	1889.	1888.
September.....	826,932	860,274	655,770	430,269
October.....	2,026,205	1,723,759	1,623,948	1,502,289
November.....	1,927,880	1,615,981	1,633,028	1,512,609
December.....	1,622,475	1,645,229	1,568,921	1,540,816
<b>Total 4 months.....</b>	<b>6,403,492</b>	<b>5,845,243</b>	<b>5,481,367</b>	<b>4,985,923</b>

## WEIGHT OF BALES.

To furnish a more exact measure of the receipts up to Jan. 1 we give below our usual table of weight of bales.

	Four months ending Jan. 1 1892.			Same period in 1890.	Same period in 1889.
	Number of Bales.	Weight in Pounds.	Average Weight.		
Texas.....	872,117	456,623,019	523.58	530.60	525.23
Louisiana.....	1,537,681	782,536,008	495.90	501.00	496.40
Alabama.....	192,764	96,189,236	499.00	514.00	498.00
Georgia.....	914,840	415,106,254	456.54	499.83	489.23
South Carolina.....	379,816	186,417,491	490.81	497.37	486.50
Virginia.....	608,586	300,787,545	491.24	487.93	488.10
North Carolina.....	135,934	67,479,340	496.23	498.65	498.05
Tennessee, &c. ....	1,172,653	591,131,377	501.10	509.00	500.00
<b>Total.....</b>	<b>5,814,441</b>	<b>2,908,273,270</b>	<b>499.84</b>	<b>505.15</b>	<b>498.14</b>

\* Including Florida.

## DRY GOODS TRADE IN DECEMBER.

Business during the first half of the month was of very moderate extent, buyers mostly holding off in expectation of lower prices being made in leading makes of various cotton goods. The expected decline was inaugurated by a reduction of  $\frac{1}{4}$ ¢ in Lonsdale and Fruit of the Loom bleached shirtings on the 16th of the month, this action being speedily followed by a general reduction of bleached goods varying from  $\frac{1}{4}$ ¢ to  $\frac{1}{2}$ ¢ per yard. The demand was stimulated, and a good business ensued, some of the leading brands being marked up again slightly before the end of the month. Brown sheetings in most instances moved quietly, with prices tending in favor of buyers. Colored cottons were well held, the production of these being on a moderate scale. New spring prints sold readily, opening nominally at the previous season's price of 6¢ for standard fancies, but with somewhat more liberal discounts.

## RETROSPECT OF 1891.

At the opening of the year 1891 the financial markets of the world were recovering from the shock produced by the embarrassment of Baring Bros. & Co. in the November preceeding. The Bank of England rate still remained as high as 5 per cent, and the feeling both at home and abroad was sensitive, although decidedly hopeful. Viewing the year as a whole, so far as business interests were concerned, it was divided quite distinctly into two parts, differing very materially in the sentiment prevailing and to a less extent in the results produced. The first seven months formed a period of depression, low prices and meagre profits. The last five months were marked by a decided hopefulness in tone, extraordinary buoyancy at times in Stock Exchange securities, and a moderate improvement in business towards the close of the year in all parts of the country except the South.

In January Congress was still agitating the silver question and a bill for free coinage even passed the Senate. There was also much doubt as to the working of the silver law of 1890, and until Congress adjourned on March 4th the possibility of further silver legislation yet threw its shadow of uncertainty over the business community. The cereal crops in 1890 had been a partial failure and our export of breadstuffs in the first half of 1891 was small, while the Western farmers were feeling the scarcity of money. The cotton crop had been large beyond all precedent, but prices were constantly declining as the extent of the yield was unfolded by the large weekly receipts. Imports of merchandise into the country were still heavy, partly stimulated by exceptional circumstances, as for instance the duty on tin plates, which under the McKinley law went into effect July 1, and so greatly forced the imports prior to that date that for the first half of 1891 the amount was \$22,668,170, against only \$10,591,938 in the first half of 1890. There was no demand for American securities from foreign investors, owing partly to the unsettled condition of affairs abroad and partly to the lack of confidence shown in our own markets. Under these conditions large exports of gold began in February and lasted till late in July, when the net total exported amounted to \$72,787,000. Trade and manufacture were dull and prices very low; the production of pig iron, which is usually accepted as one indication of the extent of industrial activity, fell off most remarkably, and for the first half of 1891 the output was only 3,776,556 tons, against 5,107,775 tons in the same time of 1890. There was depression in mercantile business and at the Stock Exchange, and the extreme prices in the downward movement of many stocks were reached in the last few days of July. Business failures in the first six months of 1891 involved liabilities of \$92,416,267, against \$65,319,384 in 1890.

From the first of August there was a radical change in sentiment, based almost entirely on the superb crop prospects in this country, which had never been equaled, and the failure of crops in France and Russia, leading to an immense export demand at high prices. From latest figures obtained the yield of wheat in the United States is estimated at 611,780,000 bushels against 400,000,000 in 1890; corn at 2,060,000,000 bushels, against 1,490,000,000 in 1890; oats at 738,000,000 bushels, against 523,000,000 in 1890; cotton (by brokers' estimates) at 8,000,000 bales or upwards, against 8,655,518 in 1890 and 7,313,726 in 1889, which was

the largest crop on record prior to 1890. The exports of wheat (including flour reduced to wheat) for the last six months of 1891 were about 130,000,000 bushels, against 47,000,000 in 1890, 78,000,000 in 1886, 110,837,978 in 1880, and 115,125,272 in 1879, which were the largest half-year exports on record. The Russian ukase against exports of rye was issued August 10, and that against the export of wheat on November 21.

Gold exports ceased on July 25; the trade balance sharply turned; gold imports began in September, and from that month till the end of December the net importation of gold amounted to over \$35,000,000. The improvement in stocks and bonds began on the first day of August, and from that time until the end of September there was a movement of activity and buoyancy at the Stock Exchange that never met with a serious reaction. In October there was a downward turn, followed by sluggishness and lack of confidence, but in December buoyancy again set in and the year closed with a feeling of great cheerfulness. The doubtful success of the Russian loan of £19,775,000 offered in Paris in October, and the subsequent condition of financial affairs in Continental cities, including the failure of bankers in Berlin, kept the foreign markets quite unsettled till late in the fall.

Manufacturing and mercantile interests did not experience the full benefits to arise from the fine crop yield of 1891. While Stock Exchange business was booming general trade was dull except in the immense receipts and exports of wheat, and goods were selling at very low prices. Money was not yet distributed from the sale of grain in the West, and the whole South, as well as all cotton interests, were suffering during the Fall under the steadily declining prices of cotton, which were forced by the eagerness in pushing the crop to market with a rapidity never before known. The iron trade began to pick up in early summer, and in the latter part of the year more furnaces went in blast and the output was increased under the large demand from railroads and the better trade outlook for 1892. Business failures in the last six months of 1891 aggregated \$97,452,371 in liabilities against \$124,537,580 in 1890, the latter period covering the Baring crisis.

The banking and currency machinery were subject to no great strain during this year. There were outstanding at the close of 1890 a considerable amount of bank clearing house certificates in New York, Boston and Philadelphia which had been issued in the stress of the last two months of that year, but most of these were speedily retired, except small amounts issued to banks that failed. Under the silver law of July, 1890, the purchase of 4,500,000 ounces of silver per month was made by the U. S. Treasury and legal-tender notes payable in coin issued therefor, thus adding each month to the currency in circulation; the coinage of silver dollars under the previous law ceased on July 1, 1891. Of the \$50,869,200 United States 4½ per cent bonds due September 1, 1891, the Secretary of the Treasury prior to September 30 had continued \$25,364,500 of them at 2 per cent interest, and redeemed \$17,987,800 in cash, the balance unpresented remaining to be so redeemed.

Immigration into the United States for eleven months ending with November 30 numbered 562,073 persons against 468,309 in same time of 1890. The sales of public lands in the year ending June 30 were 8,151,939 acres, against 10,621,652 in 1889-90.

Railroad building was not at all active and consisted mainly in the construction of branches and finishing up of lines already projected by the larger companies of sound credit; the total mileage built is estimated at 4,100 miles against 5,700 in 1890.

The production of anthracite coal was very heavy, amounting to about 40,250,000 tons against 35,855,174, and there was no large accumulation of stocks at tide-water at the close of the year. The petroleum product in the old pipe line districts was stated at 34,128,951 bbls., against 29,130,751.

For the purpose of showing at a glance the industrial and financial statistics, which present a sharp comparison of the two years 1891 and 1890, the table below is brought forward.

GENERAL SUMMARY FOR TWO YEARS.

	1890.	1891.
Coin and currency in U. S. Dec. 31. \$	1,712,220,917	1,748,684,894
Bank clearings in United States. . . \$	60,829,090,000	56,636,839,237
Business failures. . . . .	189,836,904	158,863,638
Sales at N. Y. Stock Exchange shares. .	71,282,885	8,031,689
Sales at Consolidated Exchange shares. .		27,331,929

Pig iron produced. (tons of 2,000 lbs.).	10,307,928	est. 9,000,000
Steel rails. Bessemer (tons 2,000 lbs.).	2,091,978	est. 1,250,000
Anthracite coal. . . (tons of 2,240 lbs.).	35,855,174	40,250,000
Petroleum (runs) production. . . bbls.	29,130,751	34,128,951
Immigration into U. S. (11 mos.).	168,300	562,773
Pub. land sales (yr. end June 30) acres.	10,621,652	8,151,939

NOTE.—The sales at the New York Stock Exchange include all shares of stock except bank stocks and all Trusts except petroleum certificates sold in barrels. Sales at the Consolidated Exchange both in the case of railroad stocks and in the case of pipe line certificates represent for 1891 the actual sales as compiled by us from the daily transactions; the sales of petroleum certificates for 1891 cover also Buckeye certificates. Grain and flour at the Produce Exchange include flour reduced to wheat at 4½ bushels per barrel. Cotton sales at the Cotton Exchange do not include "exchanges" of futures. Immigration statistics are given exclusive of immigrants from Canada or Mexico.

The table next below shows what may be called the mercantile conclusions of the year, or the business failures as compared with other years since 1877. There are no statistics to show the profits of private business in any particular year, although dividends show the profits of corporations to a certain extent, but the number and the amounts involved in business failures are accepted as an approximate indication of the prosperity or lack of prosperity in general business operations. The main facts of the year previously commented upon furnish sufficient reasons for the lack of animation and the dragging markets in the first six months. Not only was there scarcity of funds among purchasers and consumers, low prices for goods and meagre profits, but the markets were also under some apprehension of trouble to arise from the large gold exports, which were vaguely connected in the public mind with our silver law and its possible future working. After the turn of the tide on the first of August, and when the Stock Exchange was enjoying its boom of prosperity, there was no great improvement in trade and manufactures, and so far as it concerned the actual distribution of goods at better prices there was comparatively little improvement till the latter part of the year, when the excellent financial outlook for 1892 gave a better tone to everything except cotton interests.

At the several Exchanges the dealings showed quite different results. At the Stock Exchange the chief periods of activity with rising values were early in January, again in April, then in August and September, and finally in the last half of December. The total sales of the year included 69,031,689 shares of

stock (not including bank stocks) against 71,282,885 in 1890, and \$383,715,000 of railroad and miscellaneous bonds against \$401,829,220 in 1890.

At the Produce Exchange there was little of interest early in the year and there were but small crops of 1890 to deal in. But after the prospects of our winter-wheat crop became pretty well ascertained, and the failure of crops in Europe became known, there was a lively business in wheat futures. Very high prices for wheat futures were reached after the tenth of August, when the Russian ukase was issued forbidding exports of rye from that country, and although prices afterward fell off materially under the enormous receipts of spring wheat in the Northwest, business was active throughout the year. Sales of wheat (cash and futures) amounted to 1,693,353,000 bushels, against 1,238,425,000 in 1890; sales of corn, 403,011,000 bushels, against 431,126,000 in 1890.

The Cotton Exchange had a most active year. The crop of 1890 turned out to be 8,655,518 bales, or 1,311,792 bales larger than the biggest previous crop, that of 1889, which was 7,313,726 bales. The crop of 1891 was hurried to market very rapidly, forcing prices down and stimulating active speculative operations by bulls and bears. The price of cotton declined to the lowest point known in forty-three years, the downward move ending in a break of about 30 points in futures in the last week of the year. Total sales of futures at the N. Y. Cotton Exchange amounted to 26,692,300 bales, against 23,926,500 in 1890.

There were 25 banks with capital of \$3,662,000 that failed in the twelve months ending Oct. 31, these including the banks in Philadelphia, but not the Maverick in Boston. Of these there were 13 banks with a capital of \$1,137,000 in Kansas and Nebraska, whose failure Comptroller Lacey attributes to the successive crop failures.

The other failures of the year included only a few concerns of much prominence. Among these was the firm of S. V. White & Co., whose suspension on September 22nd was caused by a futile effort to corner the price of September corn in Chicago. The Maverick National Bank in Boston closed its doors on Nov. 2, the failure having been caused by private speculations of the President and some of the directors. Field, Lindley, Wiechers & Co., members of the Stock and Produce Exchanges, failed on Nov. 27, their disaster having been precipitated at the last by the extraordinary financial vagaries of the head of the firm, whose transactions have never been unraveled or explained to the public.

The following table shows the failures in each quarter for every year since 1877:

MERCANTILE FAILURES IN THE UNITED STATES.

Years.	1st Quarter.	2d Quarter.	3d Quarter.	4th Quarter.	Total Year.
1878	\$32,078,826	\$48,753,940	\$66,378,363	\$17,172,003	\$264,353,132

1890	37,852,968	27,466,416	35,452,436	89,085,144	199,856,964
1891	42,167,831	50,248,636	41,302,494	53,149,877	186,868,838

On the first of January it is interesting to compare the general situation with previous years, and note the differences which have taken place in the bank figures, the prices of securities, staple articles of merchandise, &c. The following summary shows the condition of

the New York City Clearing-House Banks, rates of foreign exchange and prices of leading securities and articles of merchandise on or about Jan. 2 for three years.

SUMMARY ON OR ABOUT JANUARY 2 IN 1890, 1891 AND 1892.

#### AGRICULTURAL PRODUCTS.

The products of the soil in the United States in 1891 far exceeded in abundance those of any previous year, and never did the results of the harvest have a more decided effect on business interests throughout the country. Winter wheat had an excellent promise from the start, and spring wheat in the Northwestern States gave a yield that was quite unprecedented. There was never any serious injury from drought, and the estimated production of both sorts is about 612,000,000 bushels, against 400,000,000 bushels in 1890 and 512,763,000 in 1884, which was the largest previous yield. The yield of corn is estimated at 2,060,000,000 bushels, against 1,490,000,000 in 1890 and 2,112,892,000 in 1889, the only previous year in which the yield had exceeded two thousand millions. The crop of oats is estimated at 738,000,000, against 523,621,000 in 1890 and 751,515,000 in 1889, the largest previous record. From the Agricultural Bureau latest reports the average yield per acre is figured us as follows: Wheat, 15.3 bushels; oats, 29.9; barley, 25.8; rye, 14.4; corn, 27.0, and potatoes, 93.9 bushels.

The latest report of the Bureau made on Jan. 6, 1892, gave the following summary:

Corn—Area, 76,204,515 acres; product, 2,060,154,000 bushels; value, \$836,439,228.

Wheat—Area, 39,916,897 acres; product, 611,780,000 bushels; value, \$513,472,711.

Oats—Area, 25,581,861 acres; product, 738,394,000 bushels; value, \$232,312,267.

"The aggregate of all cereals is the largest yet produced, and will supply 54 to 55 bushels per unit of population. The wheat supply is the largest ever reported in proportion to population, averaging 9.4 bushels to each person, against 9.2 for the largest previous crop, in 1884."

#### CROPS OF WHEAT, CORN, OATS AND COTTON SINCE 1877.

Year.	Wheat.	Corn.	Oats.	Cotton.
	Bush.	Bush.	Bush.	Bals.
1877.....	364,194,146	1,342,558,000	406,394,000	4,311,265
1878.....	420,122,400	1,384,218,750	413,578,560	5,073,331
1879 (Census).....	459,483,137	1,754,591,676	407,558,999	5,757,397
1880.....	498,549,864	1,717,434,343	417,885,380	6,548,329
1881.....	383,280,093	1,194,916,000	416,481,000	5,435,845
1882.....	504,185,470	1,617,025,100	488,250,610	6,992,334
1883.....	421,086,160	1,551,066,893	571,302,400	5,714,032
1884.....	512,763,000	1,793,528,000	583,628,000	5,669,021
1885.....	357,112,000	1,936,176,000	629,409,000	6,550,215
1886.....	457,218,000	1,635,441,000	624,134,000	6,513,623
1887.....	456,329,000	1,456,161,000	639,618,000	7,017,707
1888.....	415,868,000	1,987,790,000	701,735,000	6,933,082
1889.....	490,560,000	2,112,892,000	751,515,000	7,313,726
1890.....	399,262,000	1,489,970,000	523,621,000	8,055,518
1891.....	611,780,000	2,060,154,000	738,394,000	.....

Most fortunately for our farmers the heavy yield of crops was not accompanied by low prices in the market, as is too often the case, but the partial failure of the wheat crop in France and the failure of rye in Russia, with the ukases prohibiting first the exports of rye and subsequently the exports

of other grains, including wheat, caused a very large export demand from Europe, which sustained prices remarkably in this country.

With cotton planters the case was very different. The immense crop of 1890 had depressed prices to very low figures, and all who had held cotton during the year lost money. The crop of 1891 was believed to be much less than that of 1890, but owing to the losses of planters and their money requirements it was rushed to market with a rapidity never before known, and the crop "in sight" up to Jan. 1, 1892, was 6,400,051 bales, or 508,260 bales more than in the great crop year 1890-91. This depressed prices very seriously, and late in December middling uplands sold at 7 1/4 cents and January cotton as low as 7.34 cents. As to prices of products received on farms and plantations, the Agricultural Bureau report gave the following estimates compared with previous years:

#### AVERAGE PRICES RECEIVED BY FARMERS AND PLANTERS.

	1889.	1890.	1891.
	Cents.	Cents.	Cents.
Wheat, per bushel.....	69.8	83.8	83.9
Rye, per bushel.....	45.7	62.9	77.4
Oats, per bushel.....	23.0	42.4	31.5
Barley, per bushel.....	42.7	64.8	54.0
Corn, per bushel.....	28.3	50.6	40.6
Cotton, per pound.....	8.6	8.6	7.3

Taking the values in New York City about the 1st of January following the crop, we find that if the whole of each crop could have been laid down in New York at that date the values would have been approximately as follows:

#### ESTIMATE OF CROP VALUES IN NEW YORK ON JANUARY 1.

	Crop of 1891.			Crop of 1890.		
	Yield.	Price, Jan. '92.	Value of Crop.	Yield.	Price Jan. '91.	Value of Crop.
Wheat, bush.....	611,780,000	106 1/4 cts.	\$ 653,075,150	399,262,000	105 1/4 cts.	\$ 423,219,565
Corn.....bush.	2,060,154,000	52 1/4 cts.	1,078,430,465	1,489,970,000	59 1/4 cts.	882,507,225
Cotton, bales.....	.....	.....	325,900,000	5,855,515	9 5-10	402,596,004
Total values.....	.....	.....	\$ 2,054,505,615	.....	.....	\$ 1,707,922,794

Exports of the year were immense. During the first six months the exports of breadstuffs were small, owing to the limited surplus of 1890. But with the incoming of new winter wheat in July and the sharp demand from abroad a great movement began, and in the six months from July 1 to Dec. 31 the exports of wheat from the United States (including flour reduced to wheat) amounted to about 130,500,000 bushels, against 47,102,039 bushels for the same time in 1890 and 78,022,111 bushels in 1886, which was the heaviest since 1880. Cotton exports were heavy throughout, the exports for the crop year, 12 months ending August 31, 1891, being 5,790,634 bales, against 4,916,847 the previous year, and for the four months of the new crop year (Sept. 1 to Dec. 31) 3,104,471 bales, against 3,078,521 in 1890.

#### EXPORTS OF FLOUR, WHEAT, CORN AND COTTON SINCE 1880.

Year ended June 30	Wheat Flour. Barrels.	Wheat. Bushels.	Corn. Bushels.	Cotton Bales.
1881.....	7,945,786	150,565,477	91,908,175	4,549,743
1882.....	5,915,686	95,271,802	43,184,915	3,694,706
1883.....	9,205,664	106,385,828	40,586,825	4,626,808

1891.....	11,344,304	55,131,948	30,768,213	5,820,779

#### UNITED STATES PUBLIC LANDS.

The sales of public lands have been diminishing for some years, probably owing to the fact that much of the best land has been taken up, and also because the sales a few years ago were too large to be kept up, and the profits of agriculture have not been sufficient to encourage continued purchases on the same scale. The States which just now are showing larger totals than any others are those on the Pacific Coast. Thus in California the disposals in the last year ending June 30, 1891, were 797,558 acres, in Oregon 723,343 acres and in Washington 909,056 acres, giving these three States 2,434,957 out of a total of 8,151,939 acres for all the States and Territories, or 30 per cent of the whole. In the case of both Washington and Oregon the disposals are the largest in all recent years.

There are no U. S. public lands in Texas, but as to other States and Territories the table following will show how the sales have been distributed in different localities for a series of years past:

DISPOSALS OF PUBLIC LANDS FOR CASH AND UNDER THE HOMESTEAD

## MANUFACTURES, IRON, COAL, PETROLEUM.

Cotton manufactures for the year ending with August, as reviewed in the CHRONICLE's annual cotton crop report, showed an estimated consumption of raw cotton, North and South, amounting to 2,530,916 bales, against 2,349,478 in 1889-90. The trade was depressed, however, by the constantly declining price of cotton under large receipts, and profits were unsatisfactory. The course of business in print cloths at Fall River may be taken to some extent as indicating results in general, and the production there in the calendar year 1891 was 9,985,000 pieces, against 9,937,000 in 1890; sales, 8,898,000 pieces, against 8,384,000 in 1890; stock at the end of the year 90,000 pieces, against 588,000 in 1890. Prices were lower in 1891 than ever before, 64x64s touching 2½ cents, and the year's average being 2-95c., against 3-34c. in 1890. Thirty-three manufacturing companies in Fall River, with capital of \$18,653,000, paid dividends averaging 4-81 per cent in 1891, against 7-62 per cent in 1890 and 9-97 per cent in 1889, which was their maximum year.

The trade in wool and woollen goods was very fair, and better upon the whole, than in the year or two preceding. Among other things considered favorable for the trade was the discontinuance of the heavy auction sales of flannels in New York. The stock of wool, domestic and foreign, on the Boston market was estimated at 32,942,600 lbs. at the close of 1891, against 27,798,500 lbs. the previous year.

Iron production in the first half of 1891 fell off to a degree quite extraordinary, indicating very clearly the dulness in new industrial enterprises. There was but small demand from railroads or for structural purposes, and the output of pig iron from January to July was only 3,776,556 tons, against 5,107,775 in the first half of 1890; but stocks in the meantime were considerably depleted. In the last six months the trade improved under the stimulus of the large crops and the better financial outlook, and in the late months of the year the de-

mand from car manufacturers was quite a feature. From the furnaces reported in blast the estimated weekly output, which ran down to 113,433 tons about April 1, had risen to 171,115 by July 1 and to 183,135 on December 1, against 183,846 at the same time in 1890. No close estimate of the year's production can yet be made.

## IRON AND STEEL PRODUCT SINCE 1879.

Years.	Pig Iron. Tons of 2,000 lbs.	Bessemer Steel Ingots. Tons of 2,000 lbs.	Bessemer Steel Rails. Tons of 2,000 lbs.
1880.....	4,295,414	1,203,173	954,460
1881.....	4,641,564	1,539,157	1,330,302
1882.....	5,178,122	1,696,450	1,438,155
1883.....	5,146,972	1,654,627	1,266,554
1884.....	4,589,613	1,540,595	1,116,621
1885.....	4,529,469	1,701,762	1,074,607
1886.....	6,365,328	2,541,493	1,763,667
1887.....	7,187,206	3,288,357	2,354,132
1888.....	7,268,507	2,812,500	1,552,631
1889.....	8,516,079	3,241,829	1,691,264
1890.....	10,307,028	4,131,535	2,091,378
1891 (est'm't'd)	9,000,000	(i)	1,250,000

Anthracite coal production ran ahead of any former year and the total output sent to market was about 40,250,000 tons, against 35,853,174 in 1890 and 33,145,718 in the maximum year 1888. Consumption was also heavy and there was no great accumulation of stocks at tide-water, the total on Nov. 30 being 637,846 tons, against 535,652 at the close of 1890.

There are no official statistics of the annual production of bituminous coal in the United States, and only in the decennial census periods can we obtain data that are presumably correct. The returns for the U. S. Census of 1890 are for the year 1889, and were published recently in a Census Bulletin containing the report of Mr. John H. Jones, special agent in charge of this department. It shows that the coal product of the United States, both anthracite and bituminous, reached a total of 141,229,513 net tons in the year mentioned, and was valued at the mines before any expenses were incurred for shipment at \$160,226,323. The total product included 45,600,487 net tons of Pennsylvania and other anthracite, worth \$65,879,514, and 95,629,026 net tons of bituminous and lignite, valued at \$94,346,809. The average value for all salable grades of anthracite was \$1 58 per ton at the mines, and the average value of bituminous coal was 99 cents per ton at the mines. In the previous Census year, 1880, the total product included 28,649,812 net tons of anthracite and 42,831,758 net tons of bituminous coal. The value of the entire product was \$95,640,396. The coal product increased 97-57 per cent during the decade, and the total value increased 67-53 per cent. The total number of persons engaged in the coal industry in 1889 was 229,559, who received in the aggregate \$109,130,928 as wages.

The following table shows the production of bituminous coal by States and Territories in 1889.

## PRODUCT OF BITUMINOUS COAL IN 1889.

States and Territories.	Total prod- uct. Net tons.	price at mines. per ton.	States and Territories.	Total prod- uct. Net tons.	price at mines. per ton.

The petroleum product was heavy. The runs of Buckeye oil in 1891 were 14,476,294 bbls.; deliveries, 13,130,788 bbls.; stocks Jan. 1, 1891, 20,971,395 bbls. and Dec. 31, 22,116,872 bbls.

The old Pipe Line runs and deliveries in each calendar year since 1880 and stocks at the close of the year and the exports for the fiscal years ending June 30 have been as follows:

## PETROLEUM RUNS, DELIVERIES, STOCKS AND EXPORTS SINCE 1880.

\* Including all mineral oils, both crude and refined, but not including residuum and tar.

## RAILROAD CONSTRUCTION AND EARNINGS.

The increase in railroad mileage in 1891 was very moderate. There was little demand for new railroad bonds and even the old and well established companies had difficulty in floating their loans. Nor did this situation greatly improve even after the advance of August and September had taken place in Stock Exchange securities, as new bonds were still hard to negotiate. Most of the building was done in the construction of branch roads or in completing lines already undertaken, and few new roads were projected. The aggressive action of legislatures and railroad commissioners in some States in reducing freight rates beyond a reasonable point had the effect of checking railroad building. In Iowa only 28 miles were built and in the great State of Texas only 153 miles. The total for the whole country was about 4,100 miles, against 5,700 miles in 1890, nearly the same in 1889, about 7,000 miles in 1888 and 13,000 miles in 1887.

Railroad gross earnings were well maintained in the first half of 1891, notwithstanding the small tonnage from the cereal crops of 1890, the decline in iron product, &c. The natural expansion of general business and increase in merchandise tonnage, together with the extraordinary cotton freights from the crop of 1890, helped to keep up gross earnings in the first half of the year, although the grain-carrying roads generally had small profits. In the last half of the year the situation changed entirely, and under the large grain freights the wheat-carrying roads were the most prosperous in the country, and showed in their monthly reports a heavy increase over the preceding year. One hundred and forty-one railroads for 11 months of 1891, Jan. 1 to Nov. 30 (the latest yet reported) had gross earnings of \$486,913,273, against \$457,748,671 in the corresponding period of 1890.

## FOREIGN COMMERCE.

It is seldom that the movements of specie and merchandise between the United States and foreign countries have so direct an influence on current business transactions as they had in 1891. The outward movement of gold from January to July inclusive, amounting to \$72,787,000 net, overshadowed all other events and had a depressing effect not only at the Stock Exchange but also on mercantile business. During this period the imports of merchandise slightly exceeded exports, such excess for the first six months amounting to \$13,261,000.

There were some special causes for the large imports, especially in the case of tin plates, as the new tariff of 2 2/10 cents per lb. under the McKinley law went into effect on July 1; and the total imports of tin plates, &c., in the first six months of the year were valued at \$22,668,170, against \$10,591,933 in the same time of 1890. In the last half of the year all was changed. The great export of wheat began in July, gold exports ceased in that month, and the return movement of foreign gold commenced with the first arrival in New York on Sept. 12 and kept up throughout the year, the approximate net imports of the four months September-December being over \$35,000,000. The exports of domestic products far exceeded any previous period, the maximum of any one month being reached in November, when the total value of merchandise exports reached \$110,100,000. For the three months Sept. 1 to Nov. 30 (latest yet reported) the total value of merchandise exports exceeded imports by \$102,942,000, against an excess of \$43,302,000 in the same time in 1890.

\* Excess of imports.

† Excess of exports.

## CITY BANK MOVEMENTS.

The condition of our city banks was in strong contrast to that of 1890, when the banks were in distress for money, often below their legal reserve limit, and obliged to issue Clearing House certificates to meet the demands upon them in the autumn crisis. In 1891 the banks' reserves were never below the legal requirement, the lowest point reached being on the 31 of October, when the surplus reserve was \$3,102,750; it was also pulled down sharply to \$3,935,150 on Nov. 7, owing to the drain occasioned by the failure of the Maverick National Bank in Boston. Late in the year money was unusually abundant; the surplus reserve on Dec. 23 was \$19,430,035, the total deposits then (\$155,333,300) being in excess of any former period, the highest point reached in previous years having been \$415,797,500 on July 6, 1889. The Clearing House certificates issued by the New York City banks in the crisis of 1890 reached a maximum outstanding at one time of \$15,235,000 on Dec. 12, and all had been retired by January 30, 1891, except \$40,000 to the failed North River Bank, which were canceled Feb. 7. In Boston the maximum out at one time was \$5,065,000 (Dec. 6), and all were retired by January 6. From the Philadelphia Clearing House no direct information has been obtainable, but the Comptroller of the Currency in his report to Congress Dec. 7 said the issue of loan certificates "was commenced on Nov. 19, 1890, and ceased on May 22, 1891, the total issue being \$9,655,000. The maximum issue (\$8,870,000) was reached on January 9. The certificates have all been retired excepting \$170,000 issued to the Keystone and Spring Garden national banks."

## THE MONEY MARKET.

The money market in 1891 was never subject to any severe strain, although there were a few periods of temporary stringency in call loans. The market for time money was sensitive in the late spring and summer while gold exports were so large, although the bank surplus was good and call money easy, but bankers relaxed in their views about time loans by August, when the excellent crop situation began to improve the tone in financial circles. The ease of money in the late months of the year, when stringency usually prevails, was quite notable, and in December call loans generally ranged at 3/4 per cent and prime commercial paper was quoted at 4 1/4 @ 5 1/4.

## FOREIGN EXCHANGE.

The course of foreign exchange was closely identified with that of the trade and gold movement commented upon above. Opening low in January, prices quickly advanced, and for the first eight months of the year high rates prevailed most of the time for sterling bills, as the foreign demand for our securities was lacking and gold exports were large. Rates relaxed in July and August, gradually declined, and ruled low in the later months, and from Sept. 12 the gold imports were continuous during the rest of the year.

## RAILROAD AND MISCELLANEOUS SECURITIES.

The year was one of most interesting characteristics in Stock Exchange dealings. After opening with some animation, following up the recovery from the Baring crisis, which had made good progress late in December, 1890, the activity in securities soon declined, and in the absence of foreign buying our markets became dull. Depression followed, as the exports of gold continued on a large scale, and the railroads were many of them feeling the loss of business arising from the partial failure of grain crops in 1890, and in the early part of March prices generally reached very low figures. The course of affairs in April was influenced by the excellent wheat prospects and the bad condition of crops in France and Russia, and there was a temporary buoyancy in securities with quite an active movement at the Stock Exchange in the

latter part of the month. The buoyancy was short-lived, however, and soon gave way under the effect of the large gold exports, until the market drifted into great depression that culminated in the lowest prices in the last few days of July. There were also active bear attacks on Burlington & Quincy, Rock Island, St. Paul, &c. With the first of August the market sharply turned, and stimulated by the cessation of gold exports, by the heavy outward movement of grain, and the very fine crop prospects, it then entered upon an extraordinary course of activity that lasted with very little intermission for nearly two months and carried up prices of many active stocks and income bonds 10 to 20 per cent. With October came a decided reaction, owing partly to the passing of the Missouri Pacific dividend, the weakness in Richmond Terminal and some other special stocks, and during that month and November and until the middle of December the market was lower, halting in tone and without any general animation. Then the business in bonds became a notable feature, and the year ended with much activity and prices near the highest point.

The following table shows the volume of sales at the New York Stock Exchange for a series of years.

SALES AT THE NEW YORK STOCK EXCHANGE.

	Railroad and Miscellaneous Stocks.	Railroad and Miscellaneous Bonds.	Government Bonds.	State Bonds.

## REVIEW OF THE YEAR BY MONTHS.

JANUARY.—The month of January opened with a continuation of that better feeling which had already been developing for some time as a reaction from the Baring crisis of November. The first of the month came on Thursday and the first bank statement was made on Saturday the 3d, showing a surplus reserve above the legal requirement of \$8,576,875. Rates for money on call ranged as high as 9 per cent in the first two days, but afterward relaxed and ruled comparatively easy during the balance of the month within extreme limits of  $1\frac{1}{2}$  to 6 per cent, with 3 per cent as an average rate in the latter part. Prime commercial paper was quoted at 6  $\frac{1}{2}$  to 7 per cent at first and later at  $5\frac{1}{2}$  to  $6\frac{1}{2}$  per cent. The city banks' surplus reserve stood at \$8,576,875 on January 3, \$13,384,250 on the 10th, \$19,183,825 on the 17th, \$24,089,775 on the 24th and \$23,943,125 on the 31st. The certificates issued to banks by the New York Clearing House, which had reached the maximum of \$15,205,000 outstanding on December 12, were all retired by the 30th of January except \$40,000 to the suspended North River Bank, which were taken in soon afterward. The certificates issued by the Boston Clearing House reached a maximum of \$5,065,000 on December 6, 1890, and were all retired by January 6; those issued by the Philadelphia Clearing House reached a maximum of \$8,870,000 on Jan. 9, but some were still issued as late as May 22, 1891, and all had been retired before December, except \$170,000 to the Keystone and Spring Garden banks, which failed.

Foreign exchange was quite easy at first, and bankers' asking rates were as low as 4  $80\frac{1}{2}$  for demand and 4  $84\frac{1}{2}$  for sixty days sterling. But with the sales of stocks on foreign account, the demand for remittances, and a moderate supply of commercial bills, rates quickly advanced till the middle of the month, when some drawers asked as high as 4  $86\frac{1}{2}$  and 4  $89$ , though at the same time actual business was done at 4  $85\frac{1}{2}$  and 4  $87\frac{1}{2}$ , and did not vary much from these prices during the balance of the month.

The Bank of England discount rate was 5 per cent at the beginning of the year, to which figure it had been reduced on December 3 from 6 per cent, the rate prevailing during the Baring panic; on January 8 the rate was reduced to 4, on the 22d to  $3\frac{1}{2}$  and on the 29th to 3 per cent. The excess of U. S. exports of merchandise over imports for the month was \$20,329,328. Gold imports into the United States in January exceeded exports by \$669,612; the net export of silver was \$299,811; and silver certificates in New York ranged at 104  $\frac{1}{2}$  at the opening, 107  $\frac{1}{2}$  highest, 101  $\frac{1}{2}$  lowest and 102  $\frac{1}{2}$  at the close.

Government securities were dull, and under the Treasury circular of October 9, 1890, offering to purchase 4  $\frac{1}{2}$  per cents at par, with interest to maturity (September 1, 1891), about  $1\frac{1}{2}$  millions were taken in. Railroad bonds were active and strong, with a pretty general advance in the popular low-priced mortgage bonds, and also in some of the incomes. After the Philadelphia & Reading meeting on the 12th it was known that no interest would be paid on the income bonds on February 1. The principal buoyancy was in the first half of the month, and afterwards the demand became less active, though prices were well sustained. The stock market was quite active and buoyant early in the month and many stocks

advanced more or less, making substantial recoveries from the depressed prices of December. Later in the month there was more irregularity, and, with less business, prices varied according to the merits of particular stocks, some declining while others advanced. The grangers were weak towards the close, and Lake Shore and Nickel-Plate were strong in consequence of the declaration of a first dividend of 3  $\frac{1}{2}$  per cent on the first preferred stock of the latter. Sugar Trust advanced from 53  $\frac{1}{2}$  to 85  $\frac{1}{4}$  as the extreme points of the month, on the discharge of the receivers and the reorganization of the Trust as a corporation. The Rock Island and St. Paul roads were in controversy with Union Pacific over the Omaha Bridge contract, but this did not prove a serious drawback. The highest prices of the month were generally reached from the 12th to the 14th. In the latter part of the month business was less active and the market irregular in its movements; the silver discussions in Congress were prejudicial, and the passage of a free-coinage bill in the Senate on the 15th caused some apprehension.

Among the events of the month were the failure of A. E. Bateman & Co., stockbrokers, and the appointment of a receiver for the Atlantic & Danville Railroad; the incorporation of the Mohawk & St. Lawrence Railroad, under New York Central auspices, to build from Utica to the St. Lawrence River to parallel the R. W. & O.; the default on the January coupons of the Pennsylvania Poughkeepsie & Boston Railroad; the lease of the Rutland road again to the Central Vermont for 999 years; the postponing of the payment of the principal of the Cairo & Fulton (St. Louis & Iron Mountain) bonds falling due Jan. 1, and the notice of payment on July 1 as permitted by the mortgage; the dispute between Union Pacific on one side and the St. Paul and Rock Island companies on the other over the contract for use of the Omaha Bridge; the St. Louis Alton & Terre Haute proposal to issue 4 per cent bonds guaranteed by "Big Four" to its preferred stockholders in the proportion of \$150 in bonds for each \$100 of stock; the passing of the dividend on Philadelphia & Reading preferred income bonds; the resumption of Decker, Howell & Co. on January 6 and settlement of their liabilities of about \$12,000,000 in full after less than 60 days suspension from Nov. 11, 1890. The Beech Creek Railroad was taken by New York Central; a decree of sale was made for the Decatur Ches. & N. O. RR.; "The Western Traffic Association" was the name taken by the officers of the Western railroads at their meeting in New York on January 8; the East Tenn. Va. & Ga. executed a new general mortgage for \$15,000,000; a silver bill for free coinage passed the U. S. Senate in the week ending January 16; the Sugar Trust was incorporated in New Jersey as the "American Sugar Refining Co." with \$50,000,000 stock (half of it preferred) and \$10,000,000 debenture bonds; the Chicago Gas dividend was passed; a new management went into the Oregon Improvement Company; the Poughkeepsie Bridge bondholders were asked to fund coupons; the Thurber-Whyland Company was incorporated with \$1,500,000 pref. stock and \$1,500,000 common; the New York Belting & Packing Company, Limited, was incorporated with \$1,063,100 capital and \$1,091,250 mortgage debentures; the Dayton Ft. Wayne & Chicago Railroad was purchased in the interest of the Cincinnati Hamilton & Dayton; the Marietta & North Georgia went into receiver's hands; the Tonawanda & Cuba Road was sold on the 19th; the death of Mr. Windom occurred at a public dinner in New York on the 29th, just after an eloquent speech against the free coinage of silver; a first dividend of 3  $\frac{1}{2}$  per cent was declared on the first preferred stock of the New York Chicago & St. Louis (Nickel-Plate) Railroad; the Baltimore Belt Line Railroad bonds of \$5,000,000 were offered for sale; American Bell Telephone Company increased its stock \$2,500,000, to \$15,000,000; the Mexican Central RR. offered to buy its prior lien bonds at 110, calling in on April 1 all those remaining outstanding.

FEBRUARY.—In February began that outflow of gold which did not end until the latter part of July. The money market was quite easy during February, and on call loans 4  $\frac{1}{2}$  per cent was the highest rate paid, while prime short-date paper was quoted at 5  $\frac{1}{2}$  to 6 per cent. The city banks' surplus was \$20,242,675 on February 7, \$18,492,700 on the 14th, \$15,373,035 on the 21st and \$13,630,275 on the 28th. Foreign exchange was not active in February, but owing to the moderate supply of commercial bills and the absence of foreign purchasers of our securities, actual rates advanced to 4  $86\frac{1}{2}$  and 4  $83\frac{1}{2}$  for long and short sterling about the middle of the month, declining to 4  $85\frac{1}{2}$  and 4  $88$  by the close. The Bank of England rate remained throughout at 3 per cent. The trade movements were—Excess of merchandise exports over imports, \$8,896,748; net export of gold, \$3,444,842; net export of silver, \$646,070. Silver bullion certificates in New York—opening 102  $\frac{1}{4}$ , highest 102  $\frac{1}{2}$ , lowest 96  $\frac{1}{2}$ , closing 97  $\frac{1}{4}$ .

At the Stock Exchange business was dull. Government securities presented no feature of interest and only small amounts were purchased under the circular of October 9. Railroad bonds, on a moderate business, were fairly held, but showed no decided movement one way or the other. The low-priced mortgage bonds and incomes were the most active. Pittsburg & Western 4s were higher on the Balt. & Ohio deal; Louis. New Albany & Chic. consols fluctuated on rumors of a receivership; St. Louis & Iron Mountain 5s were stronger on the payment of the Cairo & Fulton 1st mortgage bonds without waiting till July 1. The stock market presented little animation in February and the volume of dealings was relatively small. There was a halting tone and all parties were waiting for the adjournment of Congress and the

termination of doubt as to silver or other financial legislation. Moderate shipments of gold were made, and this, though not of immediate importance to the money market, was rather against stocks than in their favor; the Chic. Burl. & Quincy Railroad reduced its quarterly dividend to 1 per cent on account of the loss of earnings from the deficiency in the corn crop of 1890, and Atchison declined under bearish attacks, and also from the loss of earnings on small crops. London was more or less unsettled by rumors of trouble with houses engaged in the Argentine business, and was therefore rather a seller than a buyer of our securities. Pacific Mail was strong on the shipping subsidy bill in Congress, and declined on its failure to pass. Susquehanna & Western stocks declined when it was announced that all negotiations for a sale of the property were off.

Among the events of the month the first dividend of  $\frac{1}{8}$  of 1 per cent was declared on Lead Trust shares; the Suburban Rapid Transit lines were absorbed by the Manhattan Elevated; the Oregon Improvement Company offered \$4,000,000 of its consolidated 5s to stockholders at 70; a controlling interest in Pittsburg & Western stock was acquired by the Baltimore & Ohio in exchange for its own shares to be issued later; the Poughkeepsie Bridge defaulted on the coupons due February 1, and bondholders were asked to fund coupons for two years; the \$3,000,000 borrowed by the Bank of England in November was repaid to the Bank of France; the Kentucky Union Railroad went to a receiver; Gen. Sherman's funeral took place on the 19th; the Covington & Macon Railroad was leased to Richmond & Danville; the Ohio Valley was sold to Mr. C. P. Huntington; the American Loan & Trust Company failed; ex-Gov. Foster, of Ohio, was appointed Secretary of the Treasury in place of Mr. Windom, deceased; the Cairo & Fulton (Iron Mountain) 1st mortgage 7s were paid off Feb. 24, instead of waiting till July 1 according to the previous notice.

MARCH.—Money was in good supply this month, and on call loans brokers usually paid from 2 to 4 per cent, the average rate being 3 per cent; prime commercial paper sold at 5 to  $5\frac{1}{4}$  per cent; the New York City banks' surplus was \$10,880,975 on the 7th, \$9,793,575 on the 14th, \$9,055,375 on the 21st and \$8,442,050 on the 28th. Foreign exchange was without special animation, but bills were not in large supply and rates were very firmly held about 4 86 for 60 days sterling and 4 88 $\frac{1}{2}$  for demand, while gold continued to go out in moderate amounts. The Bank of England rate remained at 3 per cent. The imports of merchandise into the United States were very large and exceeded exports by \$2,320,510; the net exports of gold were \$4,541,566, of silver, \$1,021,572. Silver bullion certificates ranged as follows: opening, 93; highest, 99 $\frac{1}{2}$ ; lowest, 97 $\frac{1}{2}$ ; closing, 98 $\frac{1}{4}$ .

Government bonds were steady and small amounts of the 4 $\frac{1}{2}$  per cents were purchased under the call of October 9. Railroad bonds were generally weak and some touched the lowest prices so far in the year; Atchison 4s in the second week touched 75 $\frac{3}{4}$  and incomes 33 $\frac{3}{4}$ . Reading 1st pref. incomes sold down to 47 $\frac{1}{2}$ ; seconds to 32, thirds to 25 $\frac{1}{4}$ , and mortgage 4s to 77 $\frac{1}{2}$ ; Louisville New Albany & Chicago consol. 6s declined to 84, and jumped back to 96 when the reports of the syndicate deal were confirmed. Bonds generally recovered from their lowest prices, but the market was without animation. Stocks were generally depressed and fell off sharply, notwithstanding the adjournment of Congress on the fourth and the removal of apprehension as to further silver legislation. Burlington & Quincy touched 75 $\frac{3}{4}$ , Rock Island 63 $\frac{3}{4}$ , Atchison 24 $\frac{1}{2}$ , Northwestern 102 $\frac{1}{2}$ , St. Paul 51 $\frac{1}{4}$ , Louisville & Nashville 71 $\frac{3}{4}$ , N. Y. & N. England 32 and Reading 23 $\frac{3}{4}$ . But these low prices were generally made in the first ten days of the month and the tone afterwards improved. Rome & Watertown advanced to 135 on the proposed lease to N. Y. Central; the coal stocks declined on the Coxe decision by the Inter-State Railroad Commission against the Lehigh Valley, but quickly recovered; the granger stocks were affected by the maximum-rate bill, which passed the Nebraska Legislature but was vetoed by Governor Boyd. The embarrassment of the "Société des Depôts de Comptes Courant" in Paris early in the month and the unsettled feeling in the foreign markets were prejudicial. In the unlisted department of the Stock Exchange Comstock Tunnel was active, selling up to 40; National Cordage stock advanced with large dealings, and American Cotton Oil was active and higher.

Among the events of the month—Congress adjourned on the 4th; the Mexican Central Railroad called in its priority bonds for payment; the Northern Pacific land decision was made awarding to this company about 500,000 acres of land in litigation with the Manitoba Railroad, of which there remained 239,100 acres unsold and \$1,095,000 cash as proceeds of sales; the Phila. & Reading Terminal bonds of \$3,500,000 were placed with bankers for sale when needed; in Paris the "Société des Depôts de Comptes Courant" became embarrassed, owing to Argentine liabilities, and the Bank of France advanced to it 60,000,000 francs under a joint guarantee by financial houses; the Comstock Tunnel Co. paid two back coupons of 1890 and afterward applied \$39,544 to the purchase of its bonds; the Pacific Mail SS. compensation under the new postal law was estimated to be worth \$500,000 per annum; a Stock Exchange seat sold for \$16,000; the Kentucky Union RR. went into receiver's hands, also the Ga. Southern & Fla. RR. (Macon Construction Co.); the Cent. RR. of Ga. was leased to the Ga. Pacific RR. of the Richmond Terminal system; the Coxe Bros.' complaint against the Lehigh Valley RR. was sustained by the Inter-State Railroad Commission; the Keystone Bank in Philadelphia suspended; a syndicate

was formed to take \$2,800,000 genl. mortg. gold 5ves, with \$1,400,000 stock, of the Louis. N. Albany & Chic. Railroad for \$1,960,000 cash; the R. W. & O. Road leased to N. Y. C. & H. with guaranteed dividends of 5 per cent on the stock, the stock being increased 20 per cent; the San Antonio & Aransas Pass reorganization plan was issued; Pittsburg & West. created a 2d mortg. for \$3,500,000 at 5 per cent, to provide for improvements, &c.; Rio Grande Western offered \$1,250,000 of pref. stock to its stockholders at 65.

APRIL.—The money market was fairly easy in April, and stock borrowers were generally supplied at 3 $\frac{1}{2}$  per cent on call, while prime paper was quoted at 5@6 per cent. The highest rate on call money was 6 per cent till just near the end of the month, when some borrowers paid as high as 9 per cent. The surplus reserves of the city banks were \$8,389,975 on the 4th, \$5,612,950 on the 11th, \$4,319,850 on the 18th and \$6,975,125 on the 25th. Foreign exchange was very firm, opening at 4 86 $\frac{1}{4}$  and 4 88 $\frac{1}{2}$  on actual dealings in long and short bankers' sterling respectively, and closing with a wider difference between long and short bills, about 4 85 $\frac{1}{2}$  and 4 89. The Bank of England rate was 3 per cent till the 16th, when it was advanced to 3 $\frac{1}{2}$  and so remained. Our merchandise imports exceeded exports by \$10,368,130; gold exports were \$13,929,798 net; silver exports, \$1,261,685 net. The range of silver bullion certificates was: opening, 98 $\frac{3}{4}$ ; highest, 99; lowest, 96 $\frac{1}{4}$ ; closing, 98 $\frac{1}{4}$ .

The purchases of 4 $\frac{1}{2}$  per cent bonds under the Treasury circular of Oct. 9 terminated the 25th of April, when the amount taken was about \$15,000,000. At the Stock Exchange railroad bonds were generally strong and tolerably active, with the Atchisons and other income bonds and low-priced mortgage bonds chiefly in favor. The stock market in April showed great strength and activity, and prices in the last half were decidedly buoyant. There was a little check at first owing to the Italian sensation caused by the withdrawal of the Minister from Washington late in March in consequence of the New Orleans massacre. On the 3d Gov. Boyd of Nebraska vetoed the maximum-rate bill in that State, and this was regarded as rather a turning point in legislation against Western railroads, and it gave an impetus to stocks. The Northern Pacific were quite weak in the face of a strong market, in consequence of free selling for German account. St. Paul was prominent for its London support; Chicago Gas was active on the proposal to relinquish its organization, Sugar on the Spreckles talk and Cotton Oil on the better condition of its finances. The crop prospects began to affect the market very favorably, and the tone in the latter part of the month was buoyant in spite of the gold export.

Among the principal events of the month was the export of gold; Governor Boyd vetoed the maximum-rate bill in Nebraska; the offer early in April of \$1,000,000 Denver City Water Works bonds; 70,000 shares (\$35 each) of Blackwell's Durham Tobacco Company, of which the whole stock was \$4,000,000; \$350,000 pref. and \$100,000 common stock of the Conn. Breweries Co., total stock, \$700,000; \$300,000 stock of the North Carolina Steel & Iron Company, total stock, \$1,000,000. The Louisville N. Alb. & Chic. syndicate took \$2,800,000 general mortgage 5 per cent bonds and \$1,400,000 stock; Atchison offered 4 per cent bonds to St. Louis & San Francisco first preferred stockholders at par; the Chicago Gas Company decided to surrender its charter; the Western Traffic Association failed to get a quorum at Chicago; the Pitts. Cin. Chic. & St. Louis declared a first dividend of 1 per cent on its preferred stock; the Third Avenue Horse Railroad voted to issue \$4,000,000 second mortgage bonds to change the road to a cable system; the Hill defalcation was discovered in the Ninth National Bank; Lehigh Valley Railroad bonds for \$4,090,000 on the Buffalo extension were offered; the Alabama Midland interest was not paid; the Chicago Kansas & Nebraska (Rock Island's western lines), Norfolk Southern Road and Texas Central were all sold in foreclosure.

MAY.—The money market was a trifle firmer in May and the average rate paid by borrowers on call was 4 to 4 $\frac{1}{2}$  per cent while the extreme range was from 3 to 7 per cent; prime paper sold at 5@6 per cent. The city banks' surplus on the 2d was \$7,443,300, on the 9th \$4,763,950, on the 16th \$4,912,850, on the 23d \$5,217,650 and on the 30th \$7,529,175. Foreign exchange rates were generally easier than would have been indicated by the large gold exports and on actual transactions were 4 84 for bankers' 60-day sterling and 4 87 $\frac{1}{2}$  for demand, about the 20th, rising to 4 85 and 4 88 $\frac{1}{2}$  at the close. The Bank of England rate was 3 $\frac{1}{2}$  per cent at the beginning of the month and was advanced to 4 on the 7th and to 5 on the 14th, at which it remained. The excess of merchandise imports over exports in May was \$13,931,516; net exports of gold, \$30,368,112; net imports of silver, \$423,594. The price of silver bullion certificates ranged as follows: opening, 98 $\frac{1}{2}$ ; highest, 100; lowest, 96 $\frac{3}{4}$ ; closing, 96 $\frac{1}{4}$ .

In the Stock Exchange markets there was no feature in Government bonds. Railroad bonds were much less active with prices generally lower on the incomes and the cheaper classes of mortgage bonds, and the tendency was all in buyers' favor. Richmond Terminal 5ves were among the weak specialties. Stocks showed a decided reaction from the animation of April, and under the depressing influence of the large gold exports and lack of foreign buying the market became dull. The new stocks of the Cotton Oil Company (reorganized) came on the Stock Exchange list, selling at 24 for common and 47 for preferred. Nashville & Chattanooga sold up to 110 near the close, on the reports of new stock to be issued to old stockholders at 50.

Among the leading events of the month were the large exports of gold; the Bank of England advance to 5 per cent; our very strong crop situation; the unsettled affairs abroad, including the remains of Argentine embarrassments, and an unsettled feeling in Paris and small crisis in Lisbon. The Western Traffic Association held its adjourned meeting in New York May 6, with harmony, and a Missouri Pacific agent was discharged for rate-cutting; Norfolk & Western offered to its stockholders 21 new shares of pref. stock at 52½¢ for each 100 owned; the Penn. Railroad dividend was 3 per cent, payable in cash or scrip; the Chattanooga Rome & Columbus road was bought in the Central Ga. interest; Chicago & Northwest. authorized \$10,000,000 5 per cent debentures; the Westinghouse Electric Mfg. Co. embarrassed, proposed a plan of reorganization; the Reading Railroad contracted with Cox Brothers for 30 years to build a short connection and carry their coal; the Covington & Macon Road was sold in foreclosure and reorganized as Covington & Northern; the St. Louis Southwestern RR. (formerly the St. Louis Arkansas & Texas) took possession of its property.

**JUNE**—The month of June was exceedingly dull in financial circles, notwithstanding the easy money market and the excellent crop prospects. The continued export of gold was the chief depressing influence, although money was easy in London and the Bank of England rate was twice reduced—from 5 to 4 on June 4; and again to 3 per cent on the 18th. Money on call was in full supply here within a range of 1½ to 5 per cent and with 2½ to 3 per cent as the average rate to stock borrowers in the latter part of the month, time loans being much higher and prime paper quoted at 5½ to 6 per cent. The city banks' surplus steadily increased in spite of the gold exports, through large receipts of money from the West, and during the four weeks the surplus reserve ran as follows: On the 6th \$6,687,600, on the 13th \$10,484,825, on the 20th \$16,172,225 and on the 27th \$18,411,630. Foreign exchange was easier in tone early in the month as money in London became easier, but in the latter part sterling bills were stronger, as commercial bills were in small supply and there was no buying of securities for foreign account. At the opening actual business was done as low as 4 85 to 4 88½ and near the close at 4 86½ and 4 89 for long and short sterling respectively. The Bank of England rate was reduced to 4 on the 4th and to 3 on the 18th. The imports of merchandise into the United States exceeded exports by \$15,867,491; the net export of gold was \$15,539,494 and net export of silver \$523,847. Silver bullion certificates opened at 97¼; highest, 103; lowest, 97¼; closing, 102.

Stock Exchange securities were devoid of animation and often much depressed. Secretary Foster on the 2d issued his first circular, stating that the 4½ per cent bonds would be paid off at maturity on Sept. 2, and suggesting to holders their continuance at 1 to 1½ per cent. Railroad bonds were very dull and prices of many bonds lower. The market was devoid of animation or interesting features. Stocks opened dull until Rock Island broke about 6½ points, to 70¼, on large selling orders reported to come from inside parties who first knew of the reduction of the August dividend to ½ of 1 per cent. This depressed other stocks, and the large exports of gold and sensitive feeling abroad and absence of foreign buying in our market kept everything down throughout the month. Chicago Gas was quite active between 48 and 55¼ on a settlement with the city, and late in the month North American broke to 11½ and Richmond Terminal to 12½, these not being railroad companies and more easily assailed by bear rumors as to the value of their assets. Dividends were declared on Sugar stocks—4 on common and 3½ on the preferred.

Among leading events of the month not already mentioned were the excellent Government crop report on the 10th; the lease of the Central Railroad of Georgia to the Georgia Pacific of the Richmond Terminal system; the offering to Central of N. J. stockholders of record on June 8 the right to take at par 20 per cent of their holdings in new stock; the decision by Louisville & Nashville to purchase the Kentucky Central Railroad stock; the completion of the connection between Norfolk & Western and Louisville & Nashville at Morton, Va.; the notice of issue by Nashville Chattanooga & St. Louis Railroad of 50 per cent new stock at 50 to stockholders of record on July 15; the decree of sale in foreclosure made against the Kansas City Wyandotte & N. W. Railroad; the assistance again rendered to the Mariettas in London.

**JULY**—July was a month of easy money, large bank reserves, weak exchange and declining gold exports, excellent crop prospects, but dullness and depression notable at the Stock Exchange. The exports of gold finally came to an end on July 25, and after that no more was sent out. Money on call ranged between 1 and 4 per cent, with 1½ to 3 as the average rate paid by borrowers, time loans being less easily obtained and lenders very cautious, while prime paper was selling at 5½ to 6 per cent. The banks' surplus on the 3d was \$15,465,075, on the 11th \$14,542,025, on the 18th \$18,489,675, and on the 25th \$19,710,325. Foreign exchange was easier and commercial bills in better supply. On actual business bankers' sterling bills sold at 4 85½ to 4 87 in the first part, and at 4 84½ to 4 86½ near the close. The Bank of England rate of discount was reduced from 3 to 2½ per cent on the 2d, and remained at that figure. Imports of merchandise exceeded exports by \$4,373,142; the net export of gold was \$5,633,526 and net import of silver \$244,408; silver bullion certificates ranged at 102½ opening, 102¾ highest, 99 lowest, 100¾ closing.

There was no special interest in Government bonds. Secre-

tary Foster issued on the 2d his circular offering to extend the 4½ per cents due Sept. 1 at 2 per cent interest. Railroad bonds were very dull throughout the month with prices not improved in general and in some cases actually lower, the cheap mortgage bonds and incomes being chiefly dealt in. Stocks gained nothing from the fine crop outlook and decreasing gold exports, and after a very dull month and low prices the depression culminated in a bear assault on Burlington & Quincy and the other grangers, and on the last day of July Burlington & Quincy sold at 79¼, Atchison at 30¾, St. Paul at 61½, Rock Island at 69, Louisville & Nashville at 67½, N. Y. Cent. & Hudson at 98½, Erie at 17½, N. Y. & New England 31, Nor. Pac. pref. at 58½, Richmond Terminal at 11¾, North American at 11¾, Chicago Gas at 43¾, Union Pacific at 39¾. Many stocks touched their lowest prices of the year in the last week of July.

Among the events of the month were the discharge of the M. K. & T. receiver and the taking possession of the property by the company; the fine crop outlook here and bad reports from France and Russia; the increase in stock of the American Tobacco Company of \$6,000,000 common, to \$21,000,000, and \$2,000,000 pref., to \$14,000,000; the ratification by Louisville & Nashville stockholders of the increase of \$7,000,000 stock, raising the share capital to \$55,000,000, and the offering of \$4,800,000 of the new issue to stockholders at 70; the Richmond & Danville recorded a \$2,000,000 equipment mortgage; the Jersey Central quarterly dividend was raised to 1¾ per cent, Long Island quarterly dividend to 1¼; while the Illinois Central semi-annual was reduced from 3 in March to 2 for September and the Denver & Rio Grande August dividend was passed; Judge Wallace rendered a decision in favor of the Edison patent on incandescent electric lights; the English Bank of the River Plate in London suspended; the Rock Island and St. Paul suits against the Union Pacific as to Omaha Bridge were decided in favor of the former; the National Lead Trust proposed to reorganize with capital reduced to \$30,000,000, of which \$15,000,000 to be 7 per cent preferred cumulative and \$15,000,000 common, with \$3,000,000 debenture bonds.

**AUGUST**—This was a month of sharp and wonderful recovery at the Stock Exchange. The forces that led up to this improvement had been culminating for some time; the crop abundance here and scarcity abroad had become the talk of the world; our large exports of gold, which held everything in check for a time had finally ceased on July 25; the prices of stocks and bonds instead of improving had reached their extreme depression in the last week of July. The facts had finally become too strong to be longer resisted; the market turned; and then commenced that long upward movement in securities from which there was no really serious reaction during the balance of the year. Money was quite easy on call at 1½ to 5 per cent, with an average rate of 2 to 2½, and on time loans the lenders were more liberal and less timid about collateral; commercial paper was quoted at 5½ to 6½ per cent. The surplus reserve of our city banks was \$19,481,350 on the 1st, \$18,420,850 on the 8th, \$17,617,235 on the 15th, \$14,109,800 on the 22d and \$12,767,825 on the 29th. Foreign exchange declined with the better supply of grain bills and in the last part of the month on some buying of our securities for foreign account—rates on actual business were 4 84½ to 4 86½ for bankers' sterling at first and 4 83½ to 4 85 towards the close. The Bank of England rate remained throughout at 2½ per cent. For the first time since February the exports of merchandise exceeded imports, the excess being \$6,733,030; net imports of gold were \$1,222,587; net exports of silver, \$1,488,715. Silver bullion certificates ranged at 100½ opening, 101 highest, 98 lowest, 98 closing.

Stock Exchange securities showed improvement from the start. The Richmond Terminal bonds, which had been very weak, recovered sharply to 58, though afterward declining, and other low-priced bonds began to show signs of animation, in sympathy with stocks. The market broadened as the month advanced, and income bonds met with a large business on speculative account, while the mortgage bonds showed much less advance in prices. As a type of the most active bonds Atchison incomes opened at 48½ and closed at 61½, and Reading first preferred incomes opened at 49½ and closed at 60½. The tone of the stock market began to improve on the first day of August, and there was never afterward any material set-back to the advance in prices. Burlington & Quincy had been hammered by the bears late in July, and on the 31st sold at 70¼, with St. Paul at 61½, Rock Island at 69 and Atchison at 30¾. These prices made a good starting point for these four stocks, which were then the leaders of the market, and the bulls made the most of it. With more or less animation throughout and with buoyancy increasing as the month advanced, there was a general upward movement all along the line, and on the 31st of August Burlington sold at 96½, St. Paul at 71¼, Rock Island at 84¼ and Atchison at 41¼. Other stocks kept pace with this advance more or less closely, and many of the low-priced specialties came into favor and shared in the improvement. The strength was also sustained in spite of serious breaks in such important stocks as Union Pacific and Richmond Terminal. The Union Pacific was greatly embarrassed by its floating debt, and a receiver was imminent before the relief syndicate was formed, the stock declining on the 11th to 32¼, and Richmond Terminal, owing to the large debts of its operated companies, declined on the same day to 10½.

Among the leading events of the month were the excellent crop reports; the formation of the Drexel-Morgan syndicate

to help Union Pacific float about \$20,000,000 of 3-year 6 per cent notes to take up its floating debt; the Russian ukase against the export of rye, issued about the 10th; the sale of one Stock Exchange seat early in the month at \$16,500; the declaration of 2 per cent for the fiscal year on Atchison incomes; very large exports of wheat; the plan to fund five coupons of the Kansas City Memphis & Birmingham Railroad; the plan to reorganize the Lead Trust with \$30,000,000 capital (\$15,000,000 of it pref.) and \$3,000,000 debenture bonds.

SEPTEMBER.—In this month the U. S. 4½ per cents were paid off or extended at 2 per cent. The return movement of gold from Europe to this country began in considerable amounts, the first receipts at this port arriving on the 12th. Very large exports of grain were kept up, but cotton exports were slow. There was continued animation at the Stock Exchange, but quite a reaction in prices late in the month. Money on call was generally easy at 2½ @ 5 per cent though exceptional rates were made as high as 7 per cent about the 10th and up to 25 per cent on the 22d, though the bulk of business was at 5 @ 6 per cent in the latter part with a turn upward to 12 per cent near the close. Commercial paper was quoted at 5½ @ 6½ per cent. The banks' surplus reserves ran as follows: on the 5th \$9,156,400, on the 12th \$8,722,775, on the 19th \$7,756,750, on the 26th \$4,008,125. Foreign exchange tended downward as commercial bills increased in supply and as London purchased our stocks and gold began to come in freely; rates on actual business were 48½ and 48½ for sterling at first and 48½ and 48½ towards the close. The Bank of England rate was advanced from 2½ to 3 per cent on the 24th. Exports of merchandise exceeded imports by \$21,348,551; net imports of gold into the country were \$7,106,138 and net exports of silver \$953,163.

There was an active movement in Stock Exchange securities. The United States Treasury continued to extend the 4½ per cents at 2 per cent until September 30, paying off those holders not desiring to extend. There were outstanding on July 2, when the circular was issued offering to extend the bonds on presentation, \$50,869,200, and up to September 30 there had been extended at 2 per cent \$25,364,200, and paid off \$18,009,600, leaving over \$7,000,000 to be redeemed. Railroad bonds were very strong and active for the incomes, in sympathy with the stock market, but without special improvement in the mortgage bonds. Stocks showed a very large business, with excited dealings and great buoyancy during the first three weeks of the month and no serious drawback. On September 21 Burlington reached 99½, St. Paul 76, Atchison 47½, Rock Island 57½; the Vanderbilt stocks of all classes were strong and higher; Erie touched 31½ on the 16th. The fine crop outlook on everything except cotton, and the warm weather for maturing corn, together with the continued heavy exports of grain and the imports of gold at New York, were the chief influences that fostered the buoyancy in stocks. In the week ending September 26 there was a decided change in the tone and a considerable reaction in prices. Business was very active and large; sales of stocks and bonds to realize profits already accrued were easily absorbed by new buyers without breaking prices. But on Thursday the 24th it was announced that the consideration of the Missouri Pacific quarterly dividend had been postponed till the next week and that it would probably be passed. This broke the stock from 73 to 65 and affected all the list as it was accompanied by reports that the Gould party was decidedly against the advance in stocks. A hitch was also rumored in the Union Pacific syndicate plan, and that stock declined, touching 38½ Friday morning and bounding to 45½ when the success of the plan was announced. During the balance of the month the market drifted on with prices barely steady, waiting for the final Missouri Pacific action to be taken on the 30th.

Among the chief events of the month were the extension or payment of the U. S. 4½ per cents, as stated above; the inflow of gold towards this country; the excellent Government crop report on cereals issued on the 10th, though a less favorable showing for cotton; the Allegheny Valley Railroad foreclosure decision; the failure of S. V. White & Co. on the 22d on their effort to corner September corn in Chicago; a plan for loans to Richmond Terminal companies which was under consideration; the execution of the Union Pacific syndicate agreement and offering of \$5,500,000 of the 6 per cent collateral trust notes to the public at 92½, which were oversubscribed on the 28th; the passing of the Missouri Pacific quarterly dividend, which was finally acted on at the directors' meeting held Sept. 30.

OCTOBER.—The month of October was one of easy money, but halting and depressed markets at the Stock Exchange. There was an unsettled condition of affairs abroad; the receipts of gold from Europe continued on a liberal scale; wheat and cotton were marketed very freely and prices kept low in consequence, though exports of wheat were very heavy; railroad earnings were large, particularly on the grain-carrying roads. Money on call was easy after the first few days and loans were made during the balance of the month at 3 @ 6 per cent, with 3½ to 4½ as the fair average. Prime paper sold first at 6 @ 6½ and afterward at 5 @ 6 per cent. The New York City banks reported surplus reserves of \$3,102,750 on the 3d (the minimum amount of the year), \$6,639,475 on the 10th, \$9,029,700 on the 17th, \$12,391,150 on the 24th and \$ 2,338,525 on the 31st. Foreign exchange was without animation at moderate prices, and commercial bills were in full supply from grain exports, though cotton exports were less than in October, 1890. Actual rates for bankers' 60-day sterling bills ranged from 4 79¼ to 4 81¼ and for demand

bills 4 83 to 4 84¼. The Bank of England rate remained at 3 per cent till the 29th, when it was advanced to 4 per cent. The excess of merchandise exports over imports was \$36,138,057; the net import of gold, \$16,088,353; the net export of silver, \$801,471. The range of silver certificates was: opening, 97½; highest, 97½; lowest, 95¼; closing, 96.

In the Stock Exchange markets there was little animation, and the general tone was one of waiting, after the large advance which had taken place in August and September. Government bonds were dull; State bonds very little dealt in; railroad bonds presented no salient features, the active issues being dull and depressed in sympathy with stocks, the principal transactions running as usual on the leading income bonds such as the Atchisons, Readings, Texas Pacific, &c. The low-priced mortgage bonds improved somewhat towards the close. Stocks were very weak at the opening in consequence of the passing of the Mo. Pacific dividend on Sept. 30, when Mr. Gould was also seized with an attack of hysterics at the directors' meeting; Missouri Pacific declined on Oct. 2 to 51¼. The settlement of Union Pacific floating debt by the Drexel-Morgan syndicate had been successfully completed on Sept. 29, and this was quite favorable, but the market simply remained steady in the face of dullness and bearish influences with weakness here and there in spots. The Vanderbilt stocks became very strong late in the month, owing to their prospect of larger dividends, and among the Western stocks the heavy earnings of Atchison, Burlington, St. Paul, and some other roads, served to give tone to the list.

Among the events of the month the Atchison circular was issued offering to extend the \$7,000,000 of 6 per cent guarantee trust notes for two years, paying holders a bonus of 1 per cent. The Rock Island issue of \$10,000,000 debentures was announced and \$2,000,000 were sold and listed in November; the Louisville Evansville & St. Louis acquired control of the Kentucky & Indiana Bridge; the Allegheny Valley plan of reorganization was issued; the Cincinnati Jackson & Mackinaw Road was sold and the Middle Division purchased by parties outside the reorganization committee; the issue was proposed of \$2,500,000 preferred stock by the Columbus Hocking Valley & Toledo Railroad, offered afterwards to stockholders at 50; the issue some time previously of \$1,500,000 second mortgage bonds by Lake Erie & Western was announced; the Ohio & Mississippi meeting was held on the 15th to elect three directors and act on the proposed transfer of control to Baltimore & Ohio, against which there was opposition; Pullman stock was increased by \$5,000,000, offered to stockholders at par; a land decision was made by the United States Circuit Court in North Dakota favorable in its general result for Northern Pacific; the California & Oregon 6 per cent mortgage bonds were extended by Central Pacific to Jan. 1, 1918, at 5 per cent; the Lehigh Valley Terminal Railway was formed and \$10,000,000 bonds authorized; the Missouri Kansas & Texas lines in Texas were incorporated with \$8,000,000 capital stock; the P. Lorillard Tobacco Company was organized with \$2,000,000 preferred and \$3,000,000 common stock; the Pacific Short Line Railroad was foreclosed and reorganized as the Nebraska O'Neill & Western.

NOVEMBER.—In November the financial markets were disturbed by the failure of the Maverick National Bank in Boston on the 2d, and by the unsettled condition of affairs abroad, especially in the Continental cities. On the 27th the suspension of Field, Lindley, Wiechers & Co. was announced, and as they had re-hypothecated a large amount of securities pledged with them for loans, the failure had an unsettling influence. The inflow of gold from Europe continued on a moderate scale during the month. In the loan market, the Maverick Bank failure led to a large temporary demand for money from Boston, and this advanced rates on call here to 15 per cent on the 4th, from which they quickly fell off and soon ruled at 3 @ 6 per cent, being quite easy in the latter half of the month at 3½ @ 4 per cent, prime paper being quoted at 5 @ 5½. Our city banks had surplus reserves of \$6,935,150 on the 7th, \$9,452,150 on the 14th, \$13,322,750 on the 21st and \$14,882,350 on the 28th. Foreign exchange was very steady, the actual rates for bankers' 60-days sterling bills ruling between 4 80¼ and 4 81, and demand bills at 4 83¼ @ 4 84. The Bank of England rate remained at 4 per cent, but the bullion in bank increased considerably, and a reduction in the discount rate was expected. Merchandise exports from the United States exceeded imports by \$45,511,601; the net import of gold was \$8,489,768; the net export of silver was \$2,411,194. The opening, highest, lowest and closing prices of silver certificates were 95¼, 95½, 94¼, 94¾.

At the Stock Exchange there was no particular activity and a dull business with weakness in special stocks was the rule. The Maverick Bank failure, the general elections on the 3d, the failures of bankers in Berlin, the unsatisfactory condition of affairs in Paris, where bankers were carrying a large part of the new Russian loan, and the revolution in Brazil, all contributed to check the activity of our market on home or foreign buying. On the other hand receipts of wheat and cotton at the Western and Southern markets were large beyond precedent, exports were very heavy, and railroad earnings showed a handsome increase over 1890. The Burlington quarterly dividend was increased to 1¼ per cent; Erie declared 3 per cent on its preferred stock and Baltimore & Ohio 20 per cent in stock to represent earnings spent for betterments in past years. The leading Western stocks were held more steadily than others; the Vanderbilts were generally strong on the prospect of earning higher dividends; the coal stocks were sold down, but recovered towards the end; Amer-

ican Cotton Oil was strong on its excellent financial exhibit; Chicago Gas was active and variable on the changing rumors concerning the opposition company; Richmond Terminal broke on the prospect of a reorganization.

Among the principal occurrences were the failure of the Maverick National Bank on the 21; the general elections on the 3d, which were generally construed as indicating opposition to free silver coinage; the good exhibit of the American Cotton Oil Company; the loan of \$3,500,000 for one year to the Central Railroad of Georgia by the Speyer syndicate on the pledge of \$7,000,000 5 per cent consol bonds; reorganization plan of the U. S. Rolling Stock Company; the Berlin failures of several banking houses; Louisville New Albany & Chicago increase of \$5,000,000 in stock, of which \$3,200,000 was afterward offered at 25 to stockholders of record Dec. 15; increase in Baltimore & Ohio stock to \$25,000,000, of which \$2,161,800 was for the purchase of Pittsburg & Western stock, about \$2,958,500 for the 20 per cent B. & O. stock dividend, and over \$5,000,000 left for improvements; the appointment of a receiver for the Macon & Atlantic Railroad; the passing of its dividend by the U. S. Express Company; the Atlantic & Pacific second mortgage guaranteed bonds were retired, but the mortgage held alive by the guarantors; the Cleveland & Pittsburg Railroad made \$19,000,000 blanket mortgage and \$3,000,000 of the bonds at 4½ per cent guaranteed by Pennsylvania Railroad were sold; the Russian ukase forbidding the export of wheat was issued on the 21st, taking effect on the 23d; the Virginia debt compromise offered a basis of \$19,000,000 of new 100-year bonds for \$28,000,000 of old debt, the new bonds to carry 2 per cent for 10 years and 3 per cent for 90 years; the Pacific Mail obtained Government postal contracts on certain routes; Field, Lindley, Wiechers & Co. failed on the 27th.

DECEMBER.—December was chiefly remarkable for its easy money market, large surplus of the banks, continued heavy exports of produce, and moderate imports of gold, and, finally, for the great buoyancy and activity at the Stock Exchange and depression at the Produce and Cotton Exchanges in the last part of the month.

Rates for money on call were quite easy, not exceeding 6 per cent in the early part and afterward ruling at 2½ per cent, with prime paper at 4½ to 5½ per cent. The surplus reserve of the city banks was \$13,863,625 on the 5th, \$15,339,500 on the 12th, \$19,161,500 on the 19th and \$19,480,025 on the 26th. Foreign exchange opened at easy rates about 4 81½ for long sterling and 4 84½ for demand, but afterward became firm on a good inquiry for remittances, relaxing subsequently as this fell off and closing about 4 81½ and 4 84½ on actual business. The Bank of England discount rate was reduced on the 10th from 4 to 3½ per cent and so remained. Silver bullion certificates opened at 54½; highest, 96¼; lowest, 94½; closing 95.

The stock and bond markets showed but little animation in the first two weeks of the month. There was strength here and there in spots and some demand for bonds at better prices. Richmond Terminal broke to 8½ on the 2d, owing to differences in the management and doubt as to the outcome of its affairs. Burlington & Quincy was very strong on its earnings; Missouri Pacific and Northern Pacific preferred were weak and sold down. Silver certificates had a brief liveliness on Mr. Goschen's proposed plan in England. But after the middle of the month the tone rapidly improved; dealings at the Board became active and buoyant in both stocks and bonds, and the movement thus begun was kept up with growing impetus throughout the rest of the month. The Rock Island dividend was raised to 1 per cent; Richmond Terminal securities took on new life and advanced sharply after the appointment of the Olcott Committee; the grangers, Atchison and Union Pacific advanced on large net earnings; the Vanderbilt roads made an excellent showing though their dividends declared were less than some had expected. The low-priced stocks and bonds advanced materially on speculative purchases, as well as Cotton Oil, National Lead, Chicago Gas and some of the industrials, "so called," also the better class of bonds on a good investment demand, so that the year closed with buoyant markets in each department of the Exchange.

Among the events of December a receiver was appointed for the Richmond Nicholasville Irvine & Beattyville Railroad in Kentucky; the Poughkeepsie Bridge was rumored to be going under the control of some of the strong railroads; the Chicago & Northern Pacific negotiated \$5,000,000 bonds with a syndicate headed by Speyer & Co.; the Lehigh Valley Terminal \$10,000,000 bonds were listed and part of them sold privately by Messrs. Drexel, Morgan & Co.; the National Lead Company was formed with capital of \$15,000,000 pref. and \$15,000,000 common; the Wagner Palace Car Company increased its capital stock \$7,000,000, to \$20,000,000, and \$6,000,000 was sold to stockholders at 30; the Allegheny Valley Railroad was sold Dec. 15 and purchased by the reorganization committee; the Atchison Terminal property in Chicago was reported as sold for \$7,500,000 to the Chicago Elevated Terminal Company; the Milwaukee Lake Shore & Western Road was absorbed by the Chicago & Northwestern by an exchange of stocks—9 shares of M. L. S. & W. pref. for 4 C. & N. W. common, and 5 of M. L. & W. common for 4 C. & N. W. common; the Richmond Terminal directors differed in views and the Olcott Committee was appointed; the National Cordage Co. obtained an option on the Good Cordage & Machine Works, giving it about 80 per cent of the cordage works of the country.

**Condition of National Banks in Boston, Philadelphia, Baltimore and St. Louis.**—We have received this week from Mr. E. S. Lacey, Comptroller of the Currency, abstracts of the condition of the national banks in the cities of Boston, Philadelphia, Baltimore and St. Louis at the close of business on Wednesday, December 2, 1891. From them and from previous reports we have prepared the following, which covers the results for December 2 and September 25, 1891, and for purposes of comparison the figures for last year (December 19) are given:

## DEBT STATEMENT DECEMBER 31, 1891.

The following is the official statement of the United States public debt and of the cash in the Treasury at the close of business December 31, 1891.

## INTEREST-BEARING DEBT.

Title of Loan.	Int'r't Pay'ble	Amount Issued.	Amount Outstanding.		
			Registered.	Coupon.	Total.
4½% F'n'd Loan, 1891					
Continued at 2 p.c.	Q.-M.	\$250,000,000	\$25,364,500	\$ .....	\$25,364,500
4½% F'n'd Loan, 1897	Q.-J.	740,885,350	183,749,250	75,824,750	559,574,000
4½% Ref'd'g Certificate.	Q.-J.	40,012,750	.....	.....	88,470
Aggregate excl'd'g B'ds to Pac. RR.		1,030,843,100	509,113,750	75,824,750	585,029,070

## DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

	Dec. 31, 1891.	Nov. 30, 1891.
Funded Loan of 1891, matured September 2, 1891.....	\$3,039,150	\$3,671,250
Old debt matured at various dates prior to January 1, 1891, and other items of debt matured at various dates subsequent to January 1, 1891.....	1,594,100	1,605,320
Aggregate of debt on which interest has ceased since maturity.....	\$4,633,250	\$5,276,570

## DEBT BEARING NO INTEREST.

Legal-tender notes.....	\$346,691,016
Old demand notes.....	55,647
National Bank notes.....	33,679,299
Redemption account.....	\$15,281,608
Fractional currency.....	8,375,934
Less amount estimated as lost or destroyed.....	0,905,674
Aggregate of debt bearing no interest.....	\$390,321,036

## CERTIFICATES AND NOTES ISSUED ON DEPOSITS OF COIN AND LEGAL-TENDER NOTES AND PURCHASES OF SILVER BULLION.

Classification of Certificates and Notes.	In the Treasury.	In Circulation.	Amount Issued.
Gold certificates.....	\$17,479,720	\$148,106,119	\$165,578,839
Silver certificates.....	9,954,750	320,817,565	324,772,315
Currency certificates.....	200,000	9,265,000	9,465,000
Treasury notes of 1890.....	2,031,045	75,499,057	77,530,102
Aggregate of certificates.....	\$23,665,515	\$553,484,741	\$577,143,259

## RECAPITULATION.

Classification of Debt.	Dec. 31, 1891.	Nov. 30, 1891.	Increase or Decrease.
Interest-bearing debt.....	\$585,029,070	585,029,870	I. 100
Debt on which interest has ceased.....	4,633,250	5,276,570	D. 643,320
Debt bearing no interest.....	886,321,636	387,433,340	D. 1,111,710
Aggregate of interest and non-interest bearing debt.....	915,981,946	977,739,080	D. 1,753,040
Certificates and notes offset by an equal amount of cash in the Treasury.....	577,143,259	569,221,709	I. 7,921,550
Aggregate of debt, incl'g cert's & notes.....	1,553,125,205	1,546,960,789	I. 6,164,416

## CASH IN THE TREASURY.

Gold-Coin.....	\$196,631,061
Bars.....	82,212,859
Silver-Coin.....	\$49,217,549
Subsidiary coin.....	13,789,325
Paper-Legal tender notes (old issue).....	59,969,468
Treasury notes of 1890.....	12,918,695
Gold certificates.....	2,031,045
Silver certificates.....	17,472,720
Currency certificates.....	3,904,750
National bank notes.....	200,000
Other-Bonds, interest and coupons paid, awaiting reimbursement.....	91,675
Minor coin and fractional currency.....	819,661
Deposits in national bank deposit a/c's-general acct.	15,437,070
Disb. single officers' balances.....	4,400,912
Aggregate.....	\$757,300,432

## DEMAND LIABILITIES.

Gold certificates.....	\$165,578,839
Silver certificates.....	324,772,315
Currency certificates.....	9,465,000
Treasury notes of 1890.....	77,530,102
Fund for redemp. of uncurrent national bank notes.....	5,906,720
Outstanding checks and drafts.....	4,277,744
Disbursing officers' balances.....	2,819,471
Agency accounts, &c.....	7,355,092
Gold reserve.....	\$10,000,000
Net cash balance.....	34,574,128
Aggregate.....	\$757,300,432
Cash balance in the Treasury November 30, 1891.....	189,126,918
Cash balance in the Treasury December 31, 1891.....	194,574,128
Decrease during the month.....	\$4,552,770

## BONDS ISSUED IN AID OF PACIFIC RAILROADS.

Name of Railway.	Principal Outstanding.	Interest accrued and not yet paid.	Interest paid by the U. S.	Int. repaid by Companies.		Balance of Int'l paid by the U. S.
				By Transportation Service.	By cash pay'm'ts; 5 p.c. net earnings.	
Can. Pacific.....	25,885,120	776,554	35,577,413	6,266,899	658,298	28,052,291
Kan. Pacific.....	6,303,000	169,090	9,154,778	3,969,267	.....	5,183,506

## Monetary-Commercial English News

[From our own correspondent.]

LONDON, Thursday, December 24, 1891.

The rate of discount in the open market, which at the end of last week was scarcely higher than 1¼ per cent, has risen this week to 2½ per cent, and in some cases 2½ was charged. The rise is partly due to payments of instalments of Colonial loans, partly to preparations for the end of the year, and largely to a strong German demand for gold. On Saturday of last week and on Monday, Tuesday and Wednesday of this week about half a million sterling of bullion was withdrawn from the Bank of England for Berlin. The general expectation, however, is that the German demand will end as soon as the year is over, and that upon the Continent, as well as in this country, money will become both abundant and cheap next month. There will of course be a Spanish demand. On Monday next the new Spanish loan for ten millions sterling nominal is to come out; but as the price is only eighty-one the proceeds, as we stated last week, will barely exceed eight millions sterling nominal, and half that amount is due for Treasury bills maturing next month. Therefore the sum available will be only about four millions sterling, and perhaps not more than half of that can be spared by the Government. It does not seem probable, therefore, that the Bank of Spain will be in a position to buy very much gold; probably it will buy more silver than gold. Unless, then, there are large withdrawals for New York, the likelihood seems now that money will become very abundant next month and that the Bank of England rate of discount will be reduced.

The silver market is weak. A little while ago there was an inclination to look for a recovery in the price, but now opinion has changed. Japan has been buying for some days past, but the Indian demand has ceased, and so has the Continental, and unless there is an upward movement in New York the probability appears to be that quotations will decline.

A meeting of the South American Trust was held on Saturday afternoon to confirm an arrangement entered into with Messrs. de Murrieta & Co. for taking over their commercial and financial business, and it was stated that a new company would be formed for taking over the assets and liabilities. According to the figures given, when all liabilities are met there will be a considerable surplus. The arrangement has made a good impression here. Every one now believes that the crisis so far as this country is concerned is practically ended. It was known that the assistance given to the Messrs. de Murrieta some time ago was only temporary and there were some fears that when the loans fell due fresh difficulties would arise; but now that a definitive settlement has been reached those fears have been dispelled. All the other houses largely interested in South America have weathered the storm successfully, and though there is still a large lock-up, no doubt is entertained that all those houses are thoroughly sound—indeed have large surpluses. Heavy losses have been suffered by several banks in Australasia and in Eastern Asia, but there is no fear of any serious difficulty. Even respecting the Continent the feeling is better than it was. It is now stated certainly that the January Portuguese coupon will be paid. It is hoped that the new Spanish loan will so relieve the Bank of Spain for the time being that no trouble will occur there. A more cheerful view is also taken of Italy, and there is a hope, though not a very strong one, that nothing very bad may occur in Russia. Still all apprehension has not been removed yet. The lock-up in France and Germany is very great. Several of the banks have lost credit and nobody can be sure what may occur.

On Saturday and Monday there was more business here in the American market than for a couple of months. Operators looked on while the rise proceeded in New York, doubting whether it could be maintained with the Christmas holidays so near at hand and the unwillingness of the banks to lend largely at the very close of the year. But at the same time there was a general feeling that the American market must improve and that even if there were a temporary reaction it would be followed by a very marked recovery. At length on Saturday some of the large operators took courage and there was considerable business done. On Monday there was more activity than had been seen for a long time past, and at one time it looked as if the activity would continue. But when lower prices were reported from New York the market gave

way somewhat late on Monday afternoon, and on Tuesday there was a decided shrinkage both in the volume of business and in prices. On Wednesday, however, when it was found that there had been a recovery in New York, business again increased. Still this market is not inclined to operate very freely until next month. Then, indeed, if quotations are maintained, it is probable that we shall see a far more active market than has been witnessed at any time this year. In British securities there is a fair amount of investment, bank shares being very firm and so generally are British railway stocks. But colonial securities are neglected, and there is literally nothing doing in South American securities. For many years British investors have kept aloof from international securities, and steadily they have been selling to Germany and France. Everyone here is persuaded that those securities are far too high; but for the moment the bears are afraid to sell, having lost considerably in their operations last month. There is a general belief, however, that early in the new year the market must give way. It is supported almost entirely by France and by the Russian Government; but rich as France is and skilful as the great Paris bankers are in combining with one another, everyone is persuaded that prices cannot be permanently maintained. The probability therefore is that we shall witness new bear sales on a considerable scale next month. As stated above, it is now believed that the Portuguese January coupon will be paid in full; but the belief is widely entertained that this is the last time when that can be done, and therefore a sharp fall in Portuguese securities is looked for. Unless the Spanish Government can carry out a complete change in policy and restore order in its finances the relief obtained from the new loan will be only temporary, and Spanish bonds likewise must decline; and still more is it believed that Russian securities must give way. Negotiations are going on between one of the great Berlin banks and some of the leading railroad companies in Russia for bringing out railroad bonds in Berlin. But German feeling is very strong against lending more money to Russia, and those best informed believe that if an attempt is made to float these railroad bonds in Berlin it will be defeated.

British trade is fairly good. There is, of course, considerable falling off in the exports, but the home trade is large and fairly prosperous, especially ship-building, which has been on an immense scale during the year. In the whole United Kingdom 1,273,784 tons of new shipping have been built during the year, against 1,271,110 tons last year and 1,300,933 tons in 1889. Government shipping, however, has been decidedly larger than in the past two years, so that the additions to the mercantile marine are not so large as they would appear to be from these figures. It may be added that in Scotland there has been a falling off in the out-turn. Except at Barrow there has also been a falling off in England; but there has been a marked increase at Belfast.

The wheat trade continues quiet, with little doing.

The rates for money have been as follows:

London	Bank Rate.	Open Market Rates.						Interest allowed for deposits by			
		Bank Bills.			Trade Bills.			Joint Stock Banks.	At Call.	7 to 14 Days.	Dis't H's.
		Three Months.	Four Months.	Six Months.	Three Months.	Four Months.	Six Months.

Messrs. Pixley & Abell write as follows:

Gold.—The demand for gold continues very good, and in addition to such amounts as could be purchased in the open market considerable withdrawals from the Bank have taken place, amounting altogether to £577,000 since our last. Sovereigns to the total of £81,000 have been received, and £637,000 have been withdrawn. Arrivals—South Africa, £20,000; River Plate, £73,000. Silver.—Silver has remained since Friday last at 43 1/4 d. and transactions have chiefly taken place on Continental account. The arrivals have been unimportant and there is some scarcity of bars. Arrivals—From Buenos Ayres, \$16,000.

Mexican Dollars.—These coin have closely followed bar silver, and have only been dealt in at melting parity.

The following shows the imports of cereal produce into the United Kingdom during the first sixteen weeks of the season compared with previous seasons:

#### Commercial and Miscellaneous News

NATIONAL BANKS.—The following national banks have recently been organized:

4,673—The First National Bank of Dawson, Pennsylvania. Capital, \$50,000. President, Jas. Cochran; Cashier, John H. Wurtz.

4,674—The Farmers' National Bank of Muncie, Indiana. Capital, \$100,000. President, George W. Spilker; Cashier, Edward Olcott.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$13,491,981, against \$8,198,616 the preced-

ing week and \$9,158,965 two weeks previous. The exports for the week ended Jan. 5 amounted to \$8,724,306, against \$8,645,422 last week and \$9,362,150 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Dec. 31 and for the week ending (for general merchandise) Jan. 1; also totals since the beginning of the first week in January.

## FOREIGN IMPORTS AT NEW YORK.

For Week.	1888.	1889.	1890.	1891.

—Messrs. Lamprecht Bros. & Co., with offices in Cleveland and Boston, make a specialty of municipal securities. See their card in another column.

—Messrs. John H. Davis & Co. offer for subscription \$500,000 first mortgage 6 per cent 20-year gold bonds of the United States Book Co., Manhattan Trust Co., trustee. The United States Book Co. is a corporation organized in 1890. Its capital stock consists of \$1,000,000 6 per cent first mortgage 20-year gold bonds of which the \$500,000 now offered are part; further of \$2,000,000 8 per cent cumulative preferred stock and of \$1,250,000 common stock, both classes of stock being listed at the New York Stock Exchange. The business of the United States Book Co. consists of the property of the John W. Lovell Co., which they have acquired, including a large publishing plant consisting of stereotype and electrotypes plates of a value stated at \$3,000,000 by experts. As further security the mortgage provides an annual sinking fund payment, beginning January, 1895, to be applied to the retirement of the bonds through their purchase in the market at not exceeding \$1.150 per bond. The interest charge upon the entire bonded debt of the United States Book Co. is \$60,000 per year, while the net profits of the company for the 5 months of 1890 after organization were \$151,056, or 2½ times the interest for the entire year. The net profits of the 15 months ending Oct. 31, 1891, were \$299,633, leaving a surplus of \$224,633 over the full interest charges for that period upon the \$1,000,000 bonds. Subscriptions for the bonds now offered will be received at par flat. A bonus of 10 per cent upon the par value of the bonds will be given to each subscriber in the 8 per cent preferred stock, thus returning to the purchaser an income of 6 8-10 per cent. The subscription lists will close Jan. 15 or earlier.

—Messrs. Kessler & Co. offer for sale at 97 and accrued interest \$1,500,000 five per cent first mortgage 50-year gold bonds of the Cincinnati Dayton & Ironton RR. Co., being the unsold balance of a total issue of \$3,500,000. The Cincinnati Hamilton & Dayton RR. Co. has leased the Cincinnati Dayton & Ironton RR. and guarantees prompt payment of principal and interest of these bonds, said guaranty being endorsed on each of them. The President's report states that the Cincinnati Dayton & Ironton RR. is already more than earning the total interest upon its bonds. Messrs. Kessler & Co. reserve the right to advance the price without notice and to reject subscriptions or allot in part. Subscriptions will also be received by the Third National Bank and the State Street Safe Deposit & Trust Co. of Boston.

—The Trustees of the Franklin Trust Co. of Brooklyn have unanimously elected Mr. Geo. H. Southard, President, and Mr. James R. Cowing, Second Vice-President. The changes were made owing to the resignation of Mr. Edwin Packard, who now takes charge of a New York institution. The Franklin Trust statement just made (Dec. 31, 1891), shows assets of \$7,099,462, capital stock \$1,000,000, and surplus fund at \$568,966, with deposits of \$5,432,770. The company has now in the course of erection one of the finest buildings in the city, which will be occupied by it in May.

—The Equitable Mortgage Company's card appears on the front page of the CHRONICLE, and they report business as satisfactory. The company issue debentures and negotiate mortgage loans, as well as buy and sell municipal, railroad, water, industrial and irrigation bonds. Parties having business in these securities are invited to call, or write for their price list.

—Martin's Stock Fluctuations, the standard annual publication covering the Boston market, will be ready on Monday, and may be had in quantities to suit from J. G. Martin, 19 State Street, Boston. This is quite an indispensable manual for all interested in the securities dealt in on the Boston market.

—Messrs. Spencer Trask & Co. announce that on Jan. 1 they succeeded to the firm of Messrs. Adams, Blodget & Co., of Boston, and will continue the business at 20 Congress Street, in that city. Messrs. Wm. Blodget and E. P. Merritt have been admitted as general partners.

**Central Vermont.**—From Rutland comes the statement that the stockholders of the Central Vermont Railway Company have completed the agreement for consolidation of that company with the Consolidated Railroad of Vermont, the Vermont & Canada, Montpelier & White River and New London & Northern companies merging the franchises, stocks, roads and properties of those companies into the Central Vermont. All these roads have ratified the consolidation agreement. The consolidation practically effects the merger of all the important lines in Vermont into the Central Vermont, the roads thus consolidated now forming the main line of the railroad system between Windsor, Vt., and Ogdensburg, N. Y., as follows: Vermont Central, from Windsor to Burlington, 118 miles; Vermont & Canada, from Essex Junction to Rouse's Point, 60 miles; Montpelier to Williamstown, 13 miles, and Ogdensburg & Lake Champlain, from Rouse's Point to Ogdensburg, 118 miles, a total of 309 miles of main line. The Central Vermont controls by lease the Rutland road from Burlington to Bellows Falls, 120 miles, and from Brattleboro to New London, Ct., 110 miles, making in all 539 miles of road now owned, leased or controlled. It also owns a line of steamers running between Ogdensburg and Detroit and Chicago through the Great Lakes.

—The well-known bond firm of Messrs. J. S. Farlee & Brother are desirous of purchasing first class city, State and railroad securities. Parties having bonds to offer should communicate with them.

—Attention is called to the list of municipal bonds advertised in this issue of the CHRONICLE by Messrs. Spencer Trask & Co., New York and Boston.

WALL STREET, FRIDAY, JAN. 8, 1892—5 P. M.

**The Money Market and Financial Situation.**—The year has opened most favorably, and there is yet no cloud on the financial horizon to shadow the excellent prospects. In addition to other matters the low prices of staple products, such as cotton, wheat and corn, while they may be very unfavorable for those who have been carrying them, are good as a starting point for the year's business, as they must lessen the probability of declining markets in the future, and trade is always better on rising markets.

It is well understood that in periods of buoyancy like the present many speculative stocks rise into prominence and have their day, and it is well enough to be on guard against such speculations and not to deal in them too heavily.

The corn crop begins to move freely now, and the railroads in the "Corn Belt" are expected to realize much better profits than in 1891. The proportion of corn carried to the seaboard ought also to be larger than usual, owing to the good export demand at fair prices.

The money outlook is known to be very easy in this country under the steady monthly issues of the new legal-tender notes for silver purchased, and it is considered doubtful whether any laws effecting material changes in the currency will be passed by this Congress.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1 1/2 to 4 per cent, the average being 3 p. c. To-day the rates on call were 1 1/2 to 3 p. c. Commercial paper is quoted at 4 1/2 to 5 1/2 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £173,000, and the percentage of reserve to liabilities was 32.01, against 35.15 last week. The Bank of France shows an increase of 2,650,000 francs in gold and a decrease of 5,575,000 in silver.

The New York Clearing-House banks in their statement of Jan. 2 showed an increase in the reserve held of \$480,000 and a surplus over the required reserve of \$17,232,050, against \$13,480,025 the previous week.

**Foreign Exchange.**—Sterling bills have generally been firm with the supply of commercial exchange moderate and the demand from arbitrage houses good. Money in London is easier than last week. Actual rates for exchange are: Bankers' sixty days sterling, 4 83 to 4 83 1/4; demand, 4 85 to 4 85 1/4; cables, 4 85 1/4 to 4 85 1/2.

Posted rates of leading bankers are as follows:

	January 8.	Sixty Days.	Demand.
Prime bankers' sterling bills on London..	4 83 1/2 to 4 84	4 85 1/2 to 4 86	—
Prime commercial.....	4 82 to 4 82 1/4	—	—
Documentary commercial.....	4 81 1/2 to 4 81 3/4	—	—
Paris bankers (francs).....	5 22 to 5 21 1/2	5 20 to 5 19 1/2	—
Amsterdam (guldens) bankers.....	39 1/2 to 39 1/8	40 1/2 to 40 1/8	—
Frankfort or Bremen (reichmarks) bankers	94 1/2 to 94 1/8	95 1/2 to 95 1/8	—

The following were the rates of domestic exchange on New York at the undermentioned cities to-day: Savannah, buying,

1/2 discount; selling par @ 1/2 premium; New Orleans, commercial, 25 @ 50c. premium; bank, \$1 per \$1,000 premium; Charleston, buying par, selling 1/2 premium; St. Louis, 75c. per \$1,000 premium; Chicago, 50c. per \$1,000 premium.

**Government Purchases of Silver.**—The following shows the amount of silver purchased by the Government in Jan.

	Ounces offered.	Ounces purchased.	Price paid.
January 4.....	2,025,000	564,000	\$0.9500 @ \$0.9524
" 6.....	2,121,000	1,120,000	\$0.9485 @ \$0.9495
" 8.....	1,947,000	1,095,000	\$0.9448 @ \$0.9450
*Total purchases.....	—	—	\$..... @ \$.....
*Total in month to date..	6,093,000	2,779,000	\$0.9448 @ \$0.9524

\*The local purchases of each week are not reported till Monday of the following week.

**State and Railroad Bonds.**—Sales of State bonds include \$7,000 Ala. class B at 105 1/2; \$10,000 Ala. cur. fd. 4s at 95 1/2; \$17,000 Va. 6s defd. at 9; \$20,000 trust receipts at 8 1/4; \$50,000 trust receipts, stamped, at 8 3/4 @ 8 1/2; \$5,000 N.C. spec. tax at 5 1/2; \$5,000 La. cons. 4s. at 86 1/2; \$2,000 Tenn. settl. 3s at 69 @ 69 1/2; \$5,000 La. con. 4s at 86 1/2; \$7,000 N. Car. 6s, 1919, at 123; \$5,000 consols 4s at 97.

Railroad bonds have continued very active, with particularly large dealings in the Reading incomes and a few other issues. Prices have been strong as a rule, and in many cases have advanced further in price, the Richmond Terminal issues being conspicuous at 67 1/2 for the fives and 94 1/2 for the sixes. On December 4th we wrote in this column: "If there are any persons who intend to purchase for investment during the next two months, it seems well worth their while to consider whether they cannot probably do better by taking bonds at present prices than by waiting till after Dec. 15, when the January influences usually begin to assert themselves." The course of prices since that date and the large advance in many bonds show that the suggestion was well made. Mo. Kansas & Texas seconds have had a spurt of activity, selling above 50, and the lowest bonds of the strong railroad systems, such as Atchison, Union Pacific, Northern Pacific, Ches. & Ohio, &c., remain in steady demand. There was less business than usual to-day, and M. K. & T. first 4s and Richmond Terminal 5s led the market. N. Y. & Northern 4s jumped into life, selling above 53.

**Railroad and Miscellaneous Stocks.**—The stock market this week has been active in spots. The tone and strength have been well maintained upon the whole, but the chief animation the past day or two has been in special stocks, such as Chicago Gas, New York & New England, Richmond Terminal, Distilling & Cattle Feeding, &c. Rock Island sold at 94 1/4 on Thursday, declined to 92 1/4 and was stronger to-day on good buying up to 94. Chicago Gas surpassed any other stock in large dealings, the price having been erratic, declining on Thursday from 80 to 73 1/2, and to-day opening at 74, falling to 72 1/2, advancing to 75 1/2 and closing at 74 3/4, without any satisfactory reasons known to outsiders, the skirmishing between this company and the Economic being always an unknown quantity. London sold a good many stocks here the first few days in order to realize profits, and again our market took back the English holdings without wavering, while reports from London say that there is also quite a short interest in Americans, which may at any moment turn prices sharply upward. The N. Y. & New England deal appears to be a combination between Mr. Chas. Parsons and Mr. Corbin, and there is no satisfactory evidence of N. Y. & New Haven influence. Louisville New Albany & Chicago has been active about 31, presumably on inside buying, while the 6 per cent. consols. bonds are quoted at 100 1/4. Richmond Terminal has been stronger on the actual subscription by a syndicate of some \$6,000,000 to clear off the Richmond & Danville floating debt—there is nothing so potent as the raising of tangible cash in such a case. Atchison stock and income bonds have been only moderately active, at prices a trifle lower; Union Pacific holds its advance fairly; Reading is strong on the prospect of the declaration of interest next week on the incomes; New York & Northern pref. stock and income bonds sprang into activity to-day, probably on some idea of the N. Y. & New England connection. At the close to-day prices were rather easier, apparently as a natural reaction from the advance in many stocks.

Among the unlisted Sugar closed at 86 1/2, and Nat. Lead common at 35. Silver bullion certificates dull at 94 1/4.

## Investment AND Railroad Intelligence.

The INVESTORS' SUPPLEMENT, a pamphlet of 150 pages, contains extended tables of the Stocks and Bonds of Railroads, and other Companies, with remarks and statistics concerning the income, financial status, etc., of each Company. It is published on the last Saturday of every other month—viz., January, March, May, July, September and November, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others at \$1 per copy.

The General Quotations of Stocks and Bonds, occupying s'x pages of the CHRONICLE, are published on the third Saturday of each month.

\* Figures cover only that part of mileage located in South Carolina.  
† Earnings given are on whole Jacksonville Southeastern System.  
‡ The figures from Jan. 1 to date include corrections for the first three months of each year. § Kansas City & Pacific included in both years.  
¶ Western and Atlantic included in Nov., 1891, but not in 1890.  
|| Includes earnings from ferries, etc., not given separately. † Mexican currency. ‡ Includes Rome Water & Ogd. in both years for December and the twelve months.

Sixty-two roads have reported their earnings for the fourth week of December, and we find that the gain as compared with the corresponding week in 1890 is 7.13 per cent.

\* Traffic interrupted by Patton tunnel catching fire and caving in December 11th. Tunnel still closed.

We shall publish our usual monthly editorial statement of earnings next week, but furnish below the following preliminary total covering 95 roads for the month of December. It will be observed that on these roads the gain reaches \$3,832,146 or 10.38 per cent.

Month of December. 1891. 1890. Increase. P. O.  
Gross earnings (95 roads) \$4,761,031 \$36,928,885 \$3,832,146 10.38

**Net Earnings Monthly to Latest Dates.**—The table following shows the net earnings reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of December 19. The next will appear in the issue of January 23.

## ANNUAL REPORTS.

## Western Maryland Railroad.

(For the year ending September 30, 1891.)

There were moved during the year 1,203,832 passengers and 585,017 tons of freight, the train performance being equivalent to the movement of 23,660,600 passengers and 19,938,927 tons of freight a distance of one mile, which, compared with 1890, shows an increase of 2,591,798 passengers and 5,262,189 tons of freight carried one mile.

The large increase in revenue was mainly gained in the last four months of the year, during which the freight movement amounted to 26,564 loaded cars, as against 16,467 for the same months of 1890. During the months of September and October there were 19,581 loaded cars moved, as against 11,110 in same months of 1890, showing an increase of 8,471 loads. This is largely the result of the recently-established connection through the Cumberland Valley between the Baltimore & Ohio and Philadelphia & Reading systems, brought about by bridging the Susquehanna River and utilizing the Harrisburg & Potomac Railroad and the Baltimore and Cumberland Valley line of this company, thus establishing a new route between Harrisburg and Hagerstown for anthracite and bituminous coal, coke, pig iron, steel rails and other heavy commodities.

Stated separately, the gross earnings of the Baltimore & Harrisburg Railway were \$164,203 98, the expenses \$99,250 84 and the net earnings \$64,953 12. Net increase over 1890, \$14,112 39.

Earnings and expenses of the Western Maryland lines were as follows:

	1888-89.	1889-90.	1890-91.
<i>Earnings from—</i>	\$	\$	\$
Passengers.....	328,588	340,032	378,890
Freight and express.....	390,617	416,805	435,805

Balance.....	154,508	212,187	251,439

## GENERAL INVESTMENT NEWS.

**Boston & Lowell.**—The annual meeting of the stockholders of the Boston & Lowell Railroad was held in Boston yesterday. The officers were all re-elected. It was voted to authorize the issue of 4,000 shares of new stock for the purpose of paying for additions and improvements made by the lessees, the Boston & Maine.

**Called Bonds.**—The following bonds have been called for payment:

## CHARLOTTESVILLE &amp; RAPIDAN RR. CO. BONDS.

Nos. 87, 98, 131, 212, for \$1,000 each, and 251, 312, 341, 432, 447, 466, 527, 584, 630, 706, for \$500 each, and 789 for \$100 each, will be paid on presentation to Philadelphia Trust, Safe Deposit & Insurance Co., Philadelphia, interest having ceased Jan. 1.

## CLEVELAND &amp; PITTSBURG RR. EQUIPMENT BONDS, series A, 52 bonds.

Nos. 101, 114, 122, 150, 156, 190, 196, 210, 236, 254, 259, 270, 297, 341, 380, 437, 440, 463, 494, 528, 541, 544, 570, 578, 600, 617, 669, 675, 729, 769, 775, 777, 812, 824, 861, 900, 922, 941, 944, 980, 984, 989, 1,017, 1,061, 1,106, 1,120, 1,152, 1,167, 1,169, 1,209, 1,218, 1,225. Interest on these bonds will cease July 1 next.

**MOBILE & OHIO RR.**—Certain bonds of this company have been called for payment, and the description with the numbers of same will be found in our advertising columns.

**NORTHERN PACIFIC RR.**—The numbers of certain Pend d'Oreille Div. bonds called for payment are given in our advertising columns.

**Central Iowa.**—The Reorganization Committee of this company had decided to allot, within twenty days, the common treasury stock to which those who paid their assessments on coupon debt certificates, first preferred, second preferred and common stock, are entitled under the bondholders' agreement, such common stock representing an amount that would have been issued had all of the old stock paid assessments. The bondholders' agreement provided for the distribution among those who paid assessments of the stock that should have been taken by those who paid no assessments. It is understood that this stock would be ratably distributed at 2½, 5, 10 and 15 per cent, to holders of the old securities who paid assessments, and that they would receive preferred stock for the amount they are required to pay in. The result of this distribution would be to bring into the treasury of the Iowa Central Company nearly \$400,000, which would liquidate the floating debt.

On Thursday an injunction was granted, and the committee on reorganization decided to make no distribution of the treasury stock at present, in consequence of the injunction. Counsel to the committee will appear in court on Monday to answer the summons and complaint, and the *Sun* remarks: "It is expected that this will be made a test case applicable not to the stock which has paid no assessments, which it is

recognized has no chance of entering the reorganization, for the injunction suit is brought by Mr. R. K. Dow, who had paid one assessment of two per cent on 1,000 shares of common stock, and who claims that he has a right to pay the balance due. This, counsel to the committee denies, but the committee will be governed in its final action by the decision of the Court, and hopes, as it has always endeavored to do in all its decisions, to do that which is equitable and just to all parties concerned."

**Central of Georgia.**—At Savannah, Jan. 4, the new directors of the Georgia Central Railroad was elected. Four new directors were chosen—two in the place of the Calhouns and two in the place of S. M. Inman and E. M. Green, who resigned some time ago. The new board is as follows: General E. P. Alexander, J. K. Garnett, Abraham Vetsburg, Joseph Hull, General Henry R. Jackson, George J. Mills, General G. M. Serrell, of Savannah; C. H. Phinizy, of Augusta; H. T. Inman, E. R. Howell, of Atlanta; U. B. Harrold, of Americus; James Swan and J. C. Maben, New York. The four new directors are Messrs. Jackson, Serrell, Mills and Maben.

**International & Great Northern.**—A dispatch from Galveston says the application for the issue of Receiver's certificates, referred to in our last issue, was denied. No particulars are given. In our advertising columns will be found a notice to holders of first mortgage bonds who have not signed the agreement of June 20, 1891, appointing a committee to enforce payment of the interest due, that they may sign this agreement at the office of Messrs. A. Iselin & Co., 36 Wall Street, not later than Feb. 1.

**Louisville & Nashville.**—The following statement has been issued of the general results from operations for six months ended Dec. 31, 1891, compared with previous year. In 1891 the earnings and expenses for December are estimated.

	1891 (Partly est.)	1890 (Actual)	Inc. or Dec.
Gross earnings...	\$11,070,021	\$10,034,375	+\$1,035,646
Operat. expens... (63 %)	7,063,451	6,240,606	+\$822,845
Net earnings. (36 %)	\$4,006,570	\$3,793,769	+\$212,801
Fixed Charges—			
Interest and rents	\$2,428,644	\$2,125,324	+\$303,320
Taxes.....	250,000	210,000	+\$40,000
Tot. fixed chgs.	\$2,678,644	\$2,335,324	+\$343,320
Net earnings.....	\$1,327,926	\$1,458,445	-\$130,519
Other income from investments.....	248,765	249,000	—235
	\$1,576,691	\$1,707,445	-\$130,754
Loss on Ga. RR...	\$30,000		+\$30,000
Loss on P. & A. R. R.		115,037	—115,037
Loss on other rds.	52,148	53,818	—1,670
Surplus.....	\$82,148	\$168,855	-\$86,707
Less 2½ per cent cash dividend declared Jan. 7.	\$1,494,543	\$1,538,590	-\$44,047
Balance of sur.	1,320,000	1,200,000	+\$120,000
	\$174,543	\$338,590	-\$164,047

**Missouri Pacific.**—The directors have authorized the extension for fifty years at 5 per centum of \$300,000 eight per centum real estate bonds maturing next month. Vermilye & Co. take up the old bonds and renew them.

**New York & New England.**—A change in the management of this company has taken place, and Mr. Chas. Parsons, who was so successful with the Rome Watertown & Ogdensburg road, has become a director, and is believed to have become a large holder of the stock. At a meeting of the board of directors at the company's office, No. 22 William Street, directors Jonas H. French, C. W. Sinclair and A. W. Nickerson, all of Boston, resigned, and Messrs. Austin Corbin and Charles Parsons, of this city, and Mr. F. H. Prince of Boston, were elected in their places. Mr. J. A. Bostwick, President of the road, offered his resignation, which was accepted, and Mr. Austin Corbin was elected to succeed him. The office of chairman of the board of directors was created and Mr. Bostwick chosen to fill it.

The Executive Committee of the board of directors have considered the proposition to double-track such portions of the road as were necessary from New Britain to Hawleysville, and on some sections five or ten miles in length, to complete the line to Fishkill. The subcommittee appointed comprises Alexander E. Orr, John L. Macauley and F. H. Prince, who are vested with power to devise ways and means not only for the double tracking, but also for the new equipment and to provide for the liquidation of the floating debt, which is stated by Mr. Bostwick to be about \$400,000.

**Oregon Pacific.**—The plan of reorganization which bondholders are requested to sign at the office of the Farmers' Loan & Trust Company recites that the Oregon Pacific Railroad is in default in the payment of interest upon its first mortgage bonds, and that a suit by the trustee for the foreclosure of the mortgage has progressed to a final decree of foreclosure, and an order thereunder for the sale of the property of said company on December 9, 1891, which has been postponed until January 20, 1892; and it is desirable that the holders of said bonds should agree upon a plan of reorganization for the protection of their interests in the property. The committee have recommended a plan of reorganization which contains the following provisions: That bondholders individually ratify and confirm the appointment made at the bondholders' meeting of the committee of reorganization,

composed of Messrs. Lindley Smyth, George S. Coe, Joseph Wharton, Rowland Hazard, George deB. Keim, James A. Blair, and Alexander Brown, with the powers and duties conferred upon said committee by the resolutions appointing them, and appoint said committee as their attorneys in fact, with power to carry into effect a plan of reorganization, which shall be substantially as follows:

"The committee having, as a preliminary condition, secured funds by the sale of a sufficient amount of receiver's certificates to meet the requirement of the Court for the payment of the amounts due for labor up to October 1, 1891, and by such payment having obtained from the Court a postponement of the day of sale until the 20th of January, 1892, to give time for the completion of the plan of reorganization—

"It is hereby agreed that a new first mortgage for \$18,000,000 be created on all the property of the company, now owned or hereafter to be acquired, to secure the payment of that amount of 5 per cent fifty-year gold bonds. And also that a second mortgage for \$10,000,000 on all the property of the company be created to secure the payment of income bonds for that amount. The denominations of said new first mortgage bonds shall be \$500 and \$1,000, and of said income bonds, \$100, \$500 and \$1,000.

"The undersigned hereby agree to accept in payment of one-half of the principal of the first mortgage bonds now owned by them, 50 per cent of their respective amounts in said new first mortgage bonds, with two years' coupons cut off, and for the other one-half of the principal of their said bonds to receive at par said income bonds to the respective amounts. For the two years' coupons cut off from the first mortgage bonds, so to be received, and for the accrued interest on the old first mortgage bonds now held, including the coupon due April 1, 1892, the undersigned agree to accept the payment of the par value of said cut-off coupons and said accrued interest in the new income bonds at 80 per cent of their par value.

"It is understood and agreed that the new first mortgage bonds and the new income bonds, and the proceeds of either or both, not required as above for the retirement of the old first mortgage bonds in the hands of owners, and the interest and coupons above referred to, shall be used as follows:

"First, for the payment of the outstanding floating indebtedness of the company, of which the expenses and obligations of the receivership, including certificates of indebtedness, shall be first paid, and also for all the necessary expenses which may accrue under this agreement.

"Second, for the prompt completion of the company's road from the present end of track to the eastern portion of State of Oregon, and for the provision of such additional steamships and equipments as may be necessary.

"It is distinctly understood that by this plan of reorganization the equitable rights of those who hold or are entitled to the present capital stock of the company are not diminished nor affected except to the extent of the additional prior liens placed under said stock by the increase of the first mortgage, and the creation of the new second mortgage or income bonds lien on all the properties of the company, for the purposes hereinbefore set forth; and all such equitable rights and interests in the existing stock of the company are hereby fully recognized, and new stock equivalent (except as to the increased liens thereunder) to the old stock and to the same amount may be created and issued to the present holders of said stock, or those equitably entitled to receive the same." \* \* \*

**Richmond & Danville.**—The most definite fact this week in Richmond Terminal matters is the formation of a syndicate to take up the Richmond & Danville Railroad floating debt. The guarantee syndicate to carry this floating debt until a permanent plan is arranged has been subscribed to the amount of over \$6,000,000. The principal subscribers, with the amounts they pledge themselves to provide, are as follows: Samuel Thomas, Calvin S. Brice, Jay Gould, Henry B. Payne, C. M. McGhee and George F. Baker, each \$500,000; Work, Strong & Co., Moore & Schley, Thomas M. Logan and J. A. Rutherford, each \$250,000; John H. Inman and J. C. Mahen, each \$200,000.

The loan is to be for six months and secured by the same collateral as that on which the floating debt is now carried. The Olcott Committee has not yet submitted its reorganization scheme, but one of the projects discussed has been the conversion of the Richmond Terminal Company from a corporation merely intended to hold securities to one which may practically operate railroads.

The Richmond Terminal Executive Committee met on Friday and nominated these officers for the Richmond & Danville Co. to be elected next week: John H. Inman to be President. The old board of directors to be re-elected with the following exceptions and substitutions: W. E. Strong in place of J. H. Hall, deceased; T. M. Logan in place of J. C. Calhoun, retired, and James Swan in place of J. S. Barbour, retired. Mr. John H. Inman replied to the request of the Richmond Terminal nominating committee that he would accept the presidency of the R. & D., and that he is in full accord with the efforts of the committee.

**St. Joseph & Grand Island.**—The settlement arranged between the trustees of the second mortgage income bonds of the St. Joseph & Grand Island Railroad and the Union Pacific Railway was followed by the appointment of W. P. Robinson, Jr., as General Manager of the St. J. & G. I. road. Mr. James H. Benedict, one of the St. Joseph trustees, is reported by the *Tribune* as saying, in relation to the settlement:

"I found the President and directors of the Union Pacific not only willing but anxious fully to carry out, in both spirit

and letter, the agreement with the St. Joseph & Grand Island road; and as soon as departures from that agreement were pointed out to them they cordially united with the trustees, and agreed upon a plan with them for the future independent management of the property which will prevent a recurrence of trouble."

"The new agreement provides that the St. Joseph & Grand Island and the Kansas City & Omaha shall be operated as one road under independent management. W. P. Robinson, Jr., has been appointed General Manager of the two roads, with headquarters at St. Joseph, Mo., but he may be removed for cause by the Union Pacific at any time." \* \* "All net earnings of the St. Joseph and the Kansas City & Omaha roads are to be remitted monthly to the Union Pacific office in Boston. Any vacancy in the office of General Manager shall be filled by agreement between the President of the Union Pacific and a majority of the St. Joseph's income bondholders' trustees. The Union Pacific agrees to pay \$42,000 to meet the coupons of the St. Joseph & Grand Island second mortgage bonds falling due July 1, 1890, on the assent of the holders to the agreement between the three companies, dated January 1, 1887, for a division of traffic. It is arranged that this traffic division shall be such as to enable the St. Joseph & Grand Island to contribute no more than \$42,000 a year to the interest on the Kansas City & Omaha first mortgage bonds, but if the latter road earns its interest in full the surplus earnings of the St. Joseph road are secured to it. The agreement is to be effective only upon the assent of the holders of two-thirds of the St. Joseph & Grand Island second mortgage bonds. There is little doubt that this consent will readily be assured.

The *Railroad Gazette* remarks of this: "The rights of the second mortgage bondholders to future earnings are clearly defined. The Union Pacific Company, under the agreement of 1885, will now deposit \$35,000 each month with the Central Trust Co. of New York to meet interest on the first mortgage bonds. The new agreement is not intended to impair in any way the contract relations already existing between the two companies. The particular point of the agreement is that it provides that the traffic relations between the companies shall not make the St. Joseph & Grand Island responsible for more than one-half the interest on the first mortgage bonds of the Kansas City & Omaha road. In case the latter company earns the interest on its first mortgage bonds all the surplus earnings of the St. Joseph & Grand Island are secured to it. The company owns over \$1,800,000 of the capital stock of the Kansas City & Omaha."

**Railroad and Miscellaneous Stocks in 1891.**—The following table shows the opening, highest, lowest and closing prices of leading groups of stocks during the year 1891. It was prepared as a part of the financial review of the year, to be found in the editorial pages to-day, but was unavoidably crowded out of that department.

## The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY, Jan. 8, 1892.

The new year brings in its first week wintry weather. The lower temperature has served to stimulate some markets, notably coal, which is said to be decidedly firmer in tone, with demand improving. The heavy movements of the leading staples of agriculture caused further declines in values, the cotton market becoming almost panicky at times, while the exports of food staples have not fully met expectations.

The following is a comparative statement of stocks of leading articles of merchandise at dates given:

	1891. Dec. 1.	1892. Jan. 1.	1891. Jan. 1.
Pork.....bbls.	17,448	24,153	25,034

Lard on the spot has not been active, but prices have made some advance in response to speculative influences, and were quite firm to-day at 6-05@6-10c. for prime City, 6-55@6-57½c. for prime Western and 6-60@6-95c. for refined for the Continent. The speculation in lard for future delivery has been at variable prices, but to-day made a sharp advance, in response to firmer Western markets. There was brisk buying for account of Western packers.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	6-40	6-42	6-42	6-48	6-44	6-56
February delivery.....c.	6-46	6-47	6-46	6-52	6-47	6-62
March delivery.....c.	6-55	6-56	6-54	6-60	6-55	6-70
May delivery.....c.	6-67	6-67	6-65	6-73	6-68	6-82

Pork has advanced to \$9-75@10-75 for mess, but closes quiet. Cut meats are firmer and more active, the sales to-day including 47,000 lbs. pickled bellies, 10@12½c., at 5½@5½½c., and a line of pickled hams at 7½c. Tallow steady at 4½c. Butter firmer at 23@31c. for creamery. Cheese firmer at 10½@11½c. for State factory, full cream.

Coffee on the spot has been quiet but steady; Rio No. 7 is quoted at 13½c. Mild grades have been fairly active and close firm; good Ceuca is quoted at 20c. Sales to-day included interior Padang at 2½c. The speculation in contracts has been dull and values made no important change until to-day, when there was a moderate decline, particularly in the distant deliveries, under weaker Brazilian advices and an increase in the world's visible supply for the month of December of 260,000 bags. The close was steady, with sellers as follows:

January.....12-50c.	April.....11-80c.	July.....11-55c.
February.....12-15c.	May.....11-50c.	August.....11-55c.
March.....11-90c.	June.....11-60c.	Sept.....11-45c.

—a decline of 5@20 points for the week, except for January, which is 5 points better.

Raw sugars have been fairly active at slightly better prices, closing firm at 8 1-16c. for fair refining muscovado and 3½c. for centrifugals, 96 deg. test. Refined sugars have been in fair demand at stronger prices; crushed is quoted at 5@5½c. and granulated at 4½@4¼c. At the tea sale on Wednesday the offerings were moderately large but prices were steady.

Kentucky tobacco remains quiet, but prices are well sustained. Seed leaf has been in fair request, and sales for the week are 820 cases, as follows: 200 cases 1890 crop, Pennsylvania Havana, 12@25c.; 216 cases 1890 crop, Pennsylvania seed, 12@13c.; 100 cases 1890 crop, State Havana, 14@30c.; 100 cases 1890 crop, New England Havana, 21@50c.; 54 cases 1890 crop, New England seed, 21c., and 150 cases 1890 crop, Wisconsin Havana, 13@14c.; also 500 bales Havana, 70@ \$1 15, and 150 bales Sumatra, \$2 00@3 00.

Straits tin is easier and quoted at 19-85@19-90c. on the spot. Ingot copper is some cheaper, but closes steady at 11@11½c. for Lake. Domestic lead is quiet but steady at 4-27½c. The interior iron markets are steady, but business proceeds rather slowly.

Refined petroleum is quoted at 6-45c. in bbls., 7-70c. in cases and 3-95c. in bulk; naphtha 5-50c.; crude petroleum 5-80c. in bbls. and 3-30c. in bulk. Crude certificates have advanced, selling to-day at 61@63½c., closing at 63½c. Spirits turpentine is dull at 34@34½c. Rosins are firm but quiet at \$1 37½@1 42½ for strained. Wool is dull. It is proposed to remove the import duty on foreign wools. Hops are in brisk export demand at full prices.

## COTTON.

FRIDAY, P. M., January 8, 1892.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the eight days ending this evening the total receipts have reached 230,205 bales, against 238,169 bales last week and 230,793 bales the previous six days, making the total receipts since the 1st of Sept., 1891, 5,031,507 bales, against 4,712,758 bales for the same period of 1890-91, showing an increase since Sept. 1, 1891 of 318,749 bales.

The speculation in cotton for future delivery at this market at the reopening of the Cotton Exchange on Monday showed much depression of tone, attended by a sharp decline in values, followed by something like a panic when New Orleans sent an estimate of large receipts at that port the next day. On Tuesday a slight decline was followed by some recovery, but a fresh selling movement set in which was ascribed to the failure of parties who were "long" to respond to calls for additional "margins" and prices dropped 18 a 20 points in a few minutes. So great a decline from prices already low brought in many of the bears to cover contracts and led to some new buying for the "long" account, on which the latest prices were much better than the lowest figures. On Wednesday the Liverpool market was steadier than either bulls or bears expected, and this market recovered a few points; but reports indicating that the crop movement for the week would exceed early estimates caused a fresh decline, attended by a very unsettled feeling; but a feature of the close was a slight advance in the winter months while the more distant months were cheaper. Yesterday there was another panic during the morning hours, in which prices fell 26 a 30 points, under a decline of 5-6 a 6-6 1/4. In the Liverpool markets. February contracts sold at 7-10c., March at 7-21c., April at 7-33c., May at 7-45c., June at 7-54c., July at 7-64c., and August at 7-78c. From these figures there was a partial recovery on a demand from the bears to cover contracts, and again some fresh buying for the "long" account. A failure of some importance was the result of the extreme low prices early in the day. To-day the market opened at an advance, but fell to about the closing figure of yesterday, recovered, and closed at a small advance; but with a quiet and rather unsettled tone. Cotton on the spot declined 3 1/2c. on Monday and 1-1/2c. on Tuesday and 1/2c. on Thursday. To-day a better business was reported for home consumption, and the market closed steadier at 7 7/8-16c. for middling uplands.

The total sales for forward delivery for the week are 833,900 bales. For immediate delivery the total sales foot up this week 1,038 bales, including — for export, 1,036 for consumption, — for speculation, and — in transit. Of the above — bales were to arrive. The following are the official quotations for each day of the past week—January 2 to January 8.

The following exchanges have been made during the week:

29 pd. to exch. 500 Feb. for May.	42 pd. to exch. 700 Apr. for Aug.
49 pd. to exch. 500 Oct. for May.	30 pd. to exch. 100 May for Aug.
15 pd. to exch. 100 Feb. for May.	32 pd. to exch. 100 Feb. for Apr.
41 pd. to exch. 100 Feb. for May.	10 pd. to exch. 100 May for June.
72 pd. to exch. 1,000 Feb. for Aug.	9 pd. to exch. 300 Sept. for Oct.
69 pd. to exch. 1,000 Apr. for Aug.	13 pd. to exch. 1,000 Apr. for May.
10 pd. to exch. 300 Jan. for Feb.	11 pd. to exch. 200 May for June.
36 pd. to exch. 400 Feb. for May.	

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Jan. 8) we add the item of exports from the United States, including in it the exports of Friday only.

	1892.	1891.	1890.	1889.
Stock at Liverpool.....bales.	1,467,000	942,000	957,000	710,000
Stock at London.....	11,000	20,000	16,000	4,000

Total Great Britain stock.	1,478,000	962,000	973,000	714,000
Stock at Hamburg.....	2,400	3,300	2,100	2,400
Stock at Bremen.....	135,000	143,000	136,000	12,200
Stock at Amsterdam.....	22,000	11,000	8,000	20,000
Stock at Antwerp.....	300	500	300	300
Stock at Havre.....	253,000	187,000	155,000	123,000
Stock at Marseilles.....	8,000	3,000	3,000	2,000
Stock at Barcelona.....	73,000	67,000	82,000	22,000
Stock at G. ....	8,000	6,000	10,000	3,000
Stock at T. ....	16,000	7,000	10,000	4,000

Total Continental stocks.....	522,700	432,800	413,400	188,300
Total European stocks.....	2,000,700	1,394,800	1,386,400	902,300
India cotton afloat for Europe.....	21,000	45,000	90,000	62,000
Amer. cotton afloat for Europe.....	630,000	573,000	565,000	537,000
Egypt, Brazil, &c., afloat for Europe.....	60,000	50,000	48,000	55,000
Stock in United States ports.....	1,327,194	915,556	715,782	906,521
Stock in U. S. interior towns.....	629,550	513,751	433,198	455,953

The imports into Continental ports this week have been 80,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 1,183,666 bales as compared with the same date of 1891, an increase of 1,424,308 bales as compared with the corresponding date of 1890 and an increase of 1,643,635 bales as compared with 1889.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week, and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1890-91—is set out in detail in the following statement.

TOWNS.	Receipts to January 8, 1892.			Receipts to January 9, 1891.		
	This week.	Since Sept. 1, 91.	Shipments this week.	Since Sept. 1, 90.	This week.	Since Sept. 1, 90.
Augusta, Ga.....	2,591	155,453	5,219	40,675	3,746	201,793

Total, 31 towns.....	94,914	3,530,088	113,144	629,550	113,512	3,263,686

\* Louisville figures "net" in both years.

† This year's figures estimated.

The above totals show that the interior stocks have decreased during the week 15,430 bales, and are to-night 113,759 bales more than at the same period last year. The receipts at all the towns have been 18,598 bales less than the same week last year, and since Sept. 1 they are 266,402 bales more than for the same time in 1890-91.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—Below we give closing quotations of middling cotton at Southern and other principal cotton markets for each day of the week:

Week ending Jan. 8.	CLOSING QUOTATIONS FOR MIDDLING COTTON ON—					
	Satur.	Mon.	Tues.	Wednes.	Thurs.	Fri.
Galveston.....	7½	7	6½	6½	6½	6½
New Orleans.....	7	6½	6½	6½	6½	6½
Mobile.....	6½	6½	6½	6½	6½	6½
Savannah.....	6½	6½	6½	6½	6½	6½
Charleston.....	7	7	7	7	7	7
Wilmington.....	7	6½	6½	6½	6½	6½
Norfolk.....	7	7	7	7	7	7
Boston.....	7½	7½	7½	7½	7½	7½
Baltimore.....	7½	7½	7½	7½	7½	7½
Philadelphia.....	8½	7½	7½	7½	7½	7½
Augusta.....	7	7	7	7	7	7
Memphis.....	7½	7½	7½	7½	7½	7½
St. Louis.....	7½	7½	7½	7½	7½	7½
Cincinnati.....	7½	7½	7½	7½	7½	7½
Louisville.....	7½	7½	7½	7½	7½	7½

The closing quotations to-day (Friday) at other important Southern markets were as follows:

Atlanta.....	6½	Little Rock.....	6½	Newberry.....	6½
Columbus, Ga.....	6½	Montgomery.....	6½	Raleigh.....	6½
Columbus, Miss.....	6½	Nashville.....	6½	Selma.....	6½
Eufaula.....	6½	Natchez.....	6½	Shreveport.....	6½

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the exports.

Week ending—	Receipts at the Ports.	St'k at Interior Towns.	Rec'pts from Plant'ns.
	1890-91	1891-92	1890-91
Dec. 4.....	205,488	241,318	293,181
" 11.....	252,612	257,529	295,504
" 18.....	252,256	260,327	277,984
" 24.....	248,408	270,782	230,780
" 31.....	218,610	246,980	228,109
Jan. 8.....	139,820	117,177	230,205

The above statement shows: 1.—That the total receipts from the plantations since September 1, 1891, are 5,805,128 bales; in 1890-91 were 5,211,939 bales; in 1889-90 were 4,902,181 bales.

2.—That, although the receipts at the outports the past eight days were 230,205 bales, the actual movement from plantations was only 214,775 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 192,276 bales and for 1890 they were 117,299 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Jan. 8 and since Sept. 1 in the last two years are as follows:

January 8.	1891-92.		1890-91.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis.....	18,361	385,553	23,223	341,734
Via Cairo.....	14,069	233,912	11,623	180,082
Via Hannibal.....	8,456	122,760	6,631	69,690
Via Evansville.....	2,475	20,696	1,842	14,344
Via Louisville.....	4,714	114,496	9,321	123,305
Via Cincinnati.....	3,534	79,825	8,940	111,919
Via other routes, &c.....	4,606	106,228	4,158	115,204
Total gross overland.....	56,215	1,063,470	65,768	956,278
Deduct shipments—				
Overland to N. Y., Boston, &c.....	21,370	180,884	11,865	150,219
Between interior towns.....	1,868	41,872	2,167	70,910
Inland, &c., from South.....	1,527	55,564	2,292	47,110
Total to be deducted.....	24,765	278,320	16,961	268,239
Leaving total net overland*.....	31,450	785,150	48,807	688,039

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 31,450 bales, against 48,807 bales for the same week in 1891, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 97,111 bales.

In Sight and Spinners' Takings.	1891-92.		1890-91.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Receipts at ports to Jan. 8.....	230,205	5,031,507	217,177	4,712,758
Net overland to Jan. 8.....	31,450	785,150	48,807	688,039
Southern consumption to Jan. 8.....	14,000	273,000	11,000	253,000
Total marketed.....	275,655	6,089,657	276,944	5,653,797
Interior stocks in excess.....	15,430	573,621	24,901	499,181
Came into sight during week.....	260,225		252,083	
Total in sight Jan. 8.....		6,663,278		6,152,978
North'n spinners tak'gs to Jan. 8.....		1,354,905		1,230,513

\* Decrease during week.

It will be seen by the above that there has come into sight during the eight days 260,225 bales, against 252,083 bales for the week of 1891, and that the increase in amount in sight to-night as compared with last year is 510,300 bales.

**WEATHER REPORTS BY TELEGRAPH.**—Our advices by telegraph from the South this evening indicate that except in the Southwest the temperature has in general been lower. The rainfall has as a rule been light.

**Galveston, Texas.**—There has been a shower one day of the week, the rainfall reaching thirty-two hundredths of an inch. The thermometer has ranged from 40 to 71, averaging 56.

**Palestine, Texas.**—We have had showers on two days during the week, the precipitation reaching sixty-four hundredths of an inch. Average thermometer 52, highest 72 and lowest 32.

**Huntsville, Texas.**—The weather has been dry all the week. The thermometer has averaged 54, the highest being 73 and the lowest 34.

**Dallas, Texas.**—We have had one shower during the week, the rainfall reaching fifty-five hundredths of an inch. The thermometer has averaged 50, ranging from 29 to 72.

**San Antonio, Texas.**—It has been showery on one day of the past week, the rainfall being eighteen hundredths of an inch. The thermometer has ranged from 32 to 78, averaging 55.

**Luling, Texas.**—No rain has fallen during the week. Average thermometer 54, highest 77 and lowest 32.

**Columbia, Texas.**—We have had dry weather all the week. The thermometer has averaged 56, the highest being 72 and the lowest 39.

**Cuero, Texas.**—Rain has fallen on one day of the week, to the extent of twenty-one hundredths of an inch. The thermometer has averaged 54, ranging from 32 to 75.

**Brenham, Texas.**—There have been showers on two days of the week, the rainfall reaching sixty-two hundredths of an inch. The thermometer has ranged from 34 to 76, averaging 55.

**Belton, Texas.**—Telegram not received.

**Weatherford, Texas.**—It has been showery on one day of the week, the precipitation reaching twenty-six hundredths of an inch. The thermometer has averaged 50, the highest being 76 and the lowest 24.

**New Orleans, Louisiana.**—It has rained on one day of the week, the rainfall reaching thirty-two hundredths of an inch. The thermometer has averaged 53. December rainfall three inches and ninety-three hundredths.

**Shreveport, Louisiana.**—Rain has fallen during the week to the extent of fifty-one hundredths of an inch. Average thermometer 48, highest 70, lowest 28. The rainfall in the month of December was six inches and eighty-five hundredths.

**Columbus, Mississippi.**—There has been rain on one day, the rainfall reaching seventy-four hundredths of an inch. The thermometer has averaged 50, the highest being 74 and the lowest 28. During the month of December the rainfall reached five inches and thirty-three hundredths.

**Leland, Mississippi.**—The week's rainfall has been fifty-four hundredths of an inch. The thermometer has averaged 52.3, ranging from 23 to 77.

**Vicksburg, Mississippi.**—During the month of December we had rain on eight days, and the precipitation reached three inches and seventeen hundredths.

**Little Rock, Arkansas.**—We have had rain on one day of the week, and now it is cloudy, threatening snow or rain. Average thermometer 43, highest 64, lowest 20. December rainfall six inches and forty hundredths.

**Helena, Arkansas.**—It has rained lightly on two days of the week, to the extent of fifty-eight hundredths of an inch. The thermometer has averaged 44, ranging from 20 to 64. During the month of December the rainfall reached seven inches and forty-nine hundredths, on eight days.

**Memphis, Tennessee.**—There has been no rain all the week, but it is now threatening. The thermometer has averaged 40, the highest being 60.8 and the lowest 18.6. During December we had rain on nine days, and the rainfall reached six inches and fifty hundredths. Average thermometer 49.2, highest 71 and lowest 27.

**Nashville, Tennessee.**—It has rained on four days of the week, the precipitation reaching eighty-four hundredths of an inch. The thermometer has ranged from 10 to 61, averaging 33. The precipitation during the month of December was four inches and twenty-six hundredths.

**Mobile, Alabama.**—It has rained on two days of the week, the precipitation reaching one inch and forty-two hundredths. Average thermometer 50, highest 70 and lowest 30. December rainfall, six inches and eighty-one hundredths.

**Montgomery, Alabama.**—Rain has fallen on four days of the week, and the rainfall reached sixty-six hundredths of an inch. The last three nights have been very cold. The thermometer has averaged 48, the highest being 69 and the lowest 26. Rainfall for month of December four inches and sixty hundredths, on ten days.

**Selma, Alabama.**—There has been rain on two days, the precipitation reaching one inch and fifty-three hundredths. The thermometer has averaged 48, ranging from 26 to 67. December rainfall four inches and ninety-one hundredths.

**Auburn, Alabama.**—We have had rain the past week to the extent of seventy-two hundredths of an inch. The thermometer has ranged from 19 to 65, averaging 42.7.

**Madison, Florida.**—We have had rain on two days during the week to the extent of one inch and eighty-four hundredths. Average thermometer 54, highest 76 and the lowest 24.

**Columbus, Georgia.**—During the month of December we had rain on eight days, and the rainfall reached five inches and nine hundredths.

**Savannah, Georgia.**—We have had rain on three days of

the week, the rainfall reaching forty-three hundredths of an inch. The thermometer has averaged 47, ranging from 28 to 69. During the month of December the precipitation was one inch and twenty-six hundredths.

**Augusta, Georgia.**—Rain has fallen on three days of the week, the precipitation reaching one inch and eighty-two hundredths. The thermometer has ranged from 27 to 63, averaging 44. December rainfall two inches and seventy-six hundredths.

**Charleston, South Carolina.**—We have had rain on four days of the week, the rainfall reaching sixty-five hundredths of an inch. Average thermometer 47, highest 64 and lowest 31. December rainfall one inch and sixty-two hundredths.

**Stateburg, South Carolina.**—There has been rain on three days of the week to the extent of one inch and sixty three hundredths. The thermometer has averaged 44.6, the highest being 63 and the lowest 26. December rainfall one inch and eighty-two hundredths.

**Wilson, North Carolina.**—We have had rain on two days during the week, the precipitation being one inch and twenty-one hundredths. The thermometer has ranged from 20 to 60, averaging 41.

The following statement we have also received by telegraph showing the height of the rivers at the points named at 3 o'clock January 7, 1892, and January 8, 1891.

	Jan. 7, '92.	Jan. 8, '91.
New Orleans.....	Above low-water mark.	Feet. 5-5
Memphis.....	Above low-water mark.	Feet. 17-8
Nashville.....	Above low-water mark.	Feet. 15-7
Shreveport.....	Above low-water mark.	Feet. 8-6
Vicksburg.....	Above low-water mark.	Feet. 21-9

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipt and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Jan. 7.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Year	Shipments this week.			Shipments since Sept. 1.			Receipts.	
	Great Brit'n.	Continent.	Total.	Great Britain.	Continent.	Total.	This Week.	Since Sept. 1.
'91-2.....	5,000	5,000	10,000	5,000	52,000	57,000	26,000	163,000
'90-1.....	19,000	19,000	38,000	7,000	62,000	69,000	57,000	315,000
'89-90.....	3,000	29,000	32,000	37,000	127,000	164,000	54,000	395,000
'88-9.....	24,000	24,000	48,000	22,000	86,000	108,000	46,000	270,000

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 31,000 bales and a decrease in the shipments of 14,000 bales, and the shipments since Sept. 1 show a decrease of 12,000 bales. The movement at Calcutta, Madras, and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

Year	Shipments for the week.			Shipments since Sept. 1.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Calcutta—						
1891-92.....	.....	3,000	3,000	3,000	12,000	15,000
1890-91.....	2,000	.....	2,000	5,000	11,000	16,000
Madras—						
1891-92.....	.....	.....	.....	14,000	8,000	22,000
1890-91.....	.....	.....	.....	14,000	11,000	25,000
All others—						
1891-92.....	1,000	1,000	2,000	17,000	20,000	37,000
1890-91.....	1,000	2,000	3,000	15,000	24,000	39,000
Total all—						
1891-92.....	.....	4,000	4,000	34,000	40,000	74,000
1890-91.....	3,000	2,000	5,000	34,000	46,000	80,000

The above totals for the week show that the movement from the ports other than Bombay is 1,000 bales less than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1891, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments to all Europe from—	1891-92		1890-91.		1889-90.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Bombay.....	5,000	57,000	19,000	69,000	32,000	164,000
All other ports.	4,000	74,000	5,000	80,000	6,000	81,000
Total.....	9,000	131,000	24,000	149,000	38,000	245,000

**ALEXANDRIA RECEIPTS AND SHIPMENTS.**—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Receipts (cantars)*.....	1891-92.		1890-91.		1889-90.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
.....	180,000	3,379,000	150,000	2,787,000	100,000	2,463,000
Exports (bales)—						
To Liverpool.....	13,000	220,000	10,000	163,000	7,000	179,000
To Continent.....	17,000	82,000	7,000	94,000	9,000	81,000
Total Europe.....	30,000	302,000	17,000	257,000	16,000	260,000

\* A cantar is 98 pounds.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is quiet for both yarns and shirtings at the decline. The demand from both India and China is poor. We give the prices for to-day below, and leave those for previous weeks of this and last year for comparison:

	1891-92.						1890-91.					
	32s Cop. Twist.	8 1/4 lbs. Shirtings.	Col'n Mid. Uplds.	32s Cop. Twist.	8 1/4 lbs. Shirtings.	Col'n Mid. Uplds.	32s Cop. Twist.	8 1/4 lbs. Shirtings.	Col'n Mid. Uplds.	32s Cop. Twist.	8 1/4 lbs. Shirtings.	Col'n Mid. Uplds.

Jan. 8 6 1/2	67 1/2	5 5	6 9	4	8 1/2	8 1/2	6 1/2	7 3	5 1/2	6 1/2	7 3	5 1/2

**OVERLAND MOVEMENT, &C., TO JANUARY 1.**—In our editorial columns to-day will be found our regular statements of overland movement, receipts, exports, spinners' takings, &c., brought down to January 1.

We have received from Mr. Fr. Jac. Andres, of Boston and New York, a handsome calendar which, in addition to the usual matter such as a publication gives, presents in a very attractive form a map of the cotton-growing region of Egypt. Mr. Andres is the leading importer of Egyptian cotton in America—representing in this country Mr. George Andres, of Alexandria—and also handles Peruvian and Asian cotton. The importation of Egyptian cotton has increased of late years, its long silky staple making it very desirable in certain classes of fine goods.

**JUTE BUTTS, BAGGING, &C.**—A moderate business, mainly in small parcels, is reported in jute bagging the past week, and at well sustained prices. The close to-night is at 5 1/2 c. for 1 1/2 lbs., 6 c. for 2 lbs. and 6 1/2 c. for standard grades. The market for jute butts has shown more animation than of late and quotations are unchanged at 1 1/2 c. for paper grades and 2 1/2 c. for bagging quality.

**DOMESTIC EXPORTS OF COTTON MANUFACTURES.**—Through the courtesy of Mr. S. G. Brock, Chief of the Bureau of Statistics, we have received this week a statement showing the exports of domestic cotton manufactures for November, and for the eleven months ended Nov. 30, 1891, with like figures for the corresponding periods of the previous year, and give them below.

Quantities of Manufactures of Cotton (colored and uncolored) exported to—	Month ending Nov. 30.		11 mos. ending Nov. 30.

**TO CURTAIL COTTON ACREAGE.**—In line with the action taken in Alabama and Georgia, a committee of the Mississippi Valley Cotton Growers' Association issued under date of Memphis, Tenn., December 30, the following letter:

DEAR SIR:—The Hon. D. G. Godwin, Commissioner of Agriculture of Tennessee, co-operating with the Commissioners of Agriculture of the other cotton-growing States, having called a meeting of the cotton growers and merchants interested in the growing of cotton, to meet in Memphis, January 8, 1892, to devise some plan for decreasing the production of cotton and to increase the production of such products as are consumed on the farm, thereby making the farmer self-sustaining and independent, we earnestly request that you take such steps as you

may deem advisable to have your section properly and fully represented at the meeting. We feel that it is a subject of paramount importance at this time to every one in any way interested either in cotton culture or in the general welfare of the section that produces that staple.

Arrangements have been made with all railroads and steamboats entering the city to give special rates to either delegates or individuals wishing to attend the meeting, and all are cordially invited. The farmers are especially urged to be present, one and all. Meeting at Hebrew Hall, corner Union and Second streets, at 11 o'clock, A. M.

Very respectfully,

J. R. Godwin, chairman; C. L. Robinson, J. G. Henning, H. L. Badford, I. G. Holloway, N. C. Perkins, Jr., Committee.

**SHIPPING NEWS.**—The exports of cotton from the United States the past week, as per latest mail returns, have reached 127,802 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

		Total bales.	
New York	To Liverpool, per steamers Aurania, 1,774.....	1,774

LIVERPOOL.—By cable from Liverpool we have the following statement of the week's sales, stocks, &c., at that port:

	Dec. 18.	Dec. 24.	Dec. 31.	Jan. 8.
Sales of the week.....bales.	60,000	57,000	23,000	52,000
Of which exporters took.....	2,200	3,900	3,900	2,000
Of which speculators took.....	9,800	17,000	18,000	5,800
Sales American.....	54,000	52,000	20,000	45,000
Actual export.....	7,000	6,000	7,000	6,000
Forwarded.....	79,000	68,000	50,000	75,000
Total stock—Estimated.....	1,197,000	1,301,000	1,428,000	1,457,000
Of which American—Estimated.....	1,008,000	1,030,000	1,210,000	1,236,000
Total import of the week.....	136,000	177,000	184,000	221,000
Of which American.....	125,000	145,000	170,000	95,000
Amount afloat.....	430,000	410,000	345,000	380,000
Of which American.....	420,000	400,000	335,000	370,000

The tone of the Liverpool market for spots and futures each day of the week ending Jan. 8, and the daily closing prices of spot cotton, have been as follows:

Spot.	Saturday	Monday	Tuesday	Wednesday	Thursday	Friday
Market, { 1:45 P. M. }	...	Barely supported	Dull and irregular.	In buyers' favor.	Dull and depressed	Dull and depressed
Mid. Upl'ds	...	4 <sup>3</sup> / <sub>16</sub>	4 <sup>1</sup> / <sub>8</sub>	4 <sup>1</sup> / <sub>8</sub>	4 <sup>1</sup> / <sub>16</sub>	4
Sales.....	...	10,000	7,000	10,000	10,000	8,000
Spec. & exp.	...	100	1,000	1,000	1,500	1,000
Futures.	...	...	...	...	...	...
Market, { 1:45 P. M. }	...	Barely steady at 2-64 dec.	Easy at 3-64 @ 4-64 decline.	Steady at 2-64 decline.	Quiet at 1-94 decline.	Easy at 3-64 @ 4-64 decline.
Market, { 4 P. M. }	...	Quiet.	Very steady.	Quiet but steady.	Weak.	Quiet.

The opening, highest, lowest and closing prices of futures at Liverpool for each day are given below. Prices are on the basis of Uplands, Low Middling clause, unless otherwise stated:

BREADSTUFFS.

FRIDAY, JANUARY 8, 1892.

The market for wheat flour has been dull, and prices show more or less depression. Neither shippers nor the local trade were disposed to operate freely, and the few buyers were inclined to insist upon lower values as prices for wheat gave way. An effort of producers of rye flour to combine for the support of prices seems to have had little effect. To-day there

was a better demand for higher grades of wheat flour for home use, and the whole market closed steady.

The wheat market reflects a large decline in both spots and futures. Not so great perhaps in itself, but following prices already much below those current at the opening of the crop year, is sufficiently serious to parties carrying the present accumulation of stocks. The Government estimate of our total crop is 612 million bushels—rather below many other estimates, but sufficiently large, in view of fully supplied distributing points, to cause prices to take a lower range. The export movement has been quite small, the decline not being enough to stimulate free shipments. To-day the market opened weak, but a better export trade (shippers taking 128,000 bushels) caused an improvement, and the distant deliveries closed dearer. No. 2 red winnet brought \$1.04½ afloat.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	104 <sup>3</sup> / <sub>4</sub>	104 <sup>3</sup> / <sub>4</sub>	104 <sup>3</sup> / <sub>4</sub>	105	102 <sup>3</sup> / <sub>4</sub>	102 <sup>3</sup> / <sub>4</sub>

Indian corn was variable and unsettled, turning weak yesterday under the very full supplies now coming forward, for which there appears to be no adequate outlet. The export demand was fair, but the local trade was dull. To-day there was renewed depression owing to excessive receipts at the West. There was a moderate export trade, No. 2 mixed bringing 51½ @ 53c. in elevator and afloat.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery.....c.	52 <sup>3</sup> / <sub>4</sub>	51 <sup>3</sup> / <sub>4</sub>	52	52	51 <sup>3</sup> / <sub>4</sub>	51 <sup>3</sup> / <sub>4</sub>
February delivery.....c.	51 <sup>3</sup> / <sub>4</sub>	51 <sup>3</sup> / <sub>4</sub>	51 <sup>3</sup> / <sub>4</sub>	51 <sup>3</sup> / <sub>4</sub>	51 <sup>3</sup> / <sub>4</sub>	51

## THE DRY GOODS TRADE.

NEW YORK, Friday P. M., January 8, 1892.

Agents have been wondering during the past week if the trade generally were still under holiday influences. Results have had that appearance. The demand from day to day has been on a more moderate scale than expected, and only at the extreme close are there indications of more freedom in operations. The market for domestics has been without feature of special importance so far as new business goes. Agents still report a steady tone. This, while correct so far as those lines which at the late reduction got well under contract, can scarcely be applied all round. The continuous decline in the price of cotton makes itself felt wherever mills are not in good shape with their production, and are thus more at the command of buyers with whom the price of cotton is an influence than their more fortunate competitors whose lines are always more or less in request. This leads to irregularity in prices, more noticeable in brown than in bleached goods. Jobbers have had an active week in their wash goods department, heavy orders being filled since the new spring styles were opened. In other directions, however, trade has been quiet. Collections continue good, and reports from all sections of the country, some parts of the South excepted, speak highly of the financial conditions prevailing and of the prospects for a sound and extensive business this year.

**DOMESTIC WOOLENS.**—With the beginning of the new year full lines of woolen and worsted trousers and suits for the fall season have been opened to buyers, who have now full selections available, with the exception of a few specialties not quite ready. Prices have also been made all round. These are mostly the same as a year ago. The exceptions are few, but where made are slightly under the previous range of values. Some fair-sized orders have been taken, but the real demand is not expected to develop for a week or two yet. The duplicate business in spring styles is still of moderate extent only. Overcoatings are well sold and prices are firm, especially for rough-faced goods of superior character. Cotton-warp cassimeres and satinetts are dull, and business in doekings and Kentucky jeans of but trifling extent. Wool dress goods have been in general request, with preference shown for cheviot and homespun varieties.

**DOMESTIC COTTON GOODS.**—The exports of cotton goods

from this port for the week ending January 5 were 3,239 packages, valued at \$159,049, their destination being to the points specified in the table below:

NEW YORK TO JAN. 5.	1892		1891	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.

From New England mill points direct

The value of the New York exports since January 1 have been \$159,049 in 1892 against \$130,133 in 1891.

The demand for staple cottons has not come up to expectations, but by means of deliveries from warehouses and mills a considerable business has been consummated during the week. Bleached cottons are without further change in prices and are steady. Brown sheetings, on the other hand, show some irregularity in standard and 3-yard makes, particularly in Southern brands. Colored cottons, such as denims, ticks, chevots, cottonades, &c., continue firm in leading makes, as do flat-fold cambrics and other goods closely allied to print cloths. New spring prints have been in fair request at first hands, and ginghams and other wash-fabrics have been extensively sold by jobbers. The demand for print cloths has been only moderate during the week, but on the other hand manufacturers have shown no real desire to encourage business at the present price of 31-16c. for 64x64s; prices are irregular for 56x60s.

Stock of Print Cloths—	1892. Jan. 2.	1891. Jan. 3.	1890. Jan. 4.
Held by Providence manufacturers.....	183,000	320,000	302,000
Fall River manufacturers.....	78,000	596,000	50,000
Outside speculators (est.).....	None.	None.	None.
Total stock (pieces).....	261,000	916,000	352,000

**FOREIGN DRY GOODS.**—The demand for imported goods during the week has been mostly for specialties in fine dress goods and silk fabrics, buyers evidently believing that purchases of staple lines may be deferred until nearer the opening of the retail spring season. General business rules quiet, but forwardings on account of importation orders have reached a considerable total. Prices are generally steady on what importers are pleased to call an indifferently remunerative basis.

## Importations of Dry Goods.

The importations of dry goods at this port for the week ending Jan. 7, 1892, and since Jan. 1, and the same facts for the corresponding periods of last year are as follows:

ENTERED FOR CONSUMPTION FOR THE WEEK ENDING JAN. 7, 1892, AND SINCE JAN. 1, 1892 AND 1891.

# STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

**Commercial and Financial CHRONICLE** contains 40 to 64 pages published every week.

**State and City Supplement of CHRONICLE** contains 184 pages published several times each year.

**Investors' Supplement of CHRONICLE** (a Cyclopaedia of Railroad Securities) contains 160 pages published every other month.

Subscription to CHRONICLE for one year \$10.00 which includes every issue of both SUPPLEMENTS.

**The purpose of this State and City Department** is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence if every Subscriber will note in his SUPPLEMENT on the page designated at the head of each item a reference to the page where the item in the CHRONICLE can be found, he will at all times possess a complete and fresh cyclopaedia of information respecting Municipal Debts.

[The fourth in our series of articles on the Laws of Kansas affecting Municipal Debts has been omitted this week to make room for the many items of news received relating to State and City debts.]

## MAYOR GRANT AND THE CITY FINANCES.

Mayor Grant's message was presented to the Common Council of New York City on Monday, Jan. 4, and it contained in accordance with legal requirement the city's financial statement, of which the following is a summary:

	1892.	1891.
Total funded debt on Jan. 1.....	\$150,298,870	\$146,371,023
Less sinking funds.....	52,783,431	48,513,793
Net funded debt on Jan. 1.....	\$97,515,439	\$97,857,230
Revenue bonds in anticipation of taxes..	34,600	207,188
Net debt (including revenue bonds) ..	\$97,550,039	\$98,064,418

For the sake of comparison we give from our STATE AND CITY SUPPLEMENT the corresponding figures on the first of January 1890 and 1889, and also a table showing the city's net debt in various years back to 1863.

	1890.	1889.
Total funded debt on Jan. 1.....	\$141,839,028	\$132,445,095
Less sinking funds.....	45,638,142	44,434,690
Net funded debt on Jan. 1.....	\$96,200,885	\$88,010,405
Revenue bonds in anticipation of taxes..	2,462,187	3,302,730
Net debt (including revenue bonds) ..	\$98,663,072	\$91,313,135

The annexed table shows the city's net debt as it was on the first day of January of each of the following years:

1892.....	\$97,550,039	1887.....	\$90,395,634	1871.....	\$116,773,721
1891.....	98,064,418	1886.....	93,031,951	1866.....	35,973,5978
1890.....	98,663,072	1885.....	93,648,100	1862.....	20,087,301
1889.....	91,313,135	1884.....	106,066,240		
1888.....	93,300,581	1876.....	116,773,721		

In connection with the new debt statement the Mayor calls attention to the fact that although permanent improvement bonds to the amount of \$7,582,346 85 have been issued during the year, yet the net debt at the close of 1891 shows a decrease of \$514,379 30.

Referring to the injustice of the State Board of Equalization the message contains the following paragraph with an interesting table appended:

The injustice inflicted upon this city by the State Board of Equalization continues. While the State Assessors, in accordance with their custom, briefly confer with the Commissioners of Taxes and Assessments in regard to the assessed valuations of this city, they pay but little attention to the suggestions made to them. On the occasion of the last conference of the State Assessors information was submitted to them by the Commissioners concerning the valuation of real estate in the rural counties, and it was shown that in all such counties the assessed valuation was very much further below the market value of real estate than in the city of New York. This data, however, received no consideration, for the State Board of Equalization re-peated the annual injustice done the taxpayers of this city by increasing the valuation of its real estate \$116,524,167. The discrimination against this city is such that it is called upon to pay nearly one-half the entire State tax. The story of this discrimination for ten years is shown in the following table:

## VALUATION OF REAL ESTATE.

Years.	Assessment by Tax Department.	Added by State Board.	Equalized Valuation.
1890.....	\$1,395,290,007	\$116,524,167	\$1,514,814,174
1889.....	1,331,578,291	122,061,343	1,453,639,634
1888.....	1,302,818,879	119,425,063	1,422,243,912
1887.....	1,254,491,849	118,883,202	1,373,375,051
1886.....	1,203,941,065	119,725,885	1,323,666,950
1885.....	1,168,443,137	99,975,926	1,268,419,063
1884.....	1,119,761,597	112,148,890	1,231,910,487
1883.....	1,079,130,669	113,919,639	1,193,050,308
1882.....	1,035,203,816	103,752,510	1,138,956,326
1881.....	976,735,199	126,829,509	1,103,564,707

In the following the figures under the heading "City" show the percentage of State tax that New York City would have been called upon to pay upon basis of assessed value as fixed by the Department of Taxes and Assessments, and under the heading "State" is given the percentage of State tax paid by the city on the increased value as fixed by the State Board of Equalization.

Year.	City.	State.	Year.	City.	State.	Year.	City.	State.
1890.....	42-8	45-9	1889.....	42-2	45-5	1888.....	41-9	45-2
1887.....	41-5	44-9	1886.....	41-8	45-6	1885.....	41-5	44-6
1884.....	42-0	45-6	1883.....	42-3	46-1	1882.....	41-9	45-5
1881.....	42-6	47-1						

Concerning the inadequate water supply which caused so much annoyance and apprehension during the autumn Mayor Grant writes as follows:

There is no likelihood of a recurrence of this scarcity, as the storage reservoirs now under course of construction will be completed within two years, and will be amply sufficient to supply all the needs of this population. Proceedings have been instituted for the condemnation of property for the creation of a still further storage reservoir at the site below the present Croton Dam known as Cornell's. This new reservoir will further add about 30,000,000 gallons to the storage supply of the city. It is thus apparent that the city's water supply in the future will be abundant; but even with such supply the comfort of our citizens cannot be assured without an extension of the present high service by the enlargement of the pumping plant. It is very much to be regretted that a bill intended to accomplish this purpose which passed the Assembly at the last session of the Legislature failed in the Senate.

## GOVERNOR FLOWERS'S MESSAGE AND NEW YORK'S STATE DEBT.

The New York Legislature received Governor Flower's message on Jan. 5, and we give below the debt statement at the end of the last fiscal year as therein reported. He says that the State debt has been reduced during the past fiscal year by the payment of \$100,000 Niagara Reservation bonds and \$1,936,650 canal debt, and that on the 30th of September 1891 the total funded debt was \$2,927,654 87, as follows:

General fund, Indian annuities.....	\$122,694 87
Canal debt.....	2,404,960 00
Niagara Reservation bonds.....	400,000 00

Total debt.....	\$2,927,654 87
Aggregate sinking fund.....	1,913,030 99

Total debt unprovided for, not yet due.....\$1,014,623 88  
This debt of \$1,014,623 88 unprovided for is made up of

Canal.....	\$491,929 01
Niagara Reservation.....	400,000 00
General fund, Indian annuities.....	122,694 87

As mentioned in the message, the principal of the general fund debt for Indian annuities (\$122,694.87) is an imaginary indebtedness and has no existence except from the fact that a sum equal to interest at 6 per cent on about that amount is annually appropriated by the Legislature as annuities to the Indians. We consequently omit this item in the following tabular statement, which adds the debt figures for October 1 1891 to those for October 1 1890 and 1889, given in the STATE AND CITY SUPPLEMENT.

	1891.	1890.	1889.
Total funded debt Oct. 1.....	\$2,804,960	\$4,941,610	\$6,652,160
Sinking funds.....	1,913,030	3,163,722	4,466,625
Net debt Oct. 1.....	\$891,930	\$1,677,887	\$2,185,530

Referring to the redemption of the debt Governor Flower writes as follows:

Part of the canal debt matures on Oct. 1 next and the remainder on Oct. 1 1893. The balance of \$491,929 01 now unprovided for will not have to be paid by tax, the Comptroller estimates, as there is expected to be a surplus in the canal fund revenue to meet it. If that prediction be well founded the State has levied its last tax for the payment of the canal debt.

The Niagara Park debt matures at the rate of \$100,000 each year, but its bonds are held by the State and can be paid at any time from the surplus now in the treasury if the Legislature so direct. They draw interest at the rate of 2½ per cent per annum.

It will be seen from the foregoing that New York's debt is no burden to the taxpayers of the State.

## BROOKLYN'S DEBT AND VALUATION.

Mayor Boody's message on January 4th to the Common Council of Brooklyn contained an abstract from the Comptroller's report for Dec. 31 1891, and we give below the statement of the city's total debt and assets as published in our STATE AND CITY SUPPLEMENT, with the addition of the new figures for Jan. 1 1892.

	1892.	1891.	1890.
Permanent debt.....	\$28,809,161	\$27,662,161	\$28,867,704
Water debt.....	12,666,000	10,582,000	12,282,500
Temporary debt.....	833,000	948,000	353,000
Tax certificates.....	3,000,000	3,000,000	3,000,000
Total debt.....	\$45,308,161	\$42,192,161	\$44,503,204
Sinking funds.....	3,327,370	4,060,595	9,863,662
Net debt Jan. 1.....	\$41,980,791	\$38,131,566	\$34,639,542

The following shows the increase in the permanent or ordinary debt and the water debt, and the decrease in the temporary debt during the past year :

	Increase.	Decrease.
Permanent debt.....	\$1,147,000 00	
Water debt.....	2,084,000 00	
Temporary debt.....		\$115,000 00
Gross debt.....	\$3,116,000 00	
Sinking fund.....		\$733,244 63
Net increase in city debt in 1891.....	\$3,849,224 63	

The details of the new bonds and certificates issued during the past year are given in the Comptroller's report, as below :

## STATEMENT OF BONDS AND CERTIFICATES ISSUED BY THE CITY OF BROOKLYN FROM DEC. 31 1890 TO DEC. 1 1891.

Loan.	Amount.	Premium.
Tax certificates, 3½ per cent.....	\$1,000,000	\$2,640 00
Tax certificates, 4 per cent.....	1,000,000	156 87
New York & Brooklyn Bridge, 3 per cent.....	360,000	
Sewer loan, 3 per cent.....	115,000	
Permanent water loan, 4 per cent.....	2,000,000	\$3,307 00
Park purchase, 3 per cent.....	184,000	
Public market, 3 per cent.....	750,000	3,050 00

Of the above, New York & B. Bridge 3 per cent bonds to the amount of \$60,000 and 3 per cent sewer bonds to the amount of \$15,000 were purchased by the Sinking Fund Commissioners. The details of bonds and certificates paid during the year are given as follows :

## STATEMENT OF BONDS AND CERTIFICATES PAID BY THE CITY OF BROOKLYN FROM DEC. 31 1890 TO DEC. 1 1891.

Loan.	Amount.
Soldiers' aid fund bonds, 7 per cent.....	\$81,000
Certificates of indebtedness (Third Avenue sewer), 3½ per cent.....	42,000
Certificate of indebtedness (Kulikerbocker Avenue sewer), 3½ per cent.....	29,000
Permanent water loan, 6 per cent.....	816,000
Soldiers' and Sailors' Monument, 3 per cent.....	15,000
Fourth Avenue improvement, 6 per cent.....	10,000
Fourth Avenue improvement, 7 per cent.....	7,000
Tax certificates, 3 per cent.....	2,000,000
Brooklyn local improvement, 7 per cent.....	213,000
Total.....	\$3,193,000

Amount issued from Dec. 31 1890 to Dec. 1 1891.....	\$6,309,000
Amount paid from Dec. 31 1890 to Dec. 1 1891.....	3,193,000
Increase.....	\$3,116,000

The assessed valuation of the city for the year 1891 has recently been reported by the Department of Assessment and shows an increase of \$14,163,798 since Nov. 30 1890. The totals for 1890 and 1891 are given by the Department as follows :

	1890.	1891.	Diff. in 1891.
Real estate.....	\$430,903,644	\$448,802,470	Inc. \$17,898,826
Personal property.....	21,846,807	18,111,779	Dec. 3,735,028
Totals.....	\$452,750,451	\$466,914,249	Inc. \$14,163,798

We give below the statement of Brooklyn's valuation in various years, as published in our recent SUPPLEMENT, with the addition of the new figures for 1891.

Years.	Real Estate.	Personal Property.	Total.	Rate of Tax per \$1,000.
1891.....	\$448,802,470	\$18,111,779	\$466,914,249	29.482
1890.....	430,911,794	21,846,807	452,758,601	26.50
1889.....	407,127,535	21,330,546	358,270,667	26.563
1888.....	385,904,998	22,597,240	354,140,088	27.595

1880.....	223,620,197	11,215,794	234,835,991	

Concerning Brooklyn's credit the Mayor says in his message that the "strained financial conditions of the world during the last two years affected in some degree the price of every form of investment. Our city could not hope to be exempt from an influence which was world-wide. The tendency, however, is again toward normal rates for money, and the latest prices obtained for our bonds continue to indicate Brooklyn's deservedly high credit."

**Fort Worth, Tex.**—The Mayor and Finance Committee of Fort Worth, Tex., will receive proposals at the National Bank of the Republic, New York City, until Jan. 15 1892, for \$170,000 of 6 per cent general funding and improvement bonds, interest semi-annual, bonds due Jan. 1 1923, both interest and principal payable in gold in New York. For particulars of sale see advertisement elsewhere in this paper.

The above is the remainder of an issue amounting to \$175,000, of which \$5,000 has been already taken by the various sinking funds of the city.

Up to the time of this new bond issue the funded debt of Fort Worth remained the same as reported for Sept. 30 1891 in our STATE AND CITY SUPPLEMENT, page 180.

The following statement of debt, assets and valuation was made by the city officials on Dec. 24 1891, and does not include the new bonds.

Bonded debt.....	\$1,144,000	Sinking funds.....	\$62,000
Floating debt.....	141,619	Assessed valuation '91.....	23,944,987
Cash on hand.....	123,544	Actual val. (estimated).....	40,000,000

We subjoin the table of valuation as published in the SUPPLEMENT with the addition of the 1891 assessment.

Years.	Real Estate	Personal Property.	Assessed Valuation.	Tax Rate. per \$1,000.
1891.....	\$16,502,625	\$4,804,160	\$23,944,987	\$20.55
1890.....	11,243,727	4,715,143	15,958,870	21.55

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Ansonia, Conn.**—(STATE AND CITY SUPPLEMENT, page 39).—Bids will be received at the Ansonia National Bank until Jan. 30 1892 for 4 per cent gold bonds of the Town of Ansonia to the amount of \$100,000. Interest will be paid semi-annually and the bonds will fall due Jan. 1 1912, but the town reserves the right to redeem the issue after Jan. 1 1902, upon the payment of 2 per cent premium.

**Brooklyn N. Y.** (STATE AND CITY SUPPLEMENT, page 48).—The Board of Education of the city of Brooklyn will ask the Legislature for permission to raise \$350,000 on an issue of the city's bonds, for the purpose of erecting new school houses.

**Buffalo, N. Y.**—(STATE AND CITY SUPPLEMENT, page 49).—The Franklin Savings Bank of New York has bought \$50,000 of Buffalo's 3½ per cent new charter bonds at par and accrued interest.

**Chicago, Ill.**—(STATE AND CITY SUPPLEMENT, page 98).—Chicago has sold 5 per cent water certificates to the amount of \$1,000,000.

**Colorado.**—(STATE AND CITY SUPPLEMENT, page 140).—The State Board of Commissioners have not as yet accepted any of the bids received on Dec. 23 for the \$300,000 of 4 per cent State Capitol bonds advertised lately.

**Fort Worth, Tex.**—This city is to issue new bonds to the amount of \$170,000 as mentioned in a foregoing item in this "Department." For particulars of sale see advertisement elsewhere in this paper.

**Goliad, Tex.**—The city of Goliad will offer for sale about Jan. 15 school bonds to the amount of \$11,000, interest at 6 per cent, and principal payable in 50 years, optional after ten years.

**Greene County, N. Y.**—(STATE AND CITY SUPPLEMENT, page 52).—There will be sold at auction on January 20 1892, at the Court-House at Catskill, N. Y., \$219,000 of 3½ per cent Greene County bonds. These bonds are to be dated March 1 1892, interest will be payable semi-annually in March and September, and the principal will mature as follows:

\$4,500 payable March 1 1893.	\$20,000 payable March 1 1898.
4,500 " " 1894.	20,000 " " 1899.
5,000 " " 1895.	20,000 " " 1900.
5,000 " " 1896.	20,000 " " 1901.
5,000 " " 1897.	115,000 " " 1902.

**Grand Rapids, Mich.**—(STATE AND CITY SUPPLEMENT, page 104).—Proposals were received by this city on the 23d of last December for \$300,000 of twenty-year 4 per cent water bonds, and the common council have sold the issue to Blake Bros. for \$313,050. N. W. Harris & Co. bid \$313,200, but imposed conditions which the city was unwilling to accept.

**Milwaukee, Wis.**—(STATE AND CITY SUPPLEMENT, page 109).—N. W. Harris & Co. have been awarded City of Milwaukee 5 per cent bonds to the amount of \$50,000.

**Missoula, Mont.**—(STATE AND CITY SUPPLEMENT, page 137).—The city of Missoula has sold recently 6 per cent twenty year bonds for sewers and bridges to the amount of \$93,000.

**New Hampshire.**—(STATE AND CITY SUPPLEMENT, page 18).—On Jan. 5 New Hampshire sold \$175,000 of State Library bonds to Harvey Fisk & Sons, N. Y. The price paid was 110.

**North Knoxville, Tenn.** (STATE AND CITY SUPPLEMENT, page 165).—This city will vote in February on a proposed issue of \$75,000 of 5 per cent 30-year sewer bonds. The following statement of debt and valuation on Jan. 1 1892 contains some facts not published in our recent SUPPLEMENT :

LOANS—	When Due.	Valuation, real.....	\$1,500,000
CITY BONDS.		Valuation, personal....	37,600
58.....	\$100,000	Total tax (per \$1,000)...	\$10 50
Total debt Jan. 1, 1892.....	\$100,000	Population in 1890 was	2,540

North Knoxville is situated in Knox County, adjoining Knoxville, and was incorporated in 1889.

**Syracuse, N. Y.**—(STATE AND CITY SUPPLEMENT, page 58).—This city will receive proposals until January 1 1892, for \$500,000 of water works bonds, interest to be at the rate of 3 per cent payable semi-annually, and principal to fall due on July 1 1920.

**Queens County, N. Y.** (STATE AND CITY SUPPLEMENT, Page 57).—Queens County offers for sale \$110,000 of gold bonds, and proposals for the purchase of the same will be received at the office of the County Treasurer in Long Island City, N. Y., until Jan. 14 1892. These bonds will bear semi-annual interest at the rate of 4 per cent, both principal and interest being payable in gold coin.

**Worcester, Mass.**—(STATE AND CITY SUPPLEMENT, page 35).—The \$800,000 of Worcester's 6 per cent funded city loan falling due on April 1 1892 will be renewed at a lower rate of interest.

### STATE AND CITY DEBT CHANGES.

We subjoin reports as to municipal debts received since the publication last week of our STATE AND CITY DEPARTMENT. Some of these reports are wholly new and others cover items of information additional to those given in the SUPPLEMENT, and of interest to investors.

**Illinois—La Salle County.**—We have received this week the following statement of the debt and valuation of La Salle County. We had no report from this county at the time our STATE AND CITY SUPPLEMENT was issued.

County seat is Ottawa.

LOANS—	When Due.	Tax valuation 1891...
COUNTY HOUSE BONDS—		\$17,000,000
4½, J&J, \$60,000	July 1, 1892	Assessment about ¼ actual value.
		State tax (per \$1,000).....\$3 30
(\$15,000 yearly)	to July 1, 1895	County tax (per \$1,000).....7 20
Interest is payable in New York.		Population in 1890 was.....80,798
Total debt Jan. 1 1892....		Population in 1880 was.....70,403

\$170,000

Fort Worth, Texas,  
CITY BONDS

FOR SALE.

Sealed bids will be received by the undersigned Mayor and Finance Committee of the City of Fort Worth, Tex., until 12 o'clock noon, on January 15, 1892, at the National Bank of the Republic, in New York City, for the purchase of one hundred and seventy bonds (being the whole number of bonds authorized by the ordinance of the city, to-wit: One hundred and seventy-five, less five of said bonds sold to the various sinking funds of said city), of one thousand dollars each, issued for the purposes named in said ordinance, and designated as "General Funding and Improvement Bonds," dated January 1, 1892, bearing interest at 6 per cent per annum, payable semi-annually, as per coupons attached—both interest and principal payable in gold coin, in the City of New York—due January 1, 1922.

Each bid must be accompanied by a properly certified check for \$5,000, payable to the order of J. P. Smith, Mayor. The right to reject any and all bids is reserved. All bids to be addressed "To the Mayor and Finance Committee of the City of Fort Worth, in care of the National Bank of the Republic, New York City, and indorsed "Bids for Bonds."

J. P. SMITH, Mayor.

**Iowa—Scott County.**—Scott County has reported its debt and valuation to us this week as given below. No statement from there was received for our SUPPLEMENT.

County seat is Davenport.

Bonded debt Jan. 1 1892.....	\$10,000	Total valuation 1891.....	\$10,408,215
Sinking funds.....	12,000	State tax (per \$1,000).....	\$2.00
Net debt Jan. 1 1892.....	28,000	County tax (per \$1,000).....	\$13.00
Tax valuation, real.....	8,206,252	Population in 1890 was.....	43,164
Tax valuation, personal.....	2,201,963	Population in 1880 was.....	41,266

**Kentucky—Warren County.**—The financial statement for this county has been received this week. As this is the first response we have had from the county, its debt figures did not appear in our STATE AND CITY SUPPLEMENT.

County seat is Bowling Green.

<b>LOANS—</b>	<b>When Due.</b>	<b>Net debt Jan. 1 1892.....</b>	<b>\$21,500</b>
BRIDGE AND ROAD BONDS—		Tax valuation, real.....	7,382,373
6s, J&J, \$24,500.....	July 1, 1898	Tax valuation, personal.....	2,644,243
Subject to call at any time.		Total valuation 1891.....	\$10,026,616
<b>TURNPIKE BONDS—</b>		Actual value (est'm'd).....	14,000,000
5s, J&J, \$60,000.....	various.	Tax valuation 1890.....	9,500,000
Subject to call 5 yrs. after issue.		State tax (per \$1,000).....	\$4.25
Int. is payable in Bowling Green.		County tax (per \$1,000).....	\$1.50
Total debt Jan. 1 1892.....		Population in 1890 was.....	30,158
Sinking funds.....		Population in 1880 was.....	27,531
		Population in 1880 was.....	27,531

The county owns stock in various turnpikes to the amount of \$60,000 which pays an average dividend of about 5 per cent. This stock is included in the sinking fund assets as given above.

**Michigan—Grand Rapids.**—(STATE AND CITY SUPPLEMENT, page 104).—We notice that the Grand Rapids Democrat published in November the following statement of the bonded debt of that city, furnished the paper by the Assistant City Treasurer, Thomas Nestor.

BONDS.	Amount.	Rate of interest.	Due.
Water works, 1st series.....	\$250,000	8	1893
Water works, 2d series.....	100,000	8	1895
Water works, 3d series.....	32,000	8	1896
Water works, 4th series.....	150,000	5	1908
Water works, 5th series.....	80,000	5	1909
Water works, 6th series.....	300,000	4	1911
City Hall.....	150,000	5	1904
Total.....	\$1,062,000		

The foregoing does not include the School bonds (probably issued by the School District), which are given in our STATE

AND CITY SUPPLEMENT. Hence a complete exhibit of the city's debt November, 1891, would be as follows:

<b>LOANS—</b>	<b>When Due.</b>	<b>WATER BONDS—</b>	
CITY HALL BONDS—		8s, A&O, \$250,000.....	Oct. 1, 1893
5s, J&J, \$150,000.....	July 1, 1904	8s, J&D, 100,000.....	June 1, 1895
<b>SCHOOL BONDS—</b>		8s, J&J, 32,000.....	June 1, 1896
5s, various, \$26,000.....	1891 to 1904	5s, ..... 150,000.....	1908
4s, ..... \$21,000.....	1905	5s, ..... 80,000.....	1909
4s, ..... \$21,000.....	1907	4s, ..... 300,000.....	1911

**Pennsylvania—Tioga County.**—(STATE AND CITY SUPPLEMENT, page 77).—We have received information this week concerning the debt of Tioga County which enables us to publish the following detailed statement:

The county seat is Wellsboro.

<b>LOANS—</b>	<b>When Due.</b>	<b>COUNTY BONDS—</b>	
COUNTY BONDS—		4s, J&J, \$5,000.....	Oct. 1, 1897
5s, J&J, \$1,000.....	May 1, 1900	4s, J&J, 5,000.....	Oct. 1, 1898
